Money, Banking and Credit in Mediaeval Bruges - Italian Merchant Bankers, Lombards and Money Changers - A Study in the Origins of Banking Raymond De Roover,2008-11 MONEY BANKING AND CREDIT IN MEDIAEVAL BRUGES Italian Merchant Bankers Lombards and Money Changers A Study in the Origins of Banking by RAYMOND DE ROOVER Ph D Associate Professor of Economics Wells College THE MEDIAEVAL ACADEMY OF AMERICA CAMBRIDGE MASSACHUSETTS 1948 was dc possible by grants of funds to the from the Carnegie Corporation of New Yor and the Business History Foundation f Inc COPYRIGHT BY THE MEDIAEVAL ACADEMY OF AMERICA 1948 PRINTED IN U S A A MONSIEUR REMI A PARMENTIER CONSERVATEUR DES ARCHIVES COMMUNALES DE BRUGES qui pendant pres de vmgt ans na cesse dc suwrc ct dencourager cc travail sur Vhistoire de la banque a Bruges Preface THIS book is the outcome of my finding a casual reference to the existence of several account books of mediaeval merchants in the Bruges Municipal Archives For some time I had been interested in the history of accounting and I had delved in the archives of Antwerp my native city Antwerp is rich in business records of the sixteenth and later centuries but I had seen no earlier ac count books Upon learning of their existence in Bruges I immediately wrote a letter of inquiry to the Curator of the Bruges Archives The reply was courteous but not encouraging Yes there were some mediaeval account books in the Bruges Archives but the script was nearly illegible and the interpretation of those documents I was tactfully given to understand would require the combined talents of a palaeographer a bookkeeper and a financier At that time I knew some bookkeeping and I had worked in a bank but I could qualify neither as a financier nor as a palaeographer Nevertheless undaunted by the difficulties I made arrangements with theArchivist Monsieur Remi A Parmentier to visit the Bruges Archives and to examine those mysterious and alluring account books The first visit took place in May 1929 It was followed by many others because Monsieur Parmentier had not

exaggerated the difficulties Several of my short vacations I was then working in a business office were spent bending over the huge ledgers of Collard de Marke and Guillaume Ruyelle in the salle du public where only the carillon interrupted from time to time the archival silence As the years passed my acquaintance with Monsieur Parmentier grew into a warm and enduring friendship Not only did he grant me unusual privileges and facilities for research but he introduced me to Professor Egide Strubbe and thus enabled me to publish the preliminary results of my investigation in the Annales de la Societe d'Emulation de Bruges My last visit to the Bruges Archives was in 1938 By that time I had completed my research and had conceived the general scheme of this book Its completion was prevented for a long time by other duties and when it was finally completed publication was delayed by the War During all these years Monsieur Parmentier never lost hope It is only fitting that this book for which he has waited so long be dedicated to him Before leaving Bruges I must also thank Monsieur Albert Schouteet the Assistant Archivist He has helped me in many ways by answering repeated queries and by sending me transcripts of various documents He was also generous enough to communicate to me the text of a hitherto unknown document which he had discovered and which established beyond doubt that Guillaume Ruyelle one of the two money changers whose accountbooks are preserved in Bruges VII viii Preface actually failed in 1370 This bit of evidence which confirmed my suspicions was particularly welcome to me and due credit should therefore be given to the finder This work would have been impossible without the financial aid of the Belgian Fonds National de la Recherche Scientifique which enabled me to spend a summer in Italy and to photograph a great many mediaeval business papers in the Datini Archives Prato Tuscany

Money, Banking, and Credit Made Simple Merle E. Zwass,1979      **Money, Banking, and Financial Intermediation** Gary Smith,1991      Money, Banking, and Credit Dwight M. Jaffee,1989-01-01      *Making Money* Christine Desan,2014-11-27 Money travels the modern world in disguise It looks like a convention of human exchange a commodity like gold or a medium like language But its history reveals that money is a very different matter It is an institution engineered by political communities to mark and mobilize resources As societies change the way they create money they change the market itself along with the rules that structure it the politics and ideas that shape it and the benefits that flow from it One particularly dramatic transformation in money s design brought capitalism to England For centuries the English government monopolized money s creation The Crown sold people coin for a fee in exchange for silver and gold Commodity money was a fragile and difficult medium the first half of the book considers the kinds of exchange and credit it invited as well as the politics it engendered Capitalism arrived when the English reinvented money at the end of the 17th century When it established the Bank of England the government shared its monopoly over money creation for the first time with private investors institutionalizing their self interest as the pump that would produce the money supply The second half of the book considers the monetary revolution that brought unprecedented possibilities and problems The invention of circulating public debt the breakdown of commodity money the rise of commercial bank currency and the coalescence of ideological commitments that came to be identified with the Gold Standard all contributed to the abundant and unstable medium that is modern money All flowed as well from a collision between the individual incentives and public claims at the heart of the system The drama had constitutional dimension money as its history reveals is a mode of governance in a material world That character undermines claims in economics about money s neutrality The monetary design innovated in England would later spread producing the global architecture of modern money
