Policy Logics And Institutions Of European Space Collaboration Hc 2003:

Policy Logics and Institutions of European Space Collaboration Kazuto Suzuki, 2017-05-15 Focusing on European collaboration outside of the European Union EU this volume deepens the analysis of the current status of space policy in Europe looking at the roles and functions of the institutions of European space collaboration and what influences the interests and strategies of experts and policy makers Providing a new conceptual framework the book also develops an innovative perspective for understanding the interactions between international and domestic policy making as well as a comprehensive analysis of how European states collaborate in a security sensitive area such as space This invaluable work is suitable for courses on and specialists in European studies international relations and international political economy

Space Law Francis Lyall, 2016-12-05 The opening of space to exploration and use has had profound effects on society Remote sensing by satellite has improved meteorology land use and the monitoring of the environment Satellite television immediately informs us visually of events in formerly remote locations as well as providing many entertainment channels World telecommunication facilities have been revolutionised Global positioning has improved transport This book examines the varied elements of public law that lie behind and regulate the use of space It also makes suggestions for the development and improvement of the law particularly as private enterprise plays an increasing role in space The Policy Logics and Institutions of European Space Collaboration Kazuto Suzuki, 2000 **The Policy Logics and Institutions of European**

Space Collaboration , 2001 *Planetary Defense* Nikola Schmidt, 2018-12-26 Planetary defense from near Earth objects such as asteroids is a far more nuanced and challenging topic than it might seem Each day technology is making it easier to detect asteroid impact threats in advance but at present there is still no easy way to design and implement any form of global defense This book examines how various asteroid deflection methods can change global political affairs The authors believe that the final policy for potential Earth impacts should be based on practical engineering solutions and innovative architectural structures while at the same time reflecting the most recent political science contributions in ethical security studies and security cosmopolitanism Their focus is not limited to effective engineering solutions but rather extends to how such proposals resonate in possible political structures of the future Planetary defense cannot be achieved with technology alone the chapters in this volume highlight the issues that arise when space science and technology intersect with political science This complex interdisciplinary project not only demands global participation and collaboration but also proposes the way we can achieve it The authors explore various concepts of governance and their far reaching implications for planetary defense and vice versa how scientific progress in Solar System observations and asteroid collision engineering influence political science and put pressure on the international legal framework The text is intentionally written for a diverse scholarly and diplomatic audience in a style accessible to non specialists and practitioners and can be read by those across diverse disciplinary backgrounds Theorising Institutional Change: The Impact of the European Integration Process on the

Development of Space Activities in Europe Nina-Louisa Remuss, 2018-08-01 The book provides a structural analysis of the European space effort from an institute change perspective It analyzes the EU ESA inter institutional relationship gives an overview of the development of space policy in Europe and advances the debate about the impact of the European integration process on existing institutional actors While European Space collaboration was initially developed outside the competences of the European Union EU with space programmes being carried out almost exclusively under the framework of European Space Agency ESA and national agencies the EU has gained shared competences Art 2 TFEU in space policy following the adoption of the Lisbon Treaty Currently the EU and ESA work together under a Framework Agreement In 2016 the EU Commission has published a Communication entitled European Space Policy ESP Even though ESA s Member States have agreed to keep ESA as an intergovernmental organisation during the ESA Ministerial Council of 2014 the discussion about ESA becoming part of the EU framework continues The EU s ambitions for leadership in European space policy raise question concerning the future of ESA The study of institutions lies at the heart of political sciences Strikingly the theoretic framework qualifying institutional change and making it comparable leaves room for more concrete and testable dimensions of institutional change

European Integration and Space Policy Thomas Hoerber, Antonella Forganni, 2020-12-21 This volume addresses developments in European space policy and its significance for European integration using discourse theory as a framework It seeks to address the developments in European space policy by examining several sensitive security questions linked in general with space activities on the one hand and the interplay between space policy and security policy in the European Union EU on the other The book argues that defence and security matters should be studied for a better understanding of space projects in their historical political economic legal and social context The volume seeks to answer the following key questions What can space policy contribute to European identity formation and the integration process What are the interests of member states EU institutions in space How is space policy perceived by European institutions and how have they been engaged in the policy process to promote activity in space In which ways is the EU engaged in space in terms of policy areas e g foreign policy industrial policy security and defence policies What is the impact of institutions on the policy making process in European space policy This book will be of interest to students of EU policy space policy discourse studies and International Relations in general

Theorizing European Space Policy Thomas C. Hoerber, Emmanuel Sigalas, 2016-11-10 In the modern world technical issues define space policy Missing from discussions of space policy however is a consideration of the political consequences of new space endeavors particularly in the context of the European Union This book therefore approaches space policy instead from the discipline of European studies and analyzes the European integration process through the lenses of political science history economics and international relations The strengths of each discipline are used to apply theoretical approaches to current issues in European space policy Theorizing European Space Policy is the latest contribution to the growing debate on space policy and its role in the European

integration process **A European Space Policy** Thomas Hoerber, Sarah Lieberman, 2019-05-10 This book builds a bridge between current research in space policy and contemporary European political studies by addressing developments in European space policy and its significance for European integration It answers questions central to European studies applying them to the burgeoning field of EU space policy and takes an interdisciplinary approach examining space policy in the light of a range of policy areas including common foreign security policy technology policy transport policy and internal market Using a theoretical framework based around notions of neo institutionalism to evaluate the evolving nature of space policy in Europe the book provides clear insights into the development of the sector and the resulting developments made to the European political landscape This text will be of key interest to scholars and students of Space policy EU studies politics European Studies Politics International Relations Political Science History Economics and Security Studies *European Space Policy* Thomas Hoerber, Paul Stephenson, 2017-03-02 Space policy is at the cutting edge of current EU policy developments and is a fascinating object of study involving multiple and diverse actors It is also an original and contemporary lens for studying European policy making This book explores advances in European space policy and their significance for European integration Using a framing methodology it addresses central questions in European studies in order to form an interdisciplinary bridge between current research in space policy and contemporary European political studies It assesses the interests of EU institutions in space and how these institutions perceive space policy Furthermore it demonstrates that space is a cross cutting policy domain affecting a diverse range of EU policy fields such as security transport and migration and underpinning the 21st century European and global economy In doing so this volume firmly locates space policy in the field of European Studies This innovative volume will be of key interest to students and scholars of a range of policy areas including common foreign and security policy technology policy transport policy internal market policies environmental policy development aid and disaster risk management as well as the EU institutions The Commercialisation of Space Sarah Lieberman, Harald Köpping Athanasopoulos, Thomas Hoerber, 2023-03-29 This interdisciplinary book examines the impact of the commercialisation of space and the changing outlook of the space sector Using a framework based around theories of international political economy IPE the chapters take on issues relating to the politics the economics and the ethics of commercialising space The book aims to build a bridge between the research carried out on European Space Policy and the issues that are currently pertinent in the global discussion of future space policy Overall the volume aims to inform the reader about historical and contemporary developments in the neoliberal commercialisation of space assess the impact of the commercialisation of space on European space institutions European space policy and European space culture raise ethical questions about the environmental and practical sustainability of the commercialisation of space examine the compatibility of the commercialisation of space with international EU and national law This book will be of much interest to students of space policy global governance European politics and International

Relations **European Autonomy in Space** Cenani Al-Ekabi, 2015-01-07 The volume provides analyses and evaluations of the continuing importance of Europe's autonomy in its access to space as a key driver in the development of European space capabilities. From a detailed historical analysis of some of the pitfalls of dependence in the space industry, experts analyse the full range of current European space capabilities and identify areas where autonomy is both possible and required even in a situation of severe budgetary constraints. The contributions present a comprehensive overview of European efforts in a broad range of areas including energy, culture, science and security, access to space, space applications, human spaceflight, security and space situational awareness and strategic issues. They make a cogent strategic and economic case for policy makers to continue to bear in mind the importance of autonomous space capabilities even in an interdependent globalised world.

The Militarization of European Space Policy Thomas Hoerber, Iraklis Oikonomou, 2023-10-30 This book is focused on militarization as the nucleus of EU space policy and the interrelatedness of European security, industrial competitiveness and military capabilities in the shaping of this policy. The EU and key member states have increasingly joined the US, China and Russia among others in regarding space assets as critical military as well as economic, industrial and technological enablers. This book tackles this issue by first shedding light on the military aspects of EU space policy with special emphasis on the security and defence dimensions of projects such as Galileo, Copernicus, Space Situational Awareness and Satellite Communication. In this context, contributors confront the empirical aspect of developments including the role of different institutional actors and the involvement of specific member states. Further, the volume analyses the discursive, ideological, normative and theoretical foundations of the use of space by the EU for strategic purposes, drawing on the broad spectrum of European integration, International Relations theory. Last but not least, the volume discusses initiatives outside the EU by key global space players with an emphasis on the US and transatlantic space relations. All chapters maintain a solid empirical foundation in the form of geographical or issue-related focus with an area-specific emphasis on the EU as a whole, transatlantic relations, the policies of key member states such as France and Italy and core space powers such as the US, China and India. This book will be of much interest to students of space power, security studies, European politics and International Relations.

Yearbook on Space Policy 2007/2008 Kai-Uwe Schögl, Charlotte Mathieu, Nicolas Peter, 2010-07-19 At the time of publishing this second volume of the Yearbook on Space Policy which covers the period mid 2007 to mid 2008, Europe is as visible and strong in the area of space activities as never before. Its space probes are present on the Moon, around Mars and on Saturn's Moon Titan and are chasing asteroids and comets. Ariane V is the most successful commercial launch vehicle and more and more European space applications satellites are in operation. Finally, with the successful launch of the Columbus Orbital Facility (COF), the most prominent highlight of this period which is also depicted on the cover of this Yearbook and the first Automated Transfer Vehicle (ATV), Europe has become a decisive player in human space flight. This is accompanied by new policy initiatives on the ministerial level which have been bringing the European Space

Agency and the European Union steadily closer Europe's outstanding development and positioning in the space field is based not only on Europe's successful engineering and scientific capabilities and capacities but also on the forceful political determination of all European actors to maintain and even further their engagement in the use of outer space. And it is this political determination which provides the focus for this Yearbook on Space Policy. The Yearbook describes and analyses the contexts and contents of space policy. Its primary field of investigation is Europe but it also covers the whole range of global space activities and their influence on European endeavours.

 United States Government Printing Office, 1998-07-01

European Identity through Space Christophe Venet, Blandina Baranes, 2012-11-28

Space activities are one particularly visible area where Europe can shape its identity. This publication investigates the effect space activities have already had on building a European spirit e.g. through European missions or European astronauts. It also looks into the effects that activities labelled national have on the emergence of a European identity. Based on this analysis the book's intention is to identify creative ways and means for how to further use space for shaping the European identity. For this purpose the focus is not only on policy analysis but also on expertise from the fields of cultural science and the arts in order to tap their creative potential and also their theoretical approaches to the topic.

Selecting this theme provides ESPI with another opportunity to develop its transdisciplinary approach.

 National Research Council (U.S.), National Research Council (U.S.). Committee on International Space Programs, 1998

U.S.-European Collaboration in Space Science European Science Foundation, National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Commission on Physical Sciences, Mathematics, and Applications, European Space Science Committee, Committee on International Space Programs, 1998-07-26

U.S. European Collaboration in Space Science reviews the past 30 years of space based research across the Atlantic. The book which was prepared jointly with the European Space Science Committee under the aegis of the European Science Foundation begins with a broad survey of the historical and political context of U.S. European cooperation and collaboration in space. The focus of the book is a set of 13 U.S. European missions in astrophysics, space physics, planetary sciences, earth sciences and life and microgravity research that illustrate lessons learned on the evolution of the cooperation, mission planning and scheduling, international agreements, cost sharing, management and scientific output. These lessons form the basis of the joint committee's findings and recommendations which serve to improve the future conduct and enhance the scientific output of U.S. European cooperation and collaboration in space science.

Europe in the Global Space Economy
 Patrizia Caraveo, Clelia Iacomino, 2023-08-28

This book analyzes the policies and space economy programs of major space faring nations and explores whether the present institutional set up in Europe is adequate to address the challenges. At the core of the discussion are the relative roles of governments and markets in a highly dynamic panorama that involves advancements in science, modifications in technology and organization and the introduction of new rules of behavior. After a

close examination of the history of development of the space economy and the shift from the centralized model to deregulation and the opening up of space activities to commercial companies a wide ranging overview of global space governance is provided National and regional perspectives are discussed and the current role of commercial actors in the global space system is elucidated The various challenges faced by Europe are then examined including the threat posed by institutional and market fragmentation to the emergence of European companies able to compete with companies of nations such as the USA The final part of the book analyzes proposals for reforming of the space system in Europe and offers a vision for future European space policy *The European Space Agency : a Multidisciplinary Look at Europe's Space Policy-maker*
