

DEFINING DIGITAL ETHNOGRAPHY

Ethnography relies greatly on up-close, personal experience. Participation, rather than just observation, is one of the keys to this process (Genzuk, 1999). Traditional ethnographers focus attention on a community, selecting knowledgeable informants who know the activities of the community well (Gerson, 2008).

Digital Ethnography is participation and observation on a community in the digital world. Digital ethnographers can participate and observe online films, digital games, blogs, and virtual worlds, to name a few (The Qualitative Report, Stokrocki, 2010). During this class we focus on digital ethnography in the virtual world of Second Life.
