Early Days in the Range of Light Daniel Arnold, 2011-01-01 A splendid chronicle of early climbing in the Sierra Nevada Royal Robbins It's 1873 Gore Tex shells and aluminum climbing gear are a century away but the high mountains still call to those with a spirit of adventure Imagine the stone in your hands and thousands of feet of open air below you with only a wool jacket to weather a storm and no rope to catch a fall Daniel Arnold did more than imagine he spent three years retracing the steps of his climbing forefathers and in Early Days in the Range of Light he tells their riveting stories From 1864 to 1931 the Sierra Nevada witnessed some of the most audacious climbing of all time In the spirit of his predecessors Arnold carried only rudimentary equipment no ropes no harness no specialized climbing shoes Sometimes he left his backpack and sleeping bag behind as well and like John Muir traveled for days with

only a few pounds of food rolled into a sack slung over his shoulder In an artful blend of history biography nature and adventure writing Arnold brings to life the journeys and the terrain traveled In the process he uncovers the motivations that drove an extraordinary group of individuals to risk so much for airy summits and close contact with bare stone and snow Ever wish you could travel back to climbing s early days and follow the earliest first ascent visionaries This fantasy comes to life in this elegant narrative Climbing Magazine **Mountaineering in the Sierra Nevada (1871).
