

There are several annoyances. All the tables are in an appendix. There are several misspellings and typos (turnnover, p. 8; pesonalized, p. 60; imediate, p. 79; etc.) and incorrect references—Fishel is Fischel; Wilensky is Wilonsky; Kovenock is Kovenoc; Musolf becomes Muloff.

Despite the limitations noted, the book is an important one. Fox and Hammond have provided an up-to-date, in-depth description of the professional staffs in Congress. These staffs have grown considerably in recent years; some would argue that they have become a force almost as powerful as the elected Congress. The authors have contributed to increased understanding of the legislative process and shed light on the roles and impact of the professional staff. Further research is necessary before we can determine what difference these staffs have made, but it will have to speak to the agenda generated by this work.

**Policing a Free Society.** By Herman Goldstein. (Cambridge, Mass.: Ballinger Publishing Company, 1977. Pp. xi + 371. \$16.50, cloth; \$7.95, paper.)

Rare is the book which presents both a balanced assessment of developments in a field and a comprehensive new framework for understanding that field. Herman Goldstein has achieved both for police in America. His thorough examination of fundamental issues begins with the observation that "police, by the very nature of their function, are an anomaly in a free society. They are invested with a great deal of authority under a system of government in which authority is reluctantly granted, and when granted, sharply curtailed" (p. 1). Goldstein shows that the nature of police tasks requires that this authority be exercised by individuals at the operating level. Further, police authority is ambiguous and surrounded by a jumble of contradictory expectations. Statutes usually require police to enforce all the laws all the time, yet the public will not tolerate full enforcement of many laws. The public holds police responsible for preventing crime, yet police have no influence on the social factors which promote the many varieties of unlawful behavior. The book elucidates these and myriad similarly complex discrepancies. The question guiding this work is: how can policing be restructured so that police power more adequately serves the public good as defined by constitutional safeguards and democratic processes?

Chapter by chapter Goldstein builds the framework that provides answers. He analyzes in the first four chapters what police actually do and sympathetically explains their problems in doing it. A pervasive problem is that the present structuring of the job requires duplicity. The next four chapters weigh the issues of power—the structuring of discretion, the political direction of police, the control of police misbehavior, and the handling of corruption. The last four chapters not only explain the minimal impact of recent attempts to improve police organization through developing leadership, upgrading personnel and increasing education, but also suggest realistic alternatives.

Goldstein brings to his task the mature reflections of 20 years' experience with police. His perspective is that of an administrator steeped in constitutional law and conversant with social science research. He suffers no illusions concerning the entrenched nature of police abuses and the difficulty of police reform, having worked four years in the Chicago police department as right hand to the most influential police manager of the mid-century, O. W. Wilson. Since 1965 he has served at the University of Wisconsin law school.

Goldstein discourses fluently upon the whole literature of police, the uneven nature of current practices, and relevant court decisions. The prolific citations to empirical studies, primary documents, and reflective essays provide a comprehensive summation of the literature of the police field.

The book is socratic; reasoned argument carefully examines the complexities of each issue and then leads inexorably to conclusions that refute prevailing opinion. The doctrines which Goldstein destroys are those derived from the major police reformers of this century: that crime is the paramount responsibility of the police, that organizational upgrading is a sufficient goal for reform, and that police power can be properly controlled through a centralized structure that is insulated from politics.

The new framework by which Goldstein addresses the enduring problems of policing rests on a view of police as an agency of municipal government housing a multitude of functions. In listing the appropriate objectives, he draws upon the American Bar Association standards adopted in 1973, of which he was the original draftsman. They are: to prevent and control conduct threatening to life and property, to aid individuals in danger; to protect constitutional rights; to facilitate traffic; to assist those who cannot care for themselves; to resolve conflict; to identify incipient problems;
