Money Rx For Physicians:

Our Daily Meds Melody Petersen, 2025-06-25 In the last thirty years the big pharmaceutical companies have transformed themselves into marketing machines selling dangerous medicines as if they were Coca Cola or Cadillacs They pitch drugs with video games and soft cuddly toys for children promote them in churches and subways at NASCAR races and state fairs They've become experts at promoting fear of disease just so they can sell us hope No question drugs can save lives But the relentless marketing that has enriched corporate executives and sent stock prices soaring has come with a dark side Prescription pills taken as directed by physicians are estimated to kill one American every five minutes And that figure doesn't reflect the damage done as the overmedicated take to the roads Our Daily Meds connects the dots for the first time to show how corporate salesmanship has triumphed over science inside the biggest pharmaceutical companies and in turn how this promotion driven industry has taken over the practice of medicine and is changing American life It is an ageless story of the battle between good and evil with potentially life changing consequences for everyone not just the 65 percent of Americans who unscrew a prescription cap every day An industry with the promise to help so many is now leaving a legacy of needless harm

and healthcare conglomerates In the two years since *Patients at Risk* debuted the employment of non physician practitioners has continued to skyrocket While advocates insist that nurse practitioners and physician assistants are just as good as physicians they are wrong Despite over fifty years of scientific analysis there is no conclusive evidence that non physicians can provide safe and effective medical care without physician oversight In fact recent studies have shown the opposite that the replacement of physicians puts patients at risk The only cure for today s healthcare crisis is for patients to become informed about who is providing their care We must all know the difference in clinician education and training and demand answers from those who would deprive us of physician led care

REVIEWS and WORDS OF PRAISE This book is well written richly researched and scientifically based *Imposter Doctors* explains how scope expansion has been facilitated by the corporatization of American medicine and exposes the fallacy of NP PA and physician equivalency It is a must read for anyone concerned about our nation s healthcare system Susan Rudd Bailey MD Past President American Medical Association

Another frank and hard hitting discussion from the author of *Patients at Risk* While some will likely dismiss this book as aiming to protect the status quo in healthcare I sincerely hope it creates important conversations about training qualifications transparency and public safety L Allen Dobson Jr MD FAAFP Editor in Chief Medical Economics This follow up book to *Patients at Risk* articulates the desperate need for reform to the healthcare system to re insert physicians as the ultimate decision maker for the sake of patient care After reading this book one must ask will a physician be available to care for me and my family when the need arises Linda Lambert FAAMSE
