Monkey Hunting:

Monkey Hunting Cristina García, 2007-12-18 In this deeply stirring novel acclaimed author Cristina García follows one extraordinary family through four generations from China to Cuba to America. Wonderfully evocative of time and place, rendered in the lyrical prose that is García's hallmark, *Monkey Hunting* is an emotionally resonant tale of immigration, assimilation, and the prevailing integrity of self.

Herding Monkeys to Paradise John Knight, 2011-05-27 This book is a study of the use of monkeys as a tourist attraction in Japan. Monkey parks are popular visitor attractions that display free-ranging troops of Japanese macaques to the paying public. The parks work by manipulating the movements of the monkey troop through the regular provision of food handouts at a fixed site where the monkeys can be easily viewed. This system of management leads to a variety of problems, including proliferating monkey numbers, park edge crop raiding, and the sedentarization of the troop. In addition to falling visitor numbers, these problems have led to the closure or fencing in of many parks, calling into question the future of the monkey park as an institution.

Monkey Hunting Cristina García, 2004-04-27 In this deeply stirring novel, acclaimed author Cristina García follows one extraordinary family through four generations from China to Cuba to America. Wonderfully evocative of time and place, rendered in the lyrical prose that is García's hallmark, *Monkey Hunting* is an emotionally resonant tale of immigration, assimilation, and the prevailing integrity of self.

The Monkey as Mirror Emiko Ohnuki-Tierney, 2020-12-08 This tripartite study of the monkey metaphor, the monkey performance, and the special status people traces changes in Japanese culture from the eighth century to the present. During early periods of Japanese history, the monkey's nearness to the human-animal boundary made it a revered mediator or an animal deity closest to humans. Later, it became a scapegoat, mocked for its vain efforts to behave in a human fashion. Modern Japanese have begun to see a new meaning in the monkey: a clown who turns itself into an object of laughter while challenging the basic assumptions of Japanese culture and society.

The Land Within Pedro García Hierro, 2005 By describing the fabric of relationships indigenous peoples weave with their environment, *The Land Within* attempts to define a more precise notion of indigenous territoriality. A large part of the work of titling the South American indigenous territories may now be completed, but this book aims to demonstrate that, in addition to management, these territories involve many other complex aspects that must not be overlooked if the risk of losing these areas to settlers or extraction companies is to be avoided. Alexandre Surralls holds a doctorate in anthropology from the School for Higher Studies in Social Sciences and is a researcher on the staff of the National Centre for Scientific Research. Pedro García Hierro is a lawyer from Madrid Complutense University and the Pontifical Catholic University of Peru. He has worked with various indigenous organizations on issues related to the identification and development of collective rights and the promotion of intercultural democratic reforms.

Primates Face to Face Agustín Fuentes, Linda D. Wolfe, 2002-01-17 As our closest evolutionary relatives, nonhuman primates are integral elements in our mythologies, diets, and scientific paradigms, yet most species now face an

uncertain future through exploitation for the pet and bushmeat trades as well as progressive habitat loss New information about disease transmission dietary and economic linkage and the continuing international focus on conservation and primate research have created a surge of interest in primates and focus on the diverse interaction of human and nonhuman primates has become an important component in primatological and ethnographic studies By examining the diverse and fascinating range of relationships between humans and other primates and how this plays a critical role in conservation practice and programs *Primates Face to Face* disseminates the information gained from the anthropological study of nonhuman primates to the wider academic and non academic world

The Monkey Wars Deborah Blum, 1995-12-14 The controversy over the use of primates in research admits of no easy answers We have all benefited from the medical discoveries of primate research vaccines for polio rubella and hepatitis B are just a few But we have also learned more in recent years about how intelligent apes and monkeys really are they can speak to us with sign language they can even play video games and are as obsessed with the games as any human teenager And activists have also uncovered widespread and unnecessarily callous treatment of animals by researchers in 1982 a Silver Spring lab was charged with 17 counts of animal cruelty It is a complex issue made more difficult by the combative stance of both researchers and animal activists In *The Monkey Wars* Deborah Blum gives a human face to this often caustic debate and an all but human face to the subjects of the struggle the chimpanzees and monkeys themselves Blum criss crosses America to show us first hand the issues and personalities involved She offers a wide ranging informative look at animal rights activists now numbering some twelve million from the moderate Animal Welfare Institute to the highly radical Animal Liberation Front a group destructive enough to be placed on the FBI's terrorist list And she interviews a wide variety of researchers many forced to conduct their work protected by barbed wire and alarm systems men and women for whom death threats and hate mail are common She takes us to Roger Fouts's research center in Ellensburg Washington where we meet five chimpanzees trained in human sign language and we visit LEMSIP a research facility in New York State that has no barbed wire no alarms and no protesters chanting outside because its director Jan Moor Jankowski listens to activists with respect and treats his animals humanely And along the way Blum offers us insights into the many side issues involved the intense battle to win over school kids fought by both sides and the danger of transplanting animal organs into humans As it stands now Blum concludes the research community and its activist critics are like two different nations nations locked in a long bitter seemingly intractable political standoff But if you listen hard there really are people on both sides willing to accept and work within the complex middle When they can be freely heard then we will have progressed to another place beyond this time of hostilities In *The Monkey Wars* Deborah Blum gives these people their voice

African Rain Forest Ecology and Conservation William Weber, Lee J. T. White, Lisa Naughton-Treves, Amy Vedder, 2001-01-01 Extending from west Africa to Madagascar from the vast lowland Congo Basin to the archipelago of forest islands on its eastern rim the African rain forest is surpassed in size only by the Amazon This book

sheds light on the current efforts to understand and conserve the African rain forest an area in need of urgent action to save its biological wealth cultural heritage and economic potential Written by conservation scientists and practitioners based in the African rain forest the book offers a multidisciplinary perspective that integrates many biological and social sciences Early chapters trace the forces from paleoecological factors to recent human actions that have shaped the African forest environment The next chapters discuss the dominant biological patterns of species ranging from the distinctive elephants gorillas and okapi to the less well known birds butterflies and amphibians Other chapters focus on how such different groups as hunter gatherers forest farmers bushmeat hunters recent immigrants and commercial foresters have used the forests Several authors stress the need for tighter links between research and conservation action The final section draws lessons from the collective experience of those working in an Africa wracked by political strife and economic hardship

Kinship with Monkeys Loretta A. Cormier,2003 How can monkeys be both eaten as food and nurtured as children Her research reveals that monkeys play a vital role in Guaja society ecology economy and religion In Guaja animistic beliefs all forms of plant and animal life especially monkeys have souls and are woven into a comprehensive kinship system

Nationhood and Improvised Belief in American Fiction Ann Genzale,2021-01-15 Nationhood and Improvised Belief in American Fiction highlights the ways religious belief and practice intersect with questions of national belonging in the work of major contemporary writers Through readings of novels by Louise Erdrich Toni Morrison Cristina Garc a and others this book argues that the representations of syncretic culturally hybrid and improvised forms of religious practice operate in these novels as critiques of exclusionary constructions of national identity providing models for alternate ways of belonging based on shared religious beliefs and practices Rather than treating the religious history of the U S as one of increasing secularization this book instead calls for greater attention to the diversity of religious experience in the U S as well as a deeper understanding of the ways in which these experiences can inform relationships to the national community

Seasonality in Primates Diane K. Brockman, Carel P. van Schaik, 2005-11-17 The emergence of the genus *Homo* is widely linked to the colonization of new highly seasonal savannah habitats. However, until recently, our understanding of the possible impact of seasonality on this shift has been limited because we have little general knowledge of how seasonality affects the lives of primates. This book documents the extent of seasonality in food abundance in tropical woody vegetation and then presents systematic analyses of the impact of seasonality in food supply on the behavioural ecology of non-human primates. Syntheses in this volume then produce broad generalizations concerning the impact of seasonality on behavioural ecology and reproduction in both human and non-human primates and apply these insights to primate and human evolution. Written for graduate students and researchers in biological anthropology and behavioural ecology, this is an absorbing account of how seasonality may have affected an important episode in our own evolution. **Handbook of Paleoanthropology** Winfried Henke, Ian Tattersall, 2007-05-10 This 3-volume handbook brings together contributions by the world's leading specialists that reflect the broad spectrum of modern palaeoanthropology, thus presenting an indispensable resource for professionals and students alike. Vol 1 reviews principles, methods and approaches, recounting recent advances and state of the art knowledge in phylogenetic analysis, palaeoecology and evolutionary theory and philosophy. Vol 2 examines primate origins, evolution, behaviour and adaptive variety, emphasizing integration of fossil data with contemporary knowledge of the behaviour and ecology of living primates in natural environments. Vol 3 deals with fossil and molecular evidence for the evolution of *Homo sapiens* and its fossil relatives. **Spider Monkeys** Christina J. Campbell, 2008-09-25 Spider monkeys are one of the most widespread New World primate genera, ranging from southern Mexico to Bolivia. Although they are common in zoos, spider monkeys are traditionally very difficult to study in the wild because they are fast-moving, live high in the canopy and are almost always found in small subgroups that vary in size and composition throughout the day. This book is an assimilation of both published and previously unpublished research. It is a comprehensive source of information for academic researchers and graduate students interested in primatology, evolutionary anthropology and behavioral ecology, and covers topics such as taxonomy, diet, sexuality and reproduction and conservation. **Primate Research and Conservation in the Anthropocene** Alison M. Behie, Julie A. Teichroeb, Nicholas Malone, 2019-01-31 Combining personal stories of motivation with new research, this book offers a holistic picture of primate conservation in the Anthropocene. *Kings of the Forest* Jana Fortier, 2009-04-30 In today's world, hunter-gatherer societies struggle with seemingly insurmountable problems: deforestation and encroachment, language loss, political domination by surrounding communities. Will they manage to survive? This book is about one such society living in the monsoon rainforests of western Nepal: the Raute. *Kings of the Forest* explores how this elusive ethnic group, the last hunter-gatherers of the Himalayas, maintains its traditional way of life amidst increasing pressure to assimilate. Author Jana Fortier examines Raute social strategies of survival as they roam the lower Himalayas, gathering wild yams and hunting monkeys. Hunting is part of a symbiotic relationship with local Hindu farmers.

who find their livelihoods threatened by the monkeys raids on their crops Raute hunting helps the Hindus who consider the monkeys sacred and are reluctant to kill the animals themselves Fortier explores Raute beliefs about living in the forest and the central importance of foraging in their lives She discusses Raute identity formation nomadism trade relations and religious beliefs all of which turn on the foragers belief in the moral goodness of their unique way of life The book concludes with a review of issues that have long been important to anthropologists among them biocultural diversity and the shift from an evolutionary focus on the ideal hunter gatherer to an interest in hunter gatherer diversity Kings of the Forest will be welcomed by readers of anthropology Asian studies environmental studies ecology cultural geography and ethnic studies It will also be eagerly read by those who recognize the critical importance of preserving and understanding the connections between biological and cultural diversity

Simply, Jim Jerry Hall,2014-12-26 Simply Jim is the story of the early years of Jim Simply growing up in rural Alabama Jim is thought to be slow mentally because he is quiet bordering on being shy He is thought to be a problem because of his slowness by his first grade school teacher He is a tag along to his older brothers and his dad In groups where others are talking but no one could remember what was said five minutes later Jim remembers what was said who had said it and the context of what was said He is very smart but lacks the social manners to fit in Jim is mentored in baseball by his elementary school principal His natural ability developed by throwing rocks on his farm and influenced by his mentor helped him to become a phenomenal pitcher sought by college and pro teams Jim is a hard luck type because most of the people with whom he has a close relationship dies moves away or suffers maladies causing him to suffer in silence and persevere through loss and disappointment His mother died in his early years His mentor died early and his father died before he is able to fulfill his baseball goals His brothers and childhood acquaintances moved away His only positive influences are Joe an older ninety seven year old man his uncle John and his childhood sweetheart Julie Jim has so much tragedy in his life but is on the verge of fantastic things happening to him

Primate Conservation Prince Rainer III,2012-12-02 Primate Conservation provides a comprehensive discussion of the conservation of many species of nonhuman primates The problems of conservation are discussed by distinguished scientists who are experts in their knowledge of the animals they write about and who have firsthand knowledge of the problems of conserving them Animals ranging from Galago to the Gorilla have been selected to serve as examples of the types of problems that conservationists face The book begins by discussing the ecology of two species of galagine in South Africa It covers factors such as their distribution habitat population densities activity patterns feeding group structure and reproduction This is followed by separate chapters on the conservation of the following aye aye the lion tamarins of Brazil the Peruvian yellow tailed woolly monkey the toque macaque of Sri Lanka rare lion tailed monkey of South India rhesus monkeys in Northern India the gelada baboons the hanuman langur and douc langur red ouakaris black colobus monkeys lesser apes and eastern gorillas

Waiting for Wolves in Japan John Knight,2003 A Japanese conservationist group has launched a campaign for the reintroduction of the wolf in

Japan arguing that the wolf would be the savior of upland areas of Japan which are suffering from wildlife pestilence This book examines the reintroduction proposal by drawing on ethnographic fieldwork in one of the candidate areas and shows that conflicts with wildlife are inextricably bound up with social conflict among people and that wildlife pestilence must therefore be understood in terms of its symbolic as well as material dimensions
