Polar Icebreakers in a Changing World National Research Council, Transportation Research Board, Marine Board, Division on Earth and Life Studies, Polar Research Board, Committee on the Assessment of U.S. Coast Guard Polar Icebreaker Roles and Future Needs, 2007-03-14 The United States has enduring national and strategic interests in the polar regions including citizens living above the Arctic circle and three year round scientific stations in the Antarctic Polar icebreaking ships are needed to access both regions Over the past several decades the U S government has supported a fleet of four icebreakers three multi mission U S Coast Guard ships the POLAR SEA POLAR STAR and HEALY and the National Science Foundation s PALMER which is dedicated solely to scientific research Today the POLAR STAR and the POLAR SEA are at the end of their service lives and a lack of funds and no plans for an extension of the program has put U S icebreaking capability at risk This report concludes that the United States should continue to support its interests in the Arctic and Antarctic for multiple missions including maintaining leadership in polar science The report recommends that the United States immediately program budget design and construct two new polar icebreakers to be operated by the U S Coast Guard The POLAR SEA should remain mission capable and the POLAR STAR should remain available for reactivation until the new polar icebreakers enter service The U S Coast Guard should be provided sufficient operations and maintenance budget to support an increased regular and influential presence in the Arctic with support from other agencies The report also calls for a Presidential Decision Directive to clearly align agency responsibilities and budgetary authorities

The Arctic Großraum Christopher R Rossi, 2025-09-04 How should the Arctic be viewed in the 21st century In this book a leading commentator assesses the competing players for the Arctic looking at broad questions of governance and security The author challenges the view that the Arctic is a passive space which is the focus of competitive advances from superpowers arguing that it is more correctly understood as a dynamic pluriverse Drawing on international law international relations and diplomacy this is an important re assessment of the Arctic and its position in geo politics

The Natural and Societal Challenges of the Northern Sea Route Willy Østreng, 2013-04-17 Yohei Sasakawa The Northern Sea Route is the shortest shipping route connecting the Far East and Europe However the route has been practically inaccessible to commercial vessels due to the harsh natural conditions in the area which make navigation possible for only a small part of the year and then only with an icebreaker leading the way Opening the Northern Sea Route would greatly facilitate international shipping

making two routes a northbound one through the NSR and a southbound one through Suez available throughout all seasons The Northern Sea Route would also help to boost economic development including the exploitation of natural resources in Russian regions along the coast of the Arctic Ocean Thanks to international cooperation we have been able to set up and successfully conclude a special project to investigate the possibilities of developing the Northern Sea Route as a commercial route while protecting the environment wildlife and peoples of the Arctic Ocean region This represents a highly significant step in terms of future global development

Global Arctic Matthias Finger, Gunnar Rekvig, 2022-02-25 The Arctic has become a global arena This development can only be comprehensively understood from a transdisciplinary perspective encompassing ecological cultural societal economic industrial geopolitical and security considerations This book offers thorough explanations of Arctic developments and challenges Global warming is in large part the driving force behind the transformation of the Arctic by making access possible to the areas previously out of reach for mining and shipping An all year ice free Arctic Ocean a reality possible as soon as perhaps 2030 creates a new dynamic in the North The retreating ice edge enables the exploitation of previously inaccessible resources such as hydrocarbon deposits and rare metals as well as the shortest sea route from Asia to Europe Consequently the Northern Sea Route NSR promises faster and cheaper shipping Russia along side foreign investment especially from China is financing the needed infrastructure A warming Arctic however also has negative impacts The Arctic is home to fragile ecosystems that are already showing signs of deteriorating The Arctic has seen unprecedented wildfires which together with the release of trapped methane from the disappearing permafrost will in turn accelerate global warming A warmer Arctic Ocean will also negatively impact fisheries Couple this with other global changes such as ocean acidification and modified ocean currents and the global outlook is bleak Additionally the security situation in the Arctic is worsening After the 2014 Ukraine crisis the West imposed sanctions on the Russian Federation which have revived the divisions of the Cold War The reemergence of these postures is threatening the highly successful Barents Cooperation and other initiatives for peace in the circumpolar North This book offers new insights and presents arguments for how to mitigate the challenges the Arctic is facing today
