Polar Regions A Political Geography:

The Polar Regions Sanjay Chaturvedi, 1996 The Polar Regions is a systematic investigation of both the geopolitical commonalities and the differences between the Arctic and the Antarctic It is the first book to integrate polar studies of this nature with teaching and research on political geography and geopolitics Based on the premise that geopolitical isolation of the polar regions stands substantially eroded today the book argues that the contemporary polar scene should be approached and understood in terms of its broader regional as well as global context It also argues that in the 21st century the two polar regions will be increasingly valued not only for their intrinsic polar merits but also for their contribution to an understanding of global problems A critical evaluation of the promise and the performance of the Antarctic Treaty System is provided The book also examines the ongoing debate about Antarctica which underlines the need to look beyond the present agreement on the Antarctic and to address the geopolitical implications of it By presenting studies of both polar regions this book seeks to test assumptions about the new geopolitics and to evaluate the prospects of it in these regions The text will be of particular interest to political geographers and specialists in international relations but will also be an important text for students and researchers in political geography environmental management and environmental politics

Wrigley, 1922 [Global and Regional Problems](#) Vilho Harle, 2016-04-22 Distinctive due to explicit and systematically developed links between international relations IR and related disciplines this book addresses global and regional interactions and the complex policy problems that often characterise this agenda Such enhanced communication is crucial for improving the capacity of IR to engage with concrete issues that today are of high policy relevance for international organisations states diplomats mediators and humankind in general Whilst the authors do not reject the present IR they offer a wider research agenda with new directions intended not only for those IR scholars who are unsatisfied with the analytical power of the current discipline but also for those working on international foreign global or interregional issues in other disciplines and fields of research In this instance they pay particular attention to linking up with peace research international political economy IPE and cultural political economy CPE sociology political geography development studies linguistics cultural studies environmental studies and energy research gender studies and traditions of area studies

Visualising far-right environments Bernhard Forchtner, 2023-10-17 This volume presents ground breaking analyses of how the far right represents natural environments and environmentalism around the globe Images are not simply pervasive in our increasingly visual culture they are a means of proposing worlds to viewers Accordingly the book approaches the visual not as something extra or illustrative but as a key means of producing identities and doing politics Putting visuality centre stage and covering political parties and non party actors in Africa Asia Australia and New Zealand Europe and the United States contributors demonstrate the various ways in which the far right articulates natural environments and the rampant environmental crises of the twenty first century

providing essential insights into such multifaceted politics **Encyclopedia of the Arctic** Mark Nuttall,2005-09-23 With detailed essays on the Arctic s environment wildlife climate history exploration resources economics politics indigenous cultures and languages conservation initiatives and more this Encyclopedia is the only major work and comprehensive reference on this vast complex changing and increasingly important part of the globe Including 305 maps This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues but a fascinating and comprehensive resource for residents of the Arctic and all those concerned with global environmental issues sustainability science and human interactions with the environment Competing Arctic Futures Nina Wormbs,2018-08-06 This edited collection explores how narratives about the future of the Arctic have been produced historically up until the present day The contemporary deterministic and monolithic narrative is shown to be only one of several possible ways forward This book problematizes the dominant prediction that there will be increased shipping and resource extraction as the ice melts and shows how this seemingly inevitable future has consequences for the action that can be taken in the present This collection looks to historical projections about the future of the Arctic evaluating why some voices have been heard and championed while others remain marginalised It questions how these historical perspectives have shaped resource allocation and governance structures to understand the forces behind change in the Arctic region Considering the history of individuals and institutions their political and economic networks and their perceived power the essays in this collection offer new perspectives on how the future of the Arctic has been produced and communicated *Autonomy* Paula Banerjee,Samir Kumar Das,2008 A critical attempt to understand autonomy from both historical and analytical perspectives **The European Union and the Geopolitics of the Arctic** Andreas Rasputnik,2018-01-26 The Arctic is a region that has seen exponential growth as a space of geopolitical interest over the past decade This insightful book is the first to analyse the European Union s Arctic policy endeavours of the early 21st Century from a critical geopolitical perspective Geopolitical Traditions David Atkinson,Klaus Dodds,2002-09-26 Geopolitical Traditions brings together scholars working in a variety of disciplines and locations in order to explore a hundred years of geopolitical thought
