Policy Making In The European Union Conceptual Lenses And The Integration Process:

Policy-making in the European Union Laura Cram,1997 This book takes a fresh view at attempts to conceptualize the process of European integration It highlights the often neglected but crucial role of European institutions in understanding major constitutional decisions in the European Union

Constructing a Policy-Making State? Jeremy Richardson,2012-09-20 Constructing a Policy Making State sets out to examine the processes by which Europeanization takes place Europeanization is defined as the process by which the key decisions about public policies are gradually transferred to the European level or for new policy areas emerge at the European level This is in contrast to definitions of Europeanization which focus on the adaption of member states to European public policies Thus the main focus is whether a European Union policy making state is being created via changes in the distribution of power between member states and the European level institutions over time In addition to several overview chapters such as on agenda setting in the EU there are twelve sectoral studies which analyse the differing trajectories and outcomes of the Europeanization process and the extent to which the European Union can make authoritative allocations The case studies have been selected in order to illustrate the degree of cross sectoral variation in the process of Europeanization from sectors which have yet to see very much Europeanization such as health to sectors such as competition policy which are almost fully Europeanized The book is consciously multi theoretic in its approach drawing on a range of theories and concepts from theories of European integration to theories of public policy processes

EU Railway Policy-Making H. Dyrhaug,2013-09-18 Through policy and intervention national governments in Europe have long held an active interest in railways an interest that has transferred to the supranational level via the EU commission This book explores why the EU Commission has been so slow in creating an EU railway policy pointing the finger at strong resistance by national governments

Understanding Eu Policy Making Raj S. Chari,Sylvia Kritzinger,2006-08-20 EU policy shapes all areas of our lives from our money to our food to our welfare Yet we know little about how EU decisions are made and who benefits from them This book is a critical guide to the policies of the EU Raj Chari and Sylvia Kritzinger argue that there is an agenda that underlies EU policy making Some policies those that aim to create a competitive economy are prioritised while others are effectively ignored Setting the EU in a proper economic and theoretical context the authors analyse each of the EU s major policy areas Arguing that traditional accounts of EU integration are inadequate the authors develop an innovative new perspective

Policy-Making and Diversity in Europe Adrienne Windhoff-Héritier,1999-11-28 Shows how policy making in Europe works despite diverse interests

Globalisation and EU Policy-making Ian Bartle,2005 Assesses and contrasts the roles of globalisation institutions and ideas on policy making in the EU Views the creation of liberalised European single markets in the telecommunications and electricity supply sectors out of national monopolies as an example of the dramatic transformation of economic organisation across Europe in the last twenty years Connects micro policy making processes in two industrial

sectors to macro international political economy Covers the period from the mid 1980s when the single market came on the agenda through the liberalising initiatives in the 1990s to the new regulatory framework in communications in 2002 and the 2003 directive on the full liberalisation of electricity by 2007 Will be of interest to anyone studying globalisation European integration and policy making regulation and policy in utility sectors

Decision-Making in the European Union John Peterson, Elizabeth Bomberg, 1999-05-25 Based on exhaustive research this book explains how the European Union makes decisions in seven major policy sectors Written in a clear user friendly style it brings the EU alive for a student and non specialist audience The book s central themes are that informal norms often matter more than formal rules agency often matters more than structure and abrupt change often punctuates deadlock It offers a theoretically based introduction to the lively humorous and fascinating politics of a unique experiment in modern governance

Multicultural Citizenship of the European Union Juan Delgado-Moreira, 2018-02-06 This title was first published in 2000 This text deals with two intertwined dimensions of multicultural citizenship of the European Union It studies the theoretical debate over how best to reconcile multiculturalism citizenship and the need for collective identity at the European Union EU level by comparing EU citizenship with cultural citizenship and multicultural studies in the United States In addition to this through the study of EU documents the author contends that there exists such a thing as policies of multicultural citizenship at the European Union level He then goes on to analyze their key aspects such as the pursuit of symbolic forms of multiculturalism and the arguments to support affirmative action policies for women The text also examines the steps taken by certain EU institutions towards creating European identity and improving awareness of citizenship and cultural heritage while meeting the test of subsidiarity The author concludes that there are competing discourses in EU institutions concerning the best model for EU citizenship Among other concepts they construe multiculturalism and transnationalism as contested and sometimes opposing interpretations of citizenship The text goes on to reveal a lack of substantive connection between EU citizenship and identity in the European Union as well as the artificiality of EU attempts to build it anew It concludes that a plurality of cultural constructions of EU citizenship within the wider framework of liberal culturalism may be a viable model of EU citizenship

Conflict prevention and crisis management has become a key activity for the EU since the creation of the Common Security and Defence Policy in 1999 The rapid growth of this policy area as well as the number of missions deployed

beyond the EU's border raise important questions about the nature of the EU's international role and its contribution to international security. The Contributions to EU Conflict Prevention and Crisis Management analyze European conflict prevention and crisis management in terms of the EU's evolving global role, its institutions and its policies. The volume analyzes the EU's position in relation to the US, the UN and other regional security organizations and applies three different institutionalist perspectives: historical, rational choice and sociological institutionalism to explain the increasing institutionalization of EU crisis management. It also critically analyzes the application of EU policies in West Africa, Afghanistan and the Caucasus. Providing a comprehensive analysis of EU crisis management, the volume explores what role EU conflict prevention and crisis management plays in a European and a global context. Offering a comprehensive and original contribution to the literature on EU foreign and security policy, this volume will be of interest to students and scholars of European politics, international relations and security studies.

Democratizing the European Union

Catherine Hoskyns, 2018-02-06. The European Union's democratic deficit and ways that might be found to resolve it are hot issues in both academic debate and practical politics. Democratizing the European Union offers a fresh approach to this subject by bringing together a diverse range of authors who have been actively involved either in analyzing the activities of the European Union or participating in them. The contributors go beyond a primarily institutional approach by highlighting issues having to do with values, participation and exclusion. Collectively, this volume also transcends the limitations of abstract theory. Embracing a range of perspectives and including discussions of major contemporary challenges such as enlargement and economic and monetary union, this book contains a detailed analysis of the response of New Labour to the democratization debate. The contributions include Sue Cohen, Social Solidarity in the Delors Period; Sverker Gustavsson, Reconciling Suprastatism and Accountability: A View from Sweden; Stefano Fella, A Europe of the Peoples; New Labour and Democratizing the EU; John Lambert and Catherine Hoskyns, How Democratic is the European Parliament; Valerio Lintner, Controlling Monetary Union; Mary Kaldor, Eastern Enlargement and Democracy; Richard Kuper, Democratization: A Constitutionalizing Process; and Catherine Hoskyns, Democratizing the EU. Evidence and Argument. Democratizing the European Union is essential reading for all those with an interest in the EU and broader questions of democracy. It is also particularly useful for students of European Studies and practitioners involved in EU policymaking and lobbying.

The New World Architecture Jose Magone, 2017-07-28. The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a power vacuum in the 1990s that the European Union has only reluctantly begun to fill. It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations. After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s. With respect to its international role, reorganization of the EU's external relations department was high on the list. The New World Architecture explores the contribution that the

European Union is making to the emerging global governance system It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems It explores three regimes of governance that are contributing to holding together the new emerging EU multilevel governance system None of these is complete all are partial They include the political regime of governance the socioeconomic regime of governance and the territorial regime of governance The author assesses the impact of the European Union on global politics The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation Magone argues that within the next twenty five years global governance may and should emerge as the new and reconfigured stable system of international relations In this system the European Union is and will remain the most advanced regional system This volume will be of interest to specialists scholars and students of European Politics and the European Union
