Political And Social Writings 1961 1979 Recommencing The Revolution From Socialism To The Autonomous Society 003:

Political and Social Writings Cornelius Castoriadis, 1992-12-01 Political and Social Writings Volume 3 1961 1979 was first published in 1992 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions This work offers an extraordinary wealth and variety of writings from the crucial years that followed the publication of Castoriadis's landmark text *Modern Capitalism and Revolution* The new orientation he proposed for the *Socialisme ou Barbarie* group centered on the emerging roles of women youth and minorities in the growing challenge to established society in the early sixties Resistance within the group to this new orientation led Castoriadis to criticize the neopaleo Marxism of Jean Fran ois Lyotard and others who ultimately left *Socialisme ou Barbarie* A heightened concern for ethnological issues culminated in what might be called the embarrassment of today's poststructuralists Castoriadis's premature antistructuralism Additional texts examine the dissolution of the group itself and analyze the May 1968 rebellion of workers and students who according to their own testimony were inspired by ideas developed in the group's journal Also included were many of Castoriadis's still relevant political writings from the seventies which were developed in tandem with the more explicitly philosophical work now found in *The Imaginary Institution of Society* and *Crossroads in the Labyrinth* Political and Social Writings Volume 3 provides key elements for a radical renewal of emancipatory thought and action while offering an irreplaceable and hitherto missing perspective on postwar French thought [Castoriadis and Critical Theory](#) Christos Memos, 2014-11-18 By exploring the concepts of crisis and critique this study offers a thought provoking re examination of the political and social thought of Cornelius Castoriadis in light of the current world crisis and with regard to his radical critique of both the traditional Left and contemporary capitalist societies [Recommencing the Revolution](#) Cornelius Castoriadis, 1992-12-01 **Castoriadis: Psyche, Society, Autonomy** Jeff Klooger, 2009-05-27 This book is a critical exploration of the philosophical underpinnings and implications of Cornelius Castoriadis's reflections on Being society and the self The book introduces the reader to the main concepts of Castoriadis's work but goes further to uncover the fundamental philosophical issues addressed by Castoriadis and to critically examine the issues his work opens up assessing and where necessary offering suggested amendments to the answers Castoriadis himself puts forward Key conceptual problems addressed include the distinction between autonomy and heteronomy the nature of the self and self creation and the nature of determination in a fundamentally indeterminate universe **Political and Social Writings** Cornelius Castoriadis, 1988 Political and Social Writings Volume 1 1946 1955 was first published in 1988 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions A series of writings by the man who inspired the students of the Workers Rebellion in May of 1968 Given the rapid pace of change in the Soviet Union

and Eastern Europe and the radical nature of these transformations the work of Cornelius Castoriadis a consistent and radical critic of Soviet Marxism gains renewed significance these volumes are instructive because they enable us to trace his rigorous engagement with the project of socialist construction from his break with Trotskyism to his final breach with Marxism and would be read with profit by all those seeking to comprehend the historical originality of events in the USSR and Eastern Europe Contemporary Sociology **The Power to Assume Form** Sean McMorrow, 2023-08-15 The Power to Assume Form Cornelius Castoriadis and Regulative Regimes of Historicity examines the major contribution of Cornelius Castoriadis's work which elucidated the role of the social imaginary within human societies What is significant Sean McMorrow argues is that Castoriadis's work presents a unique perspective on the regimes of historicity modes of instituting power that establish the legitimacy of institutional order in relation to the extensive social imaginary articulations of the world The author assesses Castoriadis's theorization of the radically creative capacity of the social imaginary and suggests that there remains a tendency to present an overly dichotomous view of autonomous and heteronomous modes of institution McMorrow assesses how adherence to this inclination hinders the development of further insights into the creative capacities of social imaginary while also imposing limits on Castoriadis's own assessment of the partially autonomous situation of modern societies The author suggests that one way forward is to consider the role of an implicit dimension of instituting power involved in the reproduction of dominant social imaginary articulations of the world and which also shape the regulation of historicity more generally The main purpose of this book is to develop the critical depth of Castoriadis's work showing how it remains an insightful framework to analyze the significance of the deepening depoliticization of contemporary liberal democratic regimes and the partially autonomous dynamics that underlie their shift toward increasingly authoritarian modes of governance *The Persistence of Critical Theory* Gabriel R. Ricci, 2017-07-05 The latest volume of Culture and Civilization gathers contemporary exponents of critical theory specifically those based in the Frankfurt School of social thinking Collectively this volume demonstrates the continuing intellectual viability of critical theory which challenges the limits of positivism and materialism We may question how the theoretical framework of Marxism fails to coordinate with the conditions that defined labor forces as did Max Horkheimer and Theodor Adorno or deliberate on the conditions that justify the claims we make through public discourse as did Jurgen Habermas Or like Axel Honneth we may reflect on recognition theory as a means of addressing social problems Whatever our objective the focus of critical theory continues to be the consciousness of established positive interests that without debate may sustain injustices or conditions which the public may not have chosen to impose Throughout the hardship of punitive dismissal and exile in the 1930s and 40s and the shock of the New Left in the 1960s and 70s and finally the later linguistic and pragmatic turn the Frankfurt School has sustained the idea that people escape disaffection and alienation when their knowledge of the social and political world is dialectically mediated through creative interaction This new volume in the Culture and Civilization series continues the

tradition of critical thought Postscript on Insignificance Cornelius Castoriadis, 2011-02-24 Cornelius Castoriadis 1922-1997 was a philosopher social critic political activist practicing psychoanalyst and professional economist His work is widely recognized as one of the most singular and important contributions to twentieth century thought In this collection of interviews Castoriadis discusses some of his most important ideas with leading figures in the disciplines that play such a crucial part in his philosophical work poetry psychoanalysis biology and mathematics Available in English for the first time these interviews provide a concise and accessible introduction to his work as a whole allowing him to draw on the astounding breadth of his knowledge ranging from political theory and sociology to ontology and the philosophy of science They also render Castoriadis cutting polemical and entertaining style while displaying the originality and clarity of his primary concepts Intellectually provoking this timely collection shows how Castoriadis polemics are sharp and riveting his conceptual manoeuvres rigorous and original and his passion inspiring This is an excellent introduction to one of Europe's most important intellectuals **Council Democracy** James Muldoon, 2018-07-24 The return to public assemblies and direct democratic methods in the wave of the global squares movements since 2011 has rejuvenated interest in forms of council organisation and action The European council movements which developed in the immediate post First World War era were the most impressive of a number of attempts to develop workers councils throughout the twentieth century However in spite of the recent challenges to liberal democracy the question of council democracy has so far been neglected within democratic theory This book seeks to interrogate contemporary democratic institutions from the perspective of the resources that can be drawn from a revival and re evaluation of the forgotten ideal of council democracy This collection brings together democratic theorists socialists and labour historians on the question of the relevance of council democracy for contemporary democratic practices Historical reflection on the councils opens our political imagination to an expanded scope of the possibilities for political transformation by drawing from debates and events at an important historical juncture before the dominance of current forms of liberal democracy It offers a critical perspective on the limits of current democratic regimes for enabling widespread political participation and holding elites accountable This timely read provides students and scholars with innovative analyses of the councils on the 100th anniversary of their development It offers new analytic frameworks for conceptualising the relationship between politics and the economy and contributes to emerging debates within political theory on workplace economic and council democracy Protest, Property and the Commons Lucy Finchett-Maddock, 2016-03-17 Protest Property and the Commons focuses on the alternative property narratives of social centres or political squats and how the spaces and their communities create their own resistant form of law Drawing on critical legal theory legal pluralism legal geography poststructuralism and new materialism the book considers how protest movements both use state law and create new more informal legalities in order to forge a practice of resistance Invaluable for anyone working within the area of informal property in land commons protest and adverse possession this book offers a

Here Lies Bitterness Cynthia Fleury,2022-11-11 The greatest threat to modern democracy comes from within and it has a name resentment Stemming from feelings of inferiority in relation to others resentment is a diffuse and obsessive loathing coupled with delusions of victimhood which clouds one s judgment and perspective so that an individual s capacity to act and heal is paralyzed Without the ability to heal resentment can give rise to violent impulses to the rejection of the rule of law the proliferation of conspiracy theories and the urge to use violent means to try to regain control of one s life As individuals and as societies we

face the same challenge how to diagnose resentment and its dark forces and how to resist the temptation to allow it to become the motor of our individual and collective histories This bestselling and highly original account of the psychic forces shaping modern societies will be of great interest to anyone concerned about the crisis of democracy today and what we can do to address it *Sense of the Possible* L. Callid Keefe-Perry,2023-03-16 *Sense of the Possible* is for those interested in learning about the intersection of Christian theology and imagination Written from the assumption that imagination is deeply connected to the Christian work for liberation and human flourishing this book is an energizing introduction to the ways in which theologians have thought about the powerful human capacity to envision a future that has not yet come Containing perspectives from scripture theology philosophy and congregational studies this text is an excellent way to explore how it is that imagination can be part of a faithful Christian life Each chapter comes with recommended readings and discussion questions that can be used in churches or classrooms *Barbarism and Its Discontents* Maria Boletsi,2013-01-30 *Barbarism and civilization* form one of the oldest and most rigid oppositions in Western history According to this dichotomy barbarism functions as the negative standard through which civilization fosters its self definition and superiority by labeling others barbarians Since the 1990s and especially since 9 11 these terms have become increasingly popular in Western political and cultural rhetoric a rhetoric that divides the world into forces of good and evil This study intervenes in this recent trend and interrogates contemporary and historical uses of barbarism arguing that barbarism also has a disruptive insurgent potential Boletsi recasts barbarism as a productive concept finding that it is a common thread in works of literature art and theory By dislodging barbarism from its conventional contexts this book reclaims barbarism's edge and proposes it as a useful theoretical tool *Moving Beyond Capitalism* Cliff DuRand,2016-09-26 The book speaks to the widespread quest for concrete alternative ways forward beyond capitalism in the face of the prevailing corporatocracy and a capitalist system in crisis It examines a number of institutions and practices now being built in the nooks and crannies of present societies and that point beyond capitalism toward a more equal participatory and democratic society institutions such as cooperatives public banks the commons economic democracy This seminal collection of critical studies draws on academic and activist voices from the U S and Canada Mexico Cuba and Argentina and from a variety of theoretical political perspectives Marxism anarchism feminism and Zapatismo *Meaning, Subjectivity, Society* Karl E. Smith,2010-01-01 Who am I Who are we How are we to live This book grapples with these perennial questions primarily through a dialogue with Cornelius Castoriadis and Charles Taylor using an interdisciplinary hermeneutical approach examining issues of meaning subjectivity and modern society *Economic Crises and Global Politics in the 20th Century* Alexander Nützenadel,Cornelius Torp,2016-04-08 This book analyses the history of economic crises from the angle of international politics and its transformation throughout the 20th century While political and economic debates in the wake of the present financial crisis are revolving around the question of how to create effective forms of global governance historians have discovered a long tradition of international

economic regulation that can be traced back to the late 19th century In the global economy sovereign defaults banking crises and currency crashes have been recurrent phenomena At the same time alongside the growing globalization of commodity and capital markets nation states have introduced new forms of regulation both on the national and international level The experience of economic crises has been an important driver behind numerous initiatives to foster global politics The purpose of the book is to reconnect economic history with the perspectives of political economy and the history of international relations It forms a dialogue between the disciplines that have been increasingly separated throughout the past decades With first rate economic historians and political economists writing for a wider audience it simultaneously makes public debates and methods of recent cutting edge research in economic history within a wider academic community This book was originally published as a special issue of the European Review of History
