Point Of View Talks On Education:

Education from a Whiteheadian Point of View Vesselin Petrov, 2019-03-28 The basic aims of contemporary thinking in education are to cultivate a proper comprehension of the meaning and purpose of education and the role of the teacher and to develop adequate theoretical and methodological frameworks that combine some of the positive sides of the leading theories while avoiding their disadvantages Toward these ends one excellent candidate for consideration is Alfred North Whitehead's 1861-1947 process relational philosophy of education as set forth in *The Aims of Education* 1929 and elsewhere The contributors to this volume analyze Whitehead's philosophy of education in a detailed and critical fashion including inquiring into the development of cycle based approaches to education like Whitehead's in intellectual history as well as its potential objective bases They also demonstrate how this relates to and can be integrated with other leading theories of education and contemporary pedagogical thinking and identify avenues for its positive practical application in schooling across the globe as well as in scientific research The book further critically evaluates current educational practices and the organization of educational institutions in this light and the effectiveness of teaching strategies that are founded upon some of its principles while also exploring the ramifications of its selection and application in education for society in general as well as for our common civilizational aspirations including humanity's addressing of global problems such as the ecological crisis In addition the volume also serves to lay some of the groundwork for its potential further development **Science Education for Gifted Learners** Keith S. Taber, 2007-04-13 Asks how science teachers can make their classes more stimulating and challenging for the most able students to encourage them to continue their science education beyond compulsory schooling **Exploring Talk in School** Neil Mercer, Steve Hodgkinson, 2008-09-23 Selected as an Outstanding Academic Title by Choice Magazine January 2010 Classroom talk by which children make sense of what their peers and teachers mean is the most important educational tool for guiding the development of understanding and for jointly constructing knowledge So what practical steps can teachers take to develop effective classroom interaction Bringing together leading international researchers and drawing on the pioneering work of Douglas Barnes this book considers ways of improving classroom talk Chapters cover classroom communication and managing social relations talk in science classrooms using critical conversations in studying literature exploratory talk and thinking skills talking to learn and learning to talk in the mathematics classroom the emerging pedagogy of the spoken word With an accessible blend of theory research and practice the book will be a valuable resource for teachers teacher trainers policy makers researchers and students **Observational Filmmaking for Education** Nigel Meager, 2019-02-21 This book places observational filmmaking in the context of the rapidly developing landscape of creativity and arts based research in education The author uses observational filmmaking as a lens to address debates surrounding video based and arts based research Utilising the work of Dewey and Deleuze as the theoretical underpinnings of the volume this is combined with numerous practical examples of observational filmmaking in

schools The author argues that observational video camera and editing techniques combine careful observation with rigorous visual analysis they place sensory affectual and aesthetic qualities in experience centre stage While observational filmmaking in itself has enormous potential as a methodology for education research it may also become a fulcrum for children s learning Children record their experiences in the world around them as they look carefully with a video camera This pioneering yet practical book will be of interest and value to students and scholars of creativity learning and education research methods as well as constituting a useful guide for teachers arts practitioners and education policy makers *The Humanities, Higher Education, and Academic Freedom* Michael Bérubé, J. Ruth, 2015-04-30 This book is a lively passionate defence of contemporary work in the humanities and beyond that of the university system that makes such work possible The book s stark accounts of academic labour and its proposals for reform of the tenure system are novel controversial timely and very necessary *The Law School - Global Issues, Local Questions* Fiona Cownie, 2019-01-04 First published in 1999 this international collection of essays on legal education addresses the following issues The Law School and the University Research into legal education has often been regarded as a marginal activity as compared with research into substantive areas of law However recent years have seen a growing interest in discussions about the purpose of the university law school and the ways in which law is taught within it Are we educating professional lawyers or legal scholars What do we really mean when we say we want to offer a liberal education in the law What effect are the current changes in higher education funding and policy having on law schools and what takes place within them The international group of scholars who have contributed to this collection come from very different jurisdictions but they have written about topics which while they have local resonances are of concern globally Global Issues Local Questions addresses matters which concern all law teachers whatever their field of substantive legal expertise *The Routledge International Handbook of Research on Dialogic Education* Neil Mercer, Rupert Wegerif, Louis Major, 2019-09-26 The Routledge International Handbook of Research on Dialogic Education provides a comprehensive overview of the main ideas and themes that make up the exciting and diverse field of Dialogic Education With contributions from the world s leading researchers it describes underpinning theoretical approaches debates methodologies evidence of impact how Dialogic Education relates to different areas of the curriculum and ways in which work in this field responds to the profound educational challenges of our time The handbook is divided into seven sections covering The theory of Dialogic Education Classroom dialogue Dialogue teachers and professional development Dialogic Education for literacy and language Dialogic Education and digital technology Dialogic Education in science and mathematics Dialogic Education for transformative purposes Expertly written and researched the handbook marks the coming of age of Dialogic Education as an important and distinctive area of applied educational research Featuring chapters from authors working in different educational contexts around the world the handbook is of international relevance and provides an invaluable resource for researchers and students concerned with the study of educational dialogue and allied

areas of socio cultural research It will interest students on PhD programmes in Education Faculties Master s level courses in Education and postgraduate teacher training courses The accounts of results achieved by high impact research projects around the world will also be very valuable for policy makers and practitioners

Multidisciplinary Approach in Health: New Strategies from the Perspective of Education, Management, Culture and Gender Sagrario

Gomez-Cantarino, María Idoia Ugarte-Gurrutxaga, Beatriz Oliveira Xavier , MCarmen Solano-Ruiz, 2024-05-24 Gender and culture are the foundations of individual and social identity which influence the environment at all levels of health care According to historical and cultural patterns people learn to relate to their bodies This situation reveals contrasts in the way bodily functions and thus health and illness are conceptualized used and valued In fact a person s sexuality covers a particularly conflictive field as it focuses on aspects defined as basic constructed according to sociocultural concepts and therefore modifiable Therefore health promotion understood as a proposal for empowering individuals families and communities about their perception of their life and health within their cultural ethnic religious and care context and influenced by their state of health becomes important To this end we propose the adoption of transdisciplinary approaches that prioritize relational analysis studies in the context of health scenarios for the development of public policies framed in the culture of care its evolution economy and management highlighting the gender perspective

The Changing Academic Library John Budd, 2018 Previous edition published Chicago Association of College and Research Libraries 2005

The Common Law Tradition George Liebmann, 2017-09-04 This book commemorates a place and a time in American law teaching but more importantly an outlook the common law tradition That outlook was empirical and tolerant These values were carried into expression by a group of people who were not part of a cult or faction nor ruled by the herd instinct Now in paperback The Common Law Tradition is a collective portrait of five scholars who epitomize the tradition The focus is Chicago in the 1960s The five figures considered Edward H Levi Harry Kalven Jr Karl Llewellyn Philip Kurland and Kenneth Culp Davis did much to broaden the perspectives of the legal academy Levi made use of sociology economics and comparative law Kalven collaborated with sociologists on the Jury Project and with economists on tax law and auto compensation plans Llewellyn s commitment to empirical research underpinned his work on the Uniform Commercial Code Kurland s approach to constitutional law was highlighted by his insistence on the relevance of legal history Davis was an energetic comparativist in his work on administrative law What distinguished these Chicagoans is that their work was practical and rooted in the law and hence yielded concrete applications The group s diversity the tolerant atmosphere in which they taught and wrote and the attachment of its individual members to empirical approaches differentiate them from today s legal scholars and make their ideas of continuing importance

Let's Talk About Law in Elementary School Wanda Cassidy, Ruth Yates, 1998-01-01 Fun easy ways to teach the law to elementary students There is growing interest from teachers at the elementary level in addressing legal topics concepts and skills with their students Let s Talk About Law in

Elementary School addresses their need for relevant ideas and materials that can be integrated into the core subjects of social studies language arts and science It also provides information on where to obtain other useful materials for classroom use as well as law resources to assist them in developing their own classroom materials The contributors are active in law related education either at the public school level in program administration or at the post secondary level

Religious Diversity and Education. Nordic Perspectives Geir Skeie,2009 In the last ten years or so religious plurality has become higher on the agenda for religious education research in the Nordic countries This attention to religious plurality partly reflects processes of globalisation that include both physical migration and communication of ideas and is seen across the world making it smaller It also reflects the preoccupation of governments with social cohesion and as part of this intercultural education In the curricula of the Nordic countries this is manifested in different ways setting also the agenda for parts of educational research This book addresses issues related to the increasing religious plurality in the Nordic countries These issues are a challenge to many religious groups including historically dominant Lutheran national churches both nationally and locally They have also led to a reorientation in religious education research in the last decade A rich variety of research perspectives are presented under three headings Theoretical and methodical perspectives The world of the students Teachers and textbooks Nordic religious education research here proves to be internationally oriented in terms of theoretical perspectives whilst also contributing to the debate through important empirical studies Examples of issues covered in the book are unintended learning dialogue gender life interpretation spirituality identity and values In different ways all the contributions in this book shed light on the common theme of diversity and are based on a will to include diverse perspectives both on the actors and the material of the classroom as well as on the life world of young people The researchers represent different generations and different theoretical and methodological perspectives
