

The background of the entire image is a misty, atmospheric forest. Tall, slender trees with dark trunks and dense foliage are visible, their forms softened by a thick, pale fog. In the center of the image, slightly below the title, a pair of bright, white, oval-shaped eyes glows from the mist, staring directly at the viewer. The overall color palette is dominated by cool blues, greys, and greens, creating a chilling and mysterious mood.

Turandot's Sisters Christine Goldberg, 2019-06-03 There are a number of outstanding dissertations in folklore which warrant a wider readership and which belong in the library of any educational institution or individual with a serious interest in folklore A few of these are in fact already well known to professional folklorists who may have bothered to send for them through inter library loan or in more recent times purchased copies from University Microfilms International in Ann Arbor

Michigan However it should be noted that not all dissertations are available through UMI The appearance for selected folklore dissertations and theses both old and new in the Folklore Library series will make it much easier for libraries and individuals to obtain these significant studies Among the most important hitherto unpublished folklore dissertations are such works as motif and or tale type indices historic geographic comparative in depth studies of single folktales or ballads and surveys of specialized folklore scholarship e g of a particular country or group There are in addition valuable filed collections of folklore data to be found in dissertations First published in 1993 Routledge is an imprint of Taylor Francis an informal company

Tale Colin Speedie,2021-06-08 There are few marine creatures as spectacular as the Basking Shark At up to 11 metres in length and seven tonnes in weight this colossal plankton feeding fish is one of the largest in the world second only to the whale shark Historically Basking Sharks were a familiar sight in the northern hemisphere off the coasts of Norway Scotland Ireland Canada and the USA for example In an 18th Century world without electricity they became the focus of active hunting for their huge livers containing large amounts of valuable oil primarily used in lamps Catch numbers were small enough to leave populations largely intact but during the 20th Century a new breed of hunter joined the fray some driven as much by a need for adventure as for financial gain With improved equipment and experience they exploited the shark on an industrial scale that drastically reduced numbers leading to localised near extinction in some areas From the 1970 s onward a new generation took to the seas this time with conservation in mind to identify where the shark might still be found in the waters around the British Isles employing new technologies to solve long standing mysteries about the behaviour of this elusive creature Using the best of both old and new research techniques the case was built to justify the species becoming one of the most protected sharks in the oceans Today the Basking Shark is a much loved cornerstone of our natural heritage There are positive signs that the population has stabilised and may even be slowly recovering from the damage of the past proving that timely conservation measures can be effective Join us on a journey amidst wild seas places people and conservation history in the battle to protect this iconic creature a true sea monster s tale **The Types of the Folk-tale**

of origin Fairy Tale Science looks at the birth of the literary fairy tale in the context of early modern discourses on the monstrous and explains how scientific discourse and literary theories of the marvellous limited the genre's success on its native soil Suzanne Magnanini argues that men of science positioned the fairy tale in opposition to science and fixed it as a negative pole in a binary system This system came to define both a new type of scientific inquiry and the nascent literary genre Magnanini also suggests that by adopting theories of the monstrous as metaphors for their own literary production Straparola and Basile aligned the literary fairy tale the feminine and the monstrous and essentially marginalized the new genre Fairy Tale Science expands our understanding of the early modern European imagination and investigates the complex interplay between scientific discourse and marvellous literature
