Exchange Rate Arrangements and Monetary Policy International Monetary Fund, 1988-01-01 This paper examines the relationship between monetary and exchange rate policies by considering the factors that have led the authorities in developed and developing countries in Asia to alter their use of monetary policy instruments and exchange rate arrangements since the mid 1970s There is first consideration of the extent to which real and monetary shocks country size and the degree of goods and capital market integration can explain the evolution of exchange rate arrangements There is then an examination of the factors influencing the choice of money and credit policy instruments Finally there is a discussion of integrating monetary and exchange policies with extensive trade and financial market reforms

Interdisciplinary Economics Wilfred Dolfsma, Stefan Kesting, 2013-07-18 Kenneth Boulding was a prolific writer across so many different fields that not only is he often much referred to and cited he is considered a core member of many of these fields Boulding is the quintessential interdisciplinary scholar He died in 1993 but he has left a legacy in economics conflict studies systems theory ecology biology communication studies and ethics As an economist proper he has tested and expanded the boundaries of that field without unduly invading and undermining the expertise and established knowledge of

the other social sciences This proposed volume will allow scholars who have worked or are starting to work in areas that Boulding has initiated established and made a continued contribution to to understand the links between these fields and other related ones The volume will establish a source of inspiration for some time to come The Credit-Anstalt Crisis of 1931 Aurel Schubert,1991 Shubert analyses the impact of the Austrian 1931 financial crisis on Europe and the Great Depression by analysing it using theories of financial crises identifying the causes of the crisis and examining the market s efficiency in predicting events He also analyses how the crisis was transmitted to the real sector and studies the behaviour of the Austrian as well as international authorities National Management of International Economy M. Evaluating Policy Regimes Ralph Bryant,Peter Hooper,Catherine L. Mann,2010-12-01 Economists have long debated the theoretical merits for an individual nation and for a multi nation world economy of alternative approaches to the conduct of economic policy Yet theory alone cannot resolve the important issues at stake Only after the robustness of policy regimes has been carefully examined with empirical evidence will policymakers and economists be able to reach more of a consensus This pathbreaking volume takes major steps forward in meeting the need for a combination of theoretical and empirical evaluations of alternative policy regimes Bringing together individuals and groups doing pioneering research on macroeconomic interaction it explores what approach to monetary policy would lead to superior performance by individual national economies and the world economy as a whole Many parts of the book use the analytical techniques of stochastic simulation an evaluation procedure increasingly employed at the frontier of empirical economic analysis The book provides a summary of the key issues involved in evaluating policy regimes and clarifies the relationships among those issues The authors examine the stabilization properties of alternative monetary policy regimes and analyze how well various regime types perform in the face of unexpected shocks to national economies Among their conclusions they find that some simplified regimes for monetary policy are markedly less promising than others for achieving the stabilization objectives commonly sought by policymakers Evaluating Policy Regimes is another major installment in a continuing world wide research project sponsored by the Brookings Institution to improve empirical knowledge about the interdependence of national economies

Export Dependence versus the New Protectionism Glenn Randall Fong, 2017-10-10 In an international political economy characterised both by constancy and change this study first published in 1996 links together one seemingly incongruous continuity in international trade relations with an increasingly dramatic development in the economies of industrial countries On the one hand industrialised countries have become progressively dependent upon one another On the other hand the liberal international trade regime has yet to falter These two points are tied together by seeking to explain the maintenance of liberal trade relations in terms of the mutual economic dependence of industrial countries In particular the study examines what may be a fundamental constraint on trade protectionism today the reliance of industrialised countries on external trade relations and especially on markets within the industrial world

The Interdependence of Nations Robert Solomon, Anne Gault, 1977

The Group of Seven Andrew Baker, 2006-05-09 We are now in the era of the G8 although the G7 still exists as a grouping for Finance Ministers Why do G7 finance ministries and central banks co operate What are the implications of this co operation for US power and the abilities of the other six states to exercise leadership What role do the G7 play in global financial governance How much authority do they possess and how is that authority exercised This is the first major monograph on the political economy of G7 finance ministry and central bank co operation It argues that to understand the contribution of the G7 to global financial governance it is necessary to locate the process in the context of a wider world financial order comprised of decentralized globalization It

also provides original case study material on the G7's contribution to macroeconomic governance and to debates on the global financial architecture over the last decade. It assesses the G7's role in producing a system of global financial governance based on market supremacy and technocratic transgovernmental consensus and articulates normative criticisms of the G7's exclusivity. For researchers in the fields of IR, IPE, generally postgraduate students in the field of international organization and global governance, policy makers and financial journalists, this is the most extensive analysis of the G7 and the political economy of global financial governance to date.

The New Public Finance Inge Kaul, Pedro Conceicao, 2006-02-23

The world's agenda of international cooperation has changed. The conventional concerns of foreign affairs, international trade and development assistance are increasingly sharing the political center stage with a new set of issues. These include trans-border concerns such as global financial stability and market efficiency, risk of global climate change, bio-diversity conservation, control of resurgent and new communicable diseases, food safety, cyber crime and e-commerce, control of drug trafficking and international terrorism and weapons of mass destruction. Globalization and increasing porosity of national borders have been key driving forces that have led to growing interdependence and interlocking of the public domains and therefore public policy concerns of countries, governments, private businesses, civil society and people at large. Thus new and different issues are now occupying top places on national policy agendas and consequently on the agendas of international negotiating forums. The policy approaches to global challenges are also changing. A proliferation and diversification of international cooperation efforts include focus on financing arrangements. Financing of international cooperation in most instances is a haphazard and non-transparent process and often seems to run parallel to international negotiations. There are many unfunded mandates and many non-mandatory funds. To agree on and to achieve international economic goals we need to understand how financing of international cooperation efforts actually works. Our understanding is hampered by two gaps: 1. lack of an integrated and cohesive theoretical framework; 2. lack of consolidated empirical and operational knowledge in the form of a comprehensive inventory of past, current and possible future, i.e. currently deliberated financing mechanisms. This book reduces these two gaps and provides a guide to improve our ability to finance international cooperation.
