Spectroscopy Literature for 1970, 1972 *Crime Scenes*, 2021-11-01 The essays in this collection are based on papers given at a conference on detective fiction in European culture held at the University of Exeter in September 1997 The range of topics covered is designed to show not only the presence and variety of narratives of detection across different European countries and their different media although there is a predictable emphasis on the novel It also illustrates the fertility of the genre its openness to a spectrum of readings with different emphases formal as well as thematic Approaches to detective fiction have often tended to confine them selves to symptomatic interpretation where details of the fictional world represented are used to diagnose a specific set of social preoccupations and priorities operative at the time of writing Such approaches can yield valuable insights Nonetheless there is a risk of limiting the value of the genre as a whole solely to its role as a mirror held up to society In this perspective issues of structure and style are sidelined or if addressed are praised to the extent that they approach invisibility concision sparseness realism are the qualities singled out for praise The genre also gives much scope for formal innovation and indeed has often attracted already established mainstream writers and filmmakers for just this reason The eclectic diversity of the detective narratives considered in this volume reveal the malleability of the traditional constraints of the genre The essays bear rich testimony to the value of considering the interplay of thematic and structural issues even in the most apparently unselfconscious and popular or populist forms of narrative The patterns of reassurance the triumph of intellect and the ordered rational world of old are now challenged by the need to foreground the problems ambiguities and uncertainties of the self and of society The plurality of meanings and the antithetical imperatives explored in these detective narratives confirm that the most recent forms of the genre are not mere palimpsests of their golden age precursors The subversion of traditional expectations and the implementation of diverse stylistic devices take the genre beyond mere homage and pastiche The role of the reader spectator and critic in conferring meaning is a crucial one **Contemporary French and Scandinavian Crime Fiction** Anne Grydehøj, 2021-07-05 This

book offers a study of Danish Norwegian Swedish and French crime fictions covering a fifty year period From 1965 to the present both Scandinavian and French societies have undergone significant transformations Twelve literary case studies examine how crime fictions in the respective contexts have responded to shifting social realities which have in turn played a part in transforming the generic codes and conventions of the crime novel At the centre of the book s analysis is crime fiction s negotiation of the French model of Republican universalism and the Scandinavian welfare state both of which were routinely characterised as being in a state of crisis at the end of the twentieth century Adopting a comparative and interdisciplinary approach the book investigates the interplay between contemporary Scandinavian and French crime narratives considering their engagement with the relationship of the state and the citizen and notably with identity issues class gender sexuality and ethnicity in particular

The Extraordinary Voyage in French Literature Geoffroy Atkinson,1922

The Roman Noir in Post-war French Culture Claire Gorrara,2003 The Roman Noir in Post War French Culture offers a lively introduction to the post war French roman noir from a cultural studies perspective A

populist and widely disseminated genre the French roman noir has suffered from a reputation as a minor genre with its roots in American popular culture In this study Claire Gorrara challenges such preconceptions and examines how selected writers have appropriated the roman noir as a critical response to formative concerns and debates in post war French society Starting with the first truly French roman noir L o Malet s 120 rue de la gare 1943 and concluding with Maud Tabachnik s feminist thriller Un t pourri 1994 Gorrara analyses both texts and film in relation to their specific historical and cultural context From the heritage of the Second World War and France s wars of decolonisation to the rise of consumer culture and questions of gender and sexual equality the roman noir operates in dialogue with its times mediating social change and transformation with stories of crime transgression and marginality All the novelists studied were published initially in popular collections such as the S rie noire but they have been chosen for the innovation of their work and the exciting ways in which they resist tired conventions and offer new ways of representing social reality One of the first English language studies of this popular genre The Roman Noir in Post War French Culture offers much more than close readings of these fascinating texts it demonstrates the important contribution of the roman noir to the cultural histories of post war France
