

Monkeys & Apes

My learning goal:

To recognise the difference between fact and opinion statements

My tools:

A **fact** is true and can be backed up by evidence. An **opinion** is something you believe or feel to be true but it can't actually be proven.

Monkeys have tails – This is a **fact**.

A chimpanzee would make a great pet – This is my **opinion**.

Find 4 facts in your story and write them on the monkey cards. On the other 2 cards write your opinion about something in your book.

Cut the cards out and read them to a friend. Ask them to tell you whether each card is a fact or an opinion.

Reading Victorian Deafness Jennifer Esmail, 2013-04-15 Reading Victorian Deafness is the first book to address the crucial role that deaf people and their unique language of signs played in Victorian culture Drawing on a range of works from fiction by Charles Dickens and Wilkie Collins to poetry by deaf poets and life writing by deaf memoirists Harriet Martineau and John Kitto to scientific treatises by Alexander Graham Bell and Francis Galton Reading Victorian Deafness argues that deaf people's language use was a public influential and contentious issue in Victorian Britain The Victorians understood signed languages in multiple and often contradictory ways they were objects of fascination and revulsion were of scientific import and literary interest and were considered both a unique mode of human communication and a vestige of a bestial heritage Over the course of the nineteenth century deaf people were increasingly stripped of their linguistic and cultural rights by a widespread pedagogical and cultural movement known as oralism comprising mainly hearing educators physicians and parents Engaging with a group of human beings who used signs instead of speech challenged the Victorian understanding of humans as the speaking animal and the widespread understanding of language as a product of the voice It

is here that Reading Victorian Deafness offers substantial contributions to the fields of Victorian studies and disability studies This book expands current scholarly conversations around orality textuality and sound while demonstrating how understandings of disability contributed to Victorian constructions of normalcy Reading Victorian Deafness argues that deaf people were used as material test subjects for the Victorian process of understanding human language and by extension the definition of the human

The Aesop's Fable Paradigm K. Brandon Barker,Daniel J. Povinelli,2021-12-07 The Aesop s Fable Paradigm is a collection of essays that explore the cutting edge intersection of Folklore and Science From moralizing fables to fantastic folktales humans have been telling stories about animals animals who can talk feel think and make moral judgments just as we do for a very long time In contrast scientific studies of the mental lives of animals have professed to be investigating the nature of animal minds slowly cautiously objectively with no room for fanciful tales fables or myths But recently these folkloric and scientific traditions have merged in an unexpected and shocking way scientists have attempted to prove that at least some animal fables are actually true These interdisciplinary chapters examine how science has targeted the well known Aesop s fable The Crow and the Pitcher as their starting point They explore the ever growing set of experimental studies which purport to prove that crows possess an understanding of higher order concepts like weight mass and even Archimedes insight about the physics of water displacement The Aesop s Fable Paradigm explores how these scientific studies are doomed to accomplish little more than to mirror anthropomorphic representations of animals in human folklore and reveal that the problem of folkloric projection extends far beyond the Aesop s Fable Paradigm into every nook and cranny of research on animal cognition
