Money Politics And Law A Study Of Electoral Campaign Finance Reform In Canada:

Money, Politics, and Law Keith D. Ewing, 1992 Criticizing the electoral system is practically an American pastime Are there any viable alternatives *Money Politics and Law* is a study of electoral expenditure controls in Canada Making frequent comparisons with the United States and Britain it examines the background of electoral expenditure the legislative control asserted on political parties and the struggle arising from the potentially conflicting goals of equality enforced by fiscal control and the constitutional protection of liberty This work will interest those involved with law and politics as well as electoral law and civil liberties **The Origins of Canadian and American Political Differences** Jason

Kaufman, 2009-02-16 Why do the United States and Canada have such divergent political cultures when they share one of the closest economic and cultural relationships in the world Kaufman examines the North American political landscape to draw out the essential historical factors that underlie the countries differences *Money, Politics, and Democracy* Lisa

Young, Harold J. Jansen, 2011-02-08 In 2004 Jean Chrétien's Liberals banned unions and corporations from contributing financially to political parties In 2008 opposition leaders were prepared to defeat the Conservative government over its proposal to eliminate public subsidies to parties In *Money Politics and Democracy* Lisa Young and Harold Jansen lead a distinguished group of political scientists in exploring the issues that led to the showdown Are publicly funded parties compatible with democracy What effect have campaign finance reforms had on the balance of power between parties and donors on the relationship between national parties and local organizations on electoral competition This timely volume reveals that the financial centre of gravity for political parties is shifting between national and local organizations as individual donors replace unions and corporations To survive financially parties must now maximize their seats and votes Contributors show that campaign finance reforms have shaped party organization and electoral competition contributing to successive minority governments **Money and Politics** Joo-Cheong Tham, 2010 Examines the various ways in which

money influences Australian politics private and public funding income and spending direct contributions to political parties as well as lobbying cover *Ibss: Political Science: 1992* British Library of Political and Economic Science, 1993 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences *Democracy by the People* Eugene D.

Mazo, Timothy K. Kuhner, 2018-11-29 Thanks to a series of recent US Supreme Court decisions corporations can now spend unlimited sums to influence elections Super PACs and dark money groups are flourishing and wealthy individuals and special interests increasingly dominate American politics Despite the overwhelming support of Americans to fix this broken system serious efforts at reform have languished Campaign finance is a highly intricate and complex area of the law and the current system favors the incumbent politicians who oversee it This illuminating book takes these hard realities as a starting point and offers realistic solutions to reform campaign finance With contributions from more than a dozen leading scholars of

election law it should be read by anyone interested in reclaiming the promise of American democracy The Funding of Political Parties Keith Ewing, Jacob Rowbottom, Joo-Cheong Tham, 2012-01-25 This book explores the problems associated with regulating the funding of political parties and election campaigns in a timely assessment of a topic of great political controversy From interest in Obama's capacity to raise vast sums of money to scandals that have rocked UK and Australian governments party funding is a global issue reflected in this text with case studies from Australia Canada New Zealand United Kingdom and the United States Taking an interdisciplinary approach with leading scholars from politics geography and law this text addresses key themes contributions spending controls the role of broadcasters and special interests and the role of the state in funding political parties With regulatory measures apparently unable to change the behaviour of parties why have existing laws failed to satisfy the demands for reform and what kind of laws are necessary to change the way political parties behave The Funding of Political Parties Where Now brings fresh comparative material to inform this topical and intractable debate and assesses the wider implications of continuing problems in political funding This book will be of interest to students and scholars of political science political theory policy and law **Money, Politics and Law in the SADC Region** Oagile Key Dingake, 2006 This booklet on Money Politics and Law provides the reader with current information on public funding of political parties disclosure of sources of funding prohibited sources of funding and the connection between money political influence and corruption It provides an important discourse on the politics of money and the dangers of an unregulated funding environment for political parties and candidates As part of the discussion around funding of political parties it can be argued that public funding is a natural and necessary cost of democracy and that inherent to the work of political parties is the need for money to pay for their electoral campaigns to keep contact with their constituencies to ensure accountability to prepare policy decisions and to pay professional staff for quality research and administration Also if political parties and candidates get at least a minimum required amount of money from the public purse this has the potential to limit the likelihood of them accepting money from private donors with the concomitant political agendas and potential to buy influence and accept political favours in return for their generosity **Paying for Democracy** Kevin Casas-Zamora, 2024-10-31 If the funding of parties and campaigns is a crucial issue for democratic theory and practice then the spread of State subsidies for parties is arguably the most important trend in contemporary political finance Using a large data set on political financing in more than 40 democracies the book offers an unprecedented comparative study of the features of party subsidies and their effects on campaign finance practices party systems and party organisations The book also provides a detailed empirical account of campaign finance in two of Latin America's most consolidated democracies Drawing upon extensive archival work and interviews this work sheds light on largely hidden aspects of politics in the developing world and questions widespread beliefs about political finance such as the rapid increase of campaign costs and the crucial role of television in this trend *Politics in Canada* Robert J. Jackson, Doreen Jackson, 1998

Interest Groups and Campaign Finance Reform in the United States and Canada Robert G Boatright, 2011-03-15 In the early 2000s the United States and Canada implemented new campaign finance laws restricting the ability of interest groups to make political contributions and to engage in political advertising Whereas both nations legislative reforms sought to reduce the role of interest groups in campaigns these laws have had opposite results in the two nations In the United States interest groups remained influential by developing broad coalitions aimed at mobilizing individual voters and contributors In Canada interest groups largely withdrew from election campaigns and thus important voices in elections have gone silent Robert G Boatright explains such disparate results by placing campaign finance reforms in the context of ongoing political and technological changes Robert G Boatright is Associate Professor of Political Science at Clark University Cover photo iStockphoto com alfabravoalpharomeo

Directors' Personal Liability for Corporate Fault
Helen Anderson, Rick Krever, 2008-10-22 The corporation's ability to avoid the costs of risks that materialize as a result of its pursuit of profits is a departure from the market model It can easily be seen as an evasion of the obligations that go with being the unconcoercing freely acting and choosing invisible hand Dramatic corporate collapses and major human and economic disasters due to bad corporate conduct have strengthened the common sense view that if the corporate directors and officers have made the deliberate act their own in some way they may be held responsible on the same basis that liberal law holds all individuals responsible for their intended actions in the non corporate settings Accordingly recent decades have seen an increasing number of statutory interventions worldwide that impose direct responsibilities on directors and other corporate officers in respect of a wide range of regulatory regimes environmental regulation occupational health and safety and other employment standards human rights statutes transportation regimes consumer and competition laws protections for

creditors and workers against insolvent trading and the like Legitimacy crises have pushed legislators to enlarge the number of responsibilities to increase the amounts of the fines that may be levied and to make it clear that in some cases prison sentences will be imposed This collection of essays describes and analyzes the legal regimes governing directors liability for corporate fault and default across eleven important trading jurisdictions It asks Are the reform provisions especially director duties of due diligence sharply enough aimed to attain the goal of corporate accountability Will it be easy or difficult for defendants to establish that due diligence was exercised Is it possible that more reliance on self policing may lead to less documenting and reporting of wrongs and dangers What impact may schemes of greater self monitoring have on State regulation In what ways might corporations react to these demands that they become guardians of the public weal The authors each an authority in his or her respective jurisdiction recognize that the reforms are a reaction to the political problems created by the ill fit of the corporation with the economic and political value systems that we purport to hold dear As they survey the ways that vibrant economies can frame laws to influence the conduct of directors and companies they invite further exploration into the political economic practical and evolutionary factors that may explain the convergence and divergence of both statute law and judicial doctrines and the desirability or inevitability of this deeply significant trend
