## **Mongolia Mineral Mining Sector Investment And Business Guide World Business Investment And Government Library:**

The Limits of Law and Development Sam Adelman, Abdul Paliwala, 2020-08-13 The book examines the well established field of law and development and asks whether the concept of development and discourses on law and development have outlived their usefulness The contributors ask whether instead of these amorphous and contested concepts we should focus upon social injustices such as patriarchy impoverishment human rights violations the exploitation of indigenous peoples and global heating If we abandoned the idea of development would we end up adopting another equally problematic term to replace a concept which for all its flaws serves as a commonly understood shorthand The contributors analyse the links between conventional academic approaches to law and development neoliberal governance and activism through historical and contemporary case studies The book will be of interest to students and scholars of development international law international economic law governance and politics and international relations

Transnational Law and State Transformation Jennifer Lander, 2019-11-07 This book contributes new theoretical insight and in depth empirical analysis about the relationship between transnational legality state change and the globalisation of markets The role of transnational economic law in influencing and reorganising national systems of governance evidences the constitutional dimensions of global capitalism the power to institute new rules and limits for national states This form of new constitutionalism does not undermine the state but transforms it by eroding national capacities and implanting global alternatives While leading scholars in the field have emphasised the much needed value of case studies there are no studies available which consider the cumulative impact of multiple axes of transnational legal ordering on the national state or its constitution This monograph addresses this empirical gap whilst expanding the theoretical scope of the field Mongolia's recent transformation as a mineral exporting country provides a rare opportunity to witness economic and legal globalisation in process Based on careful empirical analysis of national law and policy making the book traces the way distinctive processes of transnational legal ordering have reorganised and reframed the governance of Mongolia's mining sector specifically by redistributing state power in relation to the market sub national administrations and civil society The book investigates the role of international financial institutions multinational corporations and non governmental organisations in normative transmission as well as the critical role of national actors in embedding transnational investment norms within the domestic legal and policy environment As the book demonstrates however the constitutional ramifications of transnational legal ordering extend beyond the mining regime itself into more fundamental questions of the trajectory of state transformation institutionally and ideologically The book will be of interest to scholars of international law global governance and the political economy of development
