Fastness to Coastal Kingdoms John Deyell, Rila Mukherjee, 2019-08-09 Money is central to the functioning of economies yet for the pre modern period our knowledge of monetary systems is still evolving Until recently historians of the medieval world have conflated the use of coins with a high degree of monetization States without coinage were considered under monetized It is becoming more evident however that some medieval states used money in complex ways without using coinage Moneys of account supplanted coins wholly or in part But there is an imbalance of evidence coins survive physically while intangible forms of money leave little trace This has skewed our understanding Since coin usage has been well studied in the past these essays flesh out our consideration of societies that used money but struck no coins Absence or shortage of coining metals was not the causative factor some of these societies had access to metal supplies but still remained coinless Was this a strategic choice Does it reflect the unique system of governance that developed in each kingdom It is surely time to unravel this puzzle This book examines money use in the Bay of Bengal world using the case of medieval Bengal as a fulcrum Situated between mountains and the sea this region had simultaneous access to both overland and maritime trade routes How did such cashless economies function internally within their regions and in the broader Indian Ocean context This volume brings together the thoughts of a range of upcoming scholars and a sprinkling of their elders on these and related issues Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka *Wages and Currency* Jan Lucassen, 2007 The basic hypothesis of this volume is that currency patterns may tell us something about the spread of wage payments in specific societies in history The book discusses the relationship between wages and currency with reference to different countries and regions in Europe Asia and South America over more than 2000 years *The Origins of Capitalism and the "Rise of the West"* Eric Mielants, 2008-03-15 In this study Eric Mielants provides a novel interdisciplinary interpretation of the origins of modernity and capitalism in particular He argues that contrary to popular thinking the Rise of the West should not be analyzed in terms of the Industrial Revolution or the colonization of the New World but viewed from long term developments that occurred in the Middle Ages A fascinating overview of different civilizations in East Asia South Asia and Northwestern Africa is provided and systematically compared and contrasted with Western Europe This book addresses some of the major debates that have recently unfolded in world history comparative sociology political economy sociological theory and historical sociology Mielants indicates how many existing theories such as Marxism World Systems Theory and Smithian Modernization Theory have suffered from either Eurocentric or limited temporal and spatial analyses which prevents them from a complete understanding of why the origins of capitalism and citizenship emerged in Western Europe **The Sea and Civilization** Lincoln Paine, 2015-10-27 A monumental retelling of world history through the lens of the sea revealing in breathtaking depth how people first came into

contact with one another by ocean and river lake and stream and how goods languages religions and entire cultures spread across and along the world's waterways bringing together civilizations and defining what makes us most human The Sea and Civilization is a mesmerizing rhapsodic narrative of maritime enterprise from the origins of long distance migration to the great seafaring cultures of antiquity from Song Dynasty human powered paddle boats to aircraft carriers and container ships Lincoln Paine takes the reader on an intellectual adventure casting the world in a new light in which the sea reigns supreme Above all Paine makes clear how the rise and fall of civilizations can be linked to the sea An accomplishment of both great sweep and illuminating detail The Sea and Civilization is a stunning work of history **Silk for Silver** Anh Tuấn

HoÁng,2007 This book focuses on the political and commercial relations between the Dutch East India Company VOC and the Vietnamese kingdom of Tonkin from 1637 until the beginning of the eighteenth century The VOC exported silk and silk piece goods from Tonkin to Japan The author focuses on various aspects of the mutual relationship between the VOC and Tonkin and how this fitted into the larger picture of the intra Asian trade The book reveals the vicissitudes in political relations and the varying trends in the VOC's import silver and copper and export silk ceramics musk and gold While examining a great deal of detailed archival materials the author evaluates Dutch influence on Tonkin's feudal society and economy The book also offers a fascinating sketch of how the Vietnamese trading elite maximized their own profits by dealing with various western tradesmen including the English and French **Remote Sensing in Archaeology** James R. Wiseman, Farouk

El-Baz,2007-04-03 Archaeology has been transformed by technology that allows one to see below the surface of the earth This work illustrates the uses of advanced technology in archaeological investigation It deals with hand held instruments that probe the subsurface of the earth to unveil layering and associated sites underwater exploration and photography of submerged sites and artifacts and the utilization of imaging from aircraft and spacecraft to reveal the regional setting of archaeological sites and to assist in cultural resource management
