The Knickerbocker ,1845 *Hiding* Mark C. Taylor,1997 For Mark C Taylor the disappearance of depth we sense all around us is a change full of creative possibility Taylor introduces us to a popular culture in which detectives the postmodern heroes of Paul Auster and Dennis Potter lift surfaces only to find more surfaces and in which fashion advertising plays transparency against hiding He looks at the current preoccupation with body piercing and tattooing and asks whether these practices actually reveal or conceal The limitless spread of computer networks the history of phrenology the religious architecture of Las Vegas all are brought within the scope of Taylor s brilliant analysis Postmodernism he shows has given us a new sense of the superficial one in which the issue is not the absence of meaning but its uncontrollable ecstatic proliferation Rewiring the Real Mark C. Taylor,2013-01-22 Digital and electronic technologies that act as extensions of our bodies and minds are changing how we live think act and write Some welcome these developments as bringing humans closer to unified consciousness and eternal life Others worry that invasive globalized technologies threaten to destroy the self and the world Whether feared or desired these innovations provoke emotions that have long fueled the religious imagination suggesting the presence of a latent spirituality in an era mistakenly deemed secular and posthuman William Gaddis Richard Powers Mark Danielewski and Don DeLillo are American authors who explore this phenomenon thoroughly in their work Engaging the works of each in conversation Mark C Taylor discusses their sophisticated representations of new media communications information and virtual technologies and their transformative effects on the self and society He focuses on Gaddis s *The Recognitions* Powers s *Plowing the Dark* Danielewski s *House of Leaves* and DeLillo s *Underworld* following the interplay of technology and religion in their narratives and their imagining of the transition from human to posthuman states Their challenging ideas and inventive styles reveal the fascinating ways religious interests affect emerging technologies and how in turn these technologies guide spiritual aspirations To read these novels from this perspective is to see them and the world anew **The Knickerbocker** ,1845 *The Pyramid Builder's Handbook* Derek Hitchins,2010-05-25 The designs of the pyramids of ancient Egypt evolved over time they had connections with the ancient myths legends and with the stars as they were in ancient times When pyramid dimensions are converted to cubits and seked revealing relationships emerge that were obscured by using using modern units All of the energy of building came from manpower courtesy of the energy consumed in the workers food and drink The mathematics of ramp construction and of the use of ramps to convey stones at the phenomenal rates apparently achieved challenge pet theories of construction Most captivating is a study of the culture of the builders evidenced in models of villages and farms scenes of food preparation toys statues magic and tomb art

Egypt Boleslaw Prus, 2020-09-28 THE position of Ancient Egypt was unique not in one but in every sense To begin at the very foundation of life in that country we find that the soil was unlike any other on earth in its origin Every acre of fruitful land between the first cataract and the sea had been brought from Inner Africa and each year additions were made to it Out of this mud borne down thousands of miles from the great fertile uplands of Abyssinia by rivers grew everything needed to feed and clothe man and nourish animals Out of it also was made the brick from which walls houses and buildings of various uses and kinds were constructed Though this soil of the country was rich it could be utilized only by the unceasing co ordinate efforts of a whole population constrained and directed To direct and constrain was the task of the priests and the pharaohs Never have men worked in company so long and successfully at tilling the earth as the Egyptians and never has the return been so continuous and abundant from land as in their case The Nile valley furnished grain to all markets accessible by water hence Rome Greece and Judaea ate the bread of Egypt On this national tillage was founded the greatness of the country for from it came the means to execute other works and in it began that toil training and skill indispensable in rearing the monuments and doing those things which have made Egypt famous forever and preserved to us a knowledge of the language religion modes of living and history of that wonderful people who held the Nile valley No civilized person who has looked on the pyramid of Ghizeh the temple of Karnak and the tombs of the pharaohs in the Theban region can ever forget them But in those monuments are preserved things of far greater import than they themselves are In the tombs and temples of Egypt we see on stone and papyrus how that immense work of making speech visible was accomplished that task of presenting language to the eye instead of the ear and preserving the spoken word so as to give it to eye or ear afterwards In other terms we have the history of writing from its earliest beginnings to the point at which we connect it with the system used now by all civilized nations excepting the Chinese In those monuments are preserved the history of religion in Egypt not from the beginning of human endeavor to explain first what the world is and then what we ourselves are and what we and the world mean together but from a time far beyond any recorded by man in other places Egyptians had the genius which turned a narrow strip of Abyssinian mud and a triangular patch of swamp at the end of it into the most fruitful land of antiquity They had also that genius which impels man to look out over the horizon around him see more than the material problems of life and gaze into the beyond gaze intently and never cease gazing till he finds what his mind seeks It was the possession of these two kinds of genius and the union of the two which made the position of Egypt in history unique and unapproachable The greatness of Egypt lay primarily in her ideas and was achieved through a perfect control over labor by intellect While this control was exerted even approximately in accordance with the nation's historical calling it was effectual and also unchallenged But when the exercise of power with the blandishments and physical pleasures which always attend it had become dearer to the priesthood and to pharaohs than aught else on earth or in their ideals then began the epoch of Egypt's final doom foreign bondage and national ruin The action presented in the volume before us relates to those days when the

guiding intellect of Egypt became irrevocably dual and when between the two parts of it the priests and the pharaohs opposition appeared so clearly defined and incurable that the ruin of both sides was evident in the future The ruin of a pharaoh and the fall of his dynasty with the rise of a self chosen sovereign and a new line of rulers are the double consummation in this novel The book ends with that climax but the fall of the new priestly rulers is a matter of history as is the destruction wrought on Egypt by tyrants from Assyria and Persia The native pharaohs lost power through the priesthood whose real interest it was to support them but fate found the priests later on and pronounced on them also the doom of extinction Alexander Glovatski was born in 1847 in Mashov a village of the Government of Lublin He finished his preliminary studies in the Lublin Gymnasium and was graduated from the University of Warsaw He took part in the uprising of 1863 but was captured and liberated after some months detention As a student he showed notable power and was exceptionally attracted by mathematics and science to which he gives much attention yet though occupied mainly in literature Glovatski s published works are in seventeen volumes These books with the exception of The Pharaoh and the Priest are devoted to modern characters situations and questions His types are mainly from Polish life Very few of his characters are German or Russian of Polish types some are Jewish

The Pyramid Ismail Kadare,2011-11-21 Egypt in the twenty sixth century BC The young pharaoh Cheops wants to forgo the construction of a pyramid in his honor but his court sages hasten to persuade him otherwise The pyramid they tell him is not a tomb but a paradox designed to appease the masses by oppressing them It is a symbol of nothing a useless and infinite project designed to waste the country s wealth and keep security and prosperity ever the fonts of sedition constantly at bay And so the greatest pyramid in the world has ever seen begins to rise Rumors multiply A secret police is formed Conspiracies real and imagined swirl around the rising edifice The most drastic purges follow By the time the first stone is laid Cheops s subjects are terrified enough to yield to his most murderous whims Each time one of the massive stones is hoisted into place dozens of men are crushed and there are tens of thousands of stones

Van Nostrand's Engineering Magazine ,1884 *Books Written in Stone* J. Marc. Merrill,2012-05 Like the Great Pyramid mysteries surround the other pyramids as well as other features found at the Giza plateau in Egypt For example Why does the second pyramid have two entrances both off center while the single entrance to the third pyramid is centered What was the purpose of the two lower chambers in the second pyramid Moreover why was the sarcophagus in this pyramid made to be wider than the passages that lead to the upper chamber In a related matter why

were the bones of a bull placed in the sarcophagus And why was the sarcophagus sunk into the floor up to its lid At the third pyramid why were parts of a body dating to the Christian period wrapped in a coarse yellow woolen cloth and buried beneath three feet of rubbish in the upper chamber Why in the third pyramid was the lower vaulted chamber designed so that it would absorb both sound and light Out on the plateau what was the purpose of the so called trial passages On the south side of the Great Pyramid why was an ancient boat dismantled and buried in a pit east of that pyramid s north south axis And what was stored in the other pit west of the axis Do the four so called air shafts in the Great Pyramid link the three major pyramids together And how are the compartments above the King s Chamber related to the end time David Furlong author of The Keys to the Temple says the whole of the Giza complex was based on a coherent design intended to portray a spiritual theme page 89 Volume 2 of Books Written in Stone Enoch the Seer the Pyramids of Giza and the Last Days provides the evidence to support this thesis
