**Point and line to plane** Ulrich Rückriem, 2013

*Point and Line to Plane* Wassily Kandinsky, 2021 Point and Line to Plane volume 9 of the Bauhaus checker series can be seen as a continuation of Wassily Kandinsky's seminal treatise *On the Spiritual in Art* Kandinsky's thesis is that different constellations of point line and surface have different emotional effects on the viewer Starting from the point which represents the most concentrated and minimal graphic form he understands all painterly forms as being a play of forces and counterforces of contrasts Kandinsky's essay can be read as an aesthetic analysis of form and its effect on the viewer Based on the various effects of linear elements on our mood Kandinsky attempts to develop an order of form types Here he offers an approach to a theory of the effects of form which makes volume 9 one of the most important writings on art theory of the 20th century and it can still be understood as contemporary today

*The Art Theory of Wassily Kandinsky, 1909-1928* Christopher Short, 2010 Kandinsky's theory of art has usually been treated as little more than a guide to help our understanding of his paintings In contrast this book attends primarily to the artist's writings on art thus his art theory is treated on its own terms Drawing on the diverse literature that has been written on Kandinsky's art and theory the author demonstrates that while many different perspectives on his work have been identified none holds the key to that work Instead the book shows Kandinsky's method in his writings to be highly eclectic resulting in an exciting and challenging variety of content a description that also applies as a postscript to the book shows to his method in painting Kandinsky however transcended this diversity and consistently sought evidence of the unity of all things something that would be realised through his understanding of the term synthesis The book follows Kandinsky's fascinating attempts to establish synthesis not only in art but also in other disciplines including science mathematics law and politics in his key theoretical publications *On the Spiritual in Art* 1911 and *Point and Line to Plane* 1926 The result is a new and innovative understanding of both Kandinsky's art theory and his art

Hartel, Jr.,2018-02-21 This is the most thorough and detailed monograph on the artwork of Raymond Jonson He is one of many artists of the first half of the twentieth century who demonstrate the richness and diversity of an under appreciated period in the history of American art Visualizing the spiritual was one of the fundamental goals of early abstract painting in the years before and during World War I Artists turned to alternative spirituality the occult and mysticism believing that the pure use of line shape color light and texture could convey spiritual insight Jonson was steadfastly dedicated to this goal for most of his career and he always believed that modernist and abstract styles were the most effective and compelling means of achieving it      *Samuel Beckett's Critical Aesthetics* Tim Lawrence,2018-04-19 This book considers how Samuel Beckett s critical essays dialogues and reflections drew together longstanding philosophical discourses about the nature of representation and fostered crucial yet overlooked connections between these discourses and his fiction and poetry It also pays attention to Beckett s writing for little magazines in France from the 1930s to the 1950s before going on to consider how the style of Beckett s late prose recalls and develops figures and themes in his critical writing By providing a long overdue assessment of Beckett s work as a critic this study shows how Beckett developed a new aesthetic in knowing dialogue with ideas including phenomenology Kandinsky s theories of abstraction and avant garde movements such as Surrealism This book will be illuminating for students and researchers interested not just in Beckett but in literary modernism the avant garde European visual culture and philosophy      **Phenomenology and Historical Thought** Mark E. Blum,2022-08-22 The volume begins with what is in common to contemporary phenomenological historians and historiographers That is the understandings that temporality is the core of human judgment conditioning in its forms how we consciously attend and judge phenomena For every phenomenological historian or historiographer all history is an event a span of time This time span is not external to the individual rather forms the content and structure of every judgment of the person It is the logic used by the individual to structure the phenomenon attended Rather than the phenomenon being seen

as something solely external it is understood by phenomenologists as also of our immediate awareness and thought Thus the phenomenological method discerns all judgment as based upon one's span of attention of inner or outer phenomena There is an intentionality to attention One intends one's own foci Attention is the temporal duration of that intending The volume offers a text that enables contemporary historians graduate students and even undergraduates who are well taught to understand both the history of phenomenology as a method of inquiry and the contemporary practice of phenomenological historical and historiographical thought

**Bauhaus Bodies** Elizabeth Otto, Patrick Rössler, 2019-01-24 A century after the Bauhaus's founding in 1919 this book reassesses it as more than a highly influential art architecture and design school In myriad ways emerging ideas about the body in relation to health movement gender and sexuality were at the heart of art and life at the school Bauhaus Bodies reassesses the work of both well known Bauhaus members and those who have unjustifiably escaped scholarly scrutiny its women in particular In fourteen original cutting edge essays by established experts and emerging scholars this book reveals how Bauhaus artists challenged traditional ideas about bodies and gender Written to appeal to students scholars and the broad public Bauhaus Bodies will be essential reading for anyone interested in modern art architecture design history and gender studies it will define conversations and debates during the 2019 centenary of the Bauhaus's founding and beyond

*Meanings of Abstract Art* Paul Crowther, Isabel Wünsche, 2012 This book explores the relation of abstract art to nature Traditional picturing and sculpture are based on conventions of resemblance between the work and that which it is a representation of Abstract works in contrast adopt alternative modes of visual representation or break down and reconfigure the mimetic conventions of pictorial art and sculpture Obviously this means that abstract art takes many different forms However this diversity should not mask some key structural features these center on two basic relations to nature understanding nature in the broadest sense to comprise the world of recognisable objects creatures organisms processes and states of affairs The first involves abstracting from nature to give selected aspects of it a new and extremely unfamiliar appearance The second involves abstract art as the affirmation of a relatively unconstrained natural creativity that issues in new autonomous forms that are not constrained by mimetic conventions Such creativity is often attributed to the power of the unconscious The book contains three categories of essays 1 those on classical modernism Mondrian Malevich Kandinsky Arp early American abstraction 2 those on post war abstraction Pollock Still Newman Smithson Noguchi Arte Povera Michaux postmodern developments and 3 those of a broader art historical and philosophical scope Provided by publisher

**Negative Space** Peter Weibel, 2021-12-28 A bold new spatial perspective on modern sculpture with 800 color images of work by artists including Henry Moore Lygia Clark Anish Kapoor and Ana Mendieta This monumental richly illustrated volume from ZKM Karlsruhe approaches modern sculpture from a spatial perspective interpreting it through contour emptiness and levitation rather than the conventional categories of unbroken volume mass and gravity It examines works by dozens of twentieth and twenty first century artists including Hans Arp Marcel Duchamp Henry

Moore Barbara Hepworth Lygia Clark Anish Kapoor Olafur Eliasson Ana Mendieta Fujiko Nakaya Tom s Saraceno and Alicja Kwade The large scale book contains over 800 color images Negative Space comes out of an epic exhibition at ZKM and volume editor Peter Weibel Chairman and CEO of ZKM takes a curatorial approach to the topic The last exhibition to deal comprehensively with the question What is modern sculpture was at the Centre Georges Pompidou in 1986 Weibel and ZKM pick up where the Pompidou left off examining sculptures not as figurative solid and self contained monoliths but in terms of open and hollow spaces reflection light shadow innovative materials data and the moving image Weibel puts advances in science architecture and mathematics in the context of avant garde sensibilities to show how modern sculpture significantly deviates from the work of the past Texts in the volume include an introduction and twelve chapters written by Weibel with contributions by cocurators as well as facsimiles and reproductions of artist authored manifestos

**Computer Vision -- ECCV 2010** Kostas Daniilidis, Petros Maragos, Nikos Paragios, 2010-09-08 The 2010 edition of the European Conference on Computer Vision was held in Heraklion Crete The call for papers attracted an absolute record of 1 174 submissions We describe here the selection of the accepted papers Thirty eight area chairs were selected coming from Europe 18 USA and Canada 16 and Asia 4 Their selection was based on the following criteria 1 Researchers who had served at least two times as Area Chairs within the past two years at major vision conferences were excluded 2 Researchers who served as Area Chairs at the 2010 Computer Vision and Pattern Recognition were also excluded exception ECCV 2012 Program Chairs 3 Minimization of overlap introduced by Area Chairs being former student and advisors 4 20% of the Area Chairs had never served before in a major conference 5 The Area Chair selection process made all possible efforts to achieve a reasonable geographic distribution between countries thematic areas and trends in computer vision Each Area Chair was assigned by the Program Chairs between 28 32 papers Based on paper content the Area Chair recommended up to seven potential reviewers per paper Such assignment was made using all reviewers in the database including the conflicting ones The Program Chairs manually entered the missing conflict domains of approximately 300 reviewers Based on the recommendation of the Area Chairs three reviewers were selected per paper with at least one being of the top three suggestions with 99

Proofs in Competition Math: Volume 1 Alexander Toller, Freya Edholm, Dennis Chen, 2019-07-04 All too often through common school mathematics students find themselves excelling in school math classes by memorizing formulas but not their applications or the motivation behind them As a consequence understanding derived in this manner is tragically based on little or no proof This is why studying proofs is paramount Proofs help us understand the nature of mathematics and show us the key to appreciating its elegance But even getting past the concern of why should this be true students often face the question of when will I ever need this in life Proofs in Competition Math aims to remedy these issues at a wide range of levels from the fundamentals of competition math all the way to the Olympiad level and beyond Don t worry if you don t know all of the math in this book there will be prerequisites for each skill level giving you a better idea of your current strengths and weaknesses

and allowing you to set realistic goals as a math student So mathematical minds we set you off      *Mathematical Structures for Computer Graphics* Steven J.
