Monitor Chronicles One Sailors Account Todays Campaign To Recover The Civil War Wreck:

The Monitor Chronicles William Marvel,2000 Historical text largely based on and including Civil War letters written by George Geer **Mr. Lincoln's High-tech War** Thomas B. Allen,Roger MacBride Allen,2009 Shows the part technology played in the North winning the Civil War over the South and how Lincoln appreciated technology after awhile Clad in Iron Howard J. Fuller,2007-12-30 This work addresses many persistent misconceptions of what the monitors were for and why they failed in other roles associated with naval operations of the Civil War such as the repulse at Charleston April 7 1863 Monitors were ironclads not fort killers Their ultimate success is to be measured not in terms of spearheading attacks on fortified Southern ports but in the quieter much more profound strategic deterrence of Lord Palmerston s ministry in London and the British Royal Navy s potential intervention The relatively unknown Cold War of the American Civil War was a nevertheless crucial aspect of the survival or not of the United States in the mid 19th century Foreign intervention explicitly in the form of British naval power represented a far more serious threat to the success of the Union blockade the safety of Yankee merchant shipping worldwide and Union combined operations against the South than the Confederate States Navy Whether or not the North or South would be clad in iron thus depended on the ability of superior Union ironclads to deter the majority of mid Victorian British leaders otherwise tempted by their desire to see the American experiment in democratic class structures and popular government finally fail Discussions of open European involvement in the Civil War were pointless as long as the coastline of the United States was virtually impregnable Combining extensive archival research on both sides of the Atlantic this work offers an in depth look at how the Union Navy achieved its greatest grand strategic victory in the American Civil War Through a combination of high tech machines armed with monster guns intensive coastal fortifications and a new fleet of high speed Union commerce raiders the North was able to turn the humiliation of the Trent Affair of late 1861 into a sobering challenge to British naval power and imperial defense worldwide *From the Mountains to the Bay* Ethan S. Rafuse,2022-12-09 From January to July of 1862 the armies and navies of the Union and Confederacy conducted an incredibly complex and remarkably diverse range of operations in the Commonwealth of Virginia Under the direction of leaders like Thomas Stonewall Jackson George McClellan Joseph E Johnston John Rodgers Robert E Lee Franklin Buchanan Irvin McDowell and Louis M Goldsborough men of the Union and Confederate armed forces marched over mountains and through shallow valleys maneuvered on and along great tidal rivers bridged and waded their tributaries battled malarial swamps dug trenches and constructed fortifications and advanced and retreated in search of operational and tactical advantage In the course of these operations the North demonstrated it had learned quite a bit from its setbacks of 1861 and was able to achieve significant operational and tactical success on both land and sea This enabled Union arms to bring a considerable portion of Virginia under Federal control in some cases temporarily and in others permanently Indeed at points during the spring and early summer of 1862 it appeared the North just might succeed in bringing about the defeat of

the rebellion before the year was out A sweeping study of the operations on land and sea From the Mountains to the Bay is the only modern scholarly work that looks at the operations that took place in Virginia in early 1862 from the Romney Campaign that opened the year to the naval engagement between the Monitor and Merrimac to the movements and engagements fought by Union and Confederate forces in the Shenandoah Valley on the York James Peninsula and in northern Virginia as a single comprehensive campaign Rafuse draws from extensive research in primary sources to provide a fast paced complete account of operations throughout Virginia while also incorporating findings of recent scholarship on the factors that shaped these campaigns The work provides invaluable insights into the factors and individuals who shaped these operations how they influenced the course of the war the relationships between political leaders and men in uniform and how all these factors affected the development and execution of strategy operations and tactics

A Rainbow of Blood Peter G. Tsouras, 2010 Do you know what military glory is It is that attractive rainbow that rises in showers of blood that serpent s eye that charms to destroy Abraham Lincoln The Union in dire peril The war that began in Peter G Tsouras s previous alternate history Britannia s Fist accelerates during a few desperate weeks in October 1863 From the bayous of Louisiana to the green hills of the Hudson Valley from Chicago in flames to the gates of Washington itself the Great War uncoils in ropes of fire French and British armies are on the march and heavy reinforcements have put to sea Copperheads have risen in revolt to drag the Midwest into the Confederacy as a vital Union army stands starving and under siege in Tennessee Meanwhile Robert E Lee and the Royal Navy set in motion a stroke that is boldness itself The Union staggers under these blows While the Grenadier Guards march into glory in upstate New York s apple orchards from the second story of a shot up Washington hotel Abraham Lincoln watches a forest of the red flags of rebellion waving over a Confederate column rushing across the Long Bridge To stop them is a war worn regiment of New York soldiers To their backs Washington burns But new technologies and the art of intelligence are thrown onto the scales while Russia plans to enter the war to avenge its humiliation in the Crimean War A Rainbow of Blood brings forward the Great War from its outbreak to the first great crisis of the embattled republic Peopled with remarkable personalities of the age the book rattles with the tramp of armies marching down one of the most intriguing roads not taken or even imagined until now

The Civil War on the Mississippi Barbara Brooks Tomblin, 2016-06-14 The naval historian presents a well written fast paced study of Civil War riverine combat based on the personal accounts of officers and sailors Civil War News As one of the most important transportation systems in the country the Mississippi River became a strategically vital asset to both sides of the Civil War The Confederacy relied on the river for cotton exportation as well as food and military supplies The Union sought control of the river not only to disrupt Southern transport but also to bisect the South as part of the Anaconda Plan Drawing heavily on the diaries and letters of officers and common sailors Barbara Brooks Tomblin explores the Union navy s fight to win control of the Mississippi Her approach provides fresh insight into major battles such as Memphis and Vicksburg as well as the fascinating perspectives of ordinary sailors who engaged in brown water warfare These men speak of going ashore in foraging parties assisting the surgeon in the amputation of a fellow crewman s arm and liberating supplies of whiskey from captured enemy vessels They also offer candid assessments of their commanding officers observations of the local people living along the river and their views on the war The Civil War on the

Mississippi provides a comprehensive account of the action on the western rivers as well as a synthesis of vivid first person accounts from the front lines "Our Little Monitor" Anna Gibson Holloway,Jonathan W. White,2017 On March 9 1862 the USS Monitor and CSS Virginia met in the Battle of Hampton Roads the first time ironclad vessels would engage each other in combat For four hours the two ships pummeled one another as thousands of Union and Confederate soldiers and civilians watched from the shorelines Although the battle ended in a draw this engagement would change the nature of naval warfare by informing both vessel design and battle tactics The wooden walls of navies around the world suddenly appeared far more vulnerable and many political and military leaders initiated or accelerated their own ironclad building programs Americans did not initially have much faith in the Monitor Few believed that this strange little vessel could hold her own against the formidable Confederate ironclad Virginia which had been built on the bones of the scuttled USS Merrimack in Portsmouth Virginia The Virginia seemingly relentless and unstoppable had ravaged the U S Navy in Hampton Roads on March 8 just before the Monitor arrived Yet the following day the cheesebox on a raft proved her Union mettle becoming a national hero in her own right For the remainder of the Civil War the Union Navy used dozens of monitor style vessels on inland waters as well as at sea But there would always be only one first Monitor and she became affectionately known to many throughout the nation as Our Little Monitor Her loss off Cape Hatteras on December 31 1862 was mourned as keenly in the press as the loss of 16 of her men that night Using the latest archaeological finds from the USS Monitor Center in Newport News Virginia as well as untapped archival material Anna Gibson Holloway and Jonathan W White bring Our Little Monitor to life once more in this beautifully illustrated volume In addition to telling her story from conception in 1861 to sinking in 1862 as well as her recent recovery and ongoing restoration they explain how fighting in this new machine changed the experience of her crew and reveal how the Monitor became the pet of the people a vessel celebrated in prints tokens and household bric a brac a marketing tool and a prominent feature in parades Sanitary Fairs and politics
