*Cyber-Marx* Nick Dyer-Witheford,1999 In this highly readable and thought provoking work Nick Dyer Witheford assesses the relevance of Marxism in our time and demonstrates how the information age far from transcending the historic conflict between capital and its laboring subjects constitutes the latest battleground in their encounter Dyer Witheford maps the dynamics of modern capitalism showing how capital depends for its operations not just on exploitation in the immediate workplace but on the continuous integration of a whole series of social sites and activities from public health and maternity to natural resource allocation and the geographical reorganization of labor power He also shows how these sites and activities may become focal points of subversion and insurgency as new means of communication vital for the smooth flow of capital also permit otherwise isolated and dispersed points of resistance to connect and combine with one another Cutting through the smokescreen of high tech propaganda Dyer Witheford predicts the advent of a reinvented autonomist Marxism that will rediscover the possibility of a collective communist transformation of society Refuting the utopian promises of the information revolution he discloses the real potentialities for a new social order in the form of a twenty first century communism based on the common sharing of wealth

A handful of corporations and financial institutions command an ever greater concentration of economic and political power in an assault against markets, democracy and life. It's a suicide economy, says David Korten, that destroys the very foundations of its own existence. The bestselling 1995 edition of *When Corporations Rule the World* helped launch a global resistance against corporate domination. In this twentieth anniversary edition, Korten shares insights from his personal experience as a participant in the growing movement for a New Economy. A new introduction documents the further concentration of wealth and corporate power since 1995 and explores why our institutions resolutely resist even modest reform. A new conclusion chapter outlines high leverage opportunities for breakthrough change.
