Pilauco: A Late Pleistocene Archaeo-paleontological Site Mario Pino, Giselle A. Astorga, 2019-07-26 This volume combines 10 years of accomplished research at the Pilauco site. The studies are focused on a variety of scientific areas including geological sedimentological geomorphological and paleobotanical topics as well as paleontology of vertebrata and invertebrata micropaleontology archaeology biochemistry taxonomy taphonomy astrophysics and the development of some particular touristic aspects. In 18 chapters a variety of authors describe the excavation and investigation of this unique location. The book presents Pilauco as an example for the natural laboratory which can be found in South America a testing ground for many of the hypotheses regarding migrations of animals and humans. In this context the study of topics such as the paleozoography the role of megafauna species for the architecture of the forests the animal extinctions or the early human settlements is extremely important on a global scale. The Pilauco site features paleontological and archaeological evidences and is contemporaneous with the Monte Verde site 15 000 cal yr AP. It is located 100 km north from Monte Verde and lies within the Intermediate Depression in northwestern Chilean Patagonia. It was discovered by chance in 1986 and has been excavated and investigated since 2007. Monte Verde: The archaeological context and interpretation Tom D.

Brunn, 2024-05-23 This book describes the journey concept relating to cultural and social history of Western and non Western worlds. By including time

journeys negotiated by women racial minorities artists and scholars from the humanities and social natural and physical scientists the book explores time space journeys in personal professional and cultural life and place experiences. The sixteen chapters in this book offer new insights into time place worlds in different contexts including history culture astronomy and science fiction. The concept is one where science and art worlds intersect in the emerging worlds of the unknown. With contributors from different disciplines and countries expanding our understanding of this concept this volume provides a valuable source for disciplinary and interdisciplinary classes and seminars exploring these scholarly frontiers.

Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book Radiocarbon Dating: An Archaeological Perspective. It covers the major advances and accomplishments of the

14C method in archaeology and analyzes factors that affect the accuracy and precision of 14C based age estimates In addition to reviewing the basic principles of the method it examines 14C dating anomalies and means to resolve them and considers the critical application of 14C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for 14C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record

Los Primeros Mexicanos Guadalupe Sánchez, 2016-02-11 This book presents a synthesis of Mexican Paleoindian archaeology with an emphasis on the state of Sonora The author uses extensive primary data concerning specific artifacts assemblages and other Mexican and Sonoran Paleoindian archaeology to demonstrate the insignificance of current international borders to the earliest peoples of North America Provided by publisher

Pendejo Cave Richard S. MacNeish,Jane G. Libby,Jane G. Liddy,2003 This account of the archaeology of a cave in southern New Mexico makes a dramatic contribution to the ongoing debate over how long human beings have lived in the Americas The findings presented here show that human settlement may go back as far as 75 000 years before the present whereas the long accepted Clovis dates showed humans only about 12 000 years ago MacNeish and his colleagues subjected the cave its environs and its contents to rigorous interdisciplinary investigation The first section of this volume comprises their reports on the changing environment of the area The second section concentrates on the excavation of the cave s layers presenting the results of radiocarbon dating and describing the evidence of human occupation including friction skin prints and human hair The third section discusses the cultural implications of the materials recovered and suggests how the ancient

peoples may have exploited the changing environment and developed different ways of life throughout the Americas before the time of Clovis man No serious discussion of early inhabitants in the New World can disregard the findings presented in this monumental work of scholarship **Holocene Hunter-Gatherers of the Lower Ohio River Valley** Richard Jefferies, 2008 Holocene Hunter Gatherers of the Lower Ohio River Valley addresses the approximately 7 000 years of the prehistory of eastern North America termed the Archaic Period by archaeologists Ancient Southeast Mesoamerica Patricia A. Urban, Edward M. Schortman, 2024-03-21 Ancient Southeast Mesoamerica explores the distinctive development and political history of the region from its earliest inhabitants up to the Spanish conquest It was composed of a matrix of social networks rather than divided by distinct cultures and domains Making use of the area s rich archaeological data Edward Schortman and Patricia Urban provide a social network analysis of southeast Mesoamerica They demonstrate how inhabitants from different locales were organized within such networks and how they mobilized the assets that they needed to define and achieve their own goals The also provide evidence for the actions of other groups who sought to promote their importance at local and regional scales and often opposed those efforts Schortman and Urban s study demonstrates the fresh insights gained from study of socio political structures via a social network perspective It also challenges models that privilege the influence of powerful leaders in shaping those structures *Vertebrate Biology* Donald W.
