Macintosh,Trevor

Hopper,2005-09-30 This book contains 35 carefully selected and abridged versions of scholarly financial and managerial research articles by world class researchers ranging across a wide spectrum of the social political and philosophical sides of

financial and managerial accounting information and practices to focus on accounting's wider role and impact on organizations and society at large. While each article was substantially culled in order to highlight its central findings and its unique approach, care was exercised to maintain the integrity of the authors' work. The result is a collection of readily accessible research including classics and seminal articles, a selection of more contemporary articles, and recent articles that go beyond the conventional. Thus, the book pushes the boundaries beyond that of conventional accounting thought and research. This anthology will be of interest especially to graduate students since it provides a broad sampling of influential research studies presented in a highly accessible format. It should also be of vital interest to sophisticated practitioners who are concerned about the current state of the accounting world in the wake of the recent cascade of so-called accounting scandals. The hope also is to help bridge the gap between the practitioners and the scholarly researchers.

Encyclopedia of Police Science Jack Raymond Greene, 2006-10-23 In 1996 Garland published the second edition of the Encyclopedia of Police Science edited by the late William G. Bailey. The work covered all the major sectors of policing in the US. Since then much research has been done on policing issues and there have been significant changes in techniques and in the American police system. Technological advances have refined and generated methods of investigation. Political events such as the terrorist attacks of September 11, 2001 in the United States have created new policing needs while affecting public opinion about law enforcement. These developments appear in the third expanded edition of the Encyclopedia of Police Science. 380 entries examine the theoretical and practical aspects of law enforcement, discussing past and present practices. The added coverage makes the Encyclopedia more comprehensive with a greater focus on today's policing issues. Also added are themes such as accountability, the culture of police, and the legal framework that affects police decision. New topics discuss recent issues such as Internet and crime, international terrorism, airport safety, or racial profiling. Entries are contributed by scholars as well as experts working in police departments, crime labs, and various fields of policing.

Financial Institutions and Social Transformations David Knights, Tony Tinker, 2016-07-27 This book seeks to draw together a series of theoretical and empirical contributions from several countries including the US, Japan, the UK, and Germany. The chapters differ from a majority of writings on the financial sector in that they are not dominated by economic or finance issues but are concerned with social or sociological implications, conditions, and consequence of current changes in financial services.
