

## **Between Political Economy and Cultural Studies: Towards a Refinement of American Critical Communication Research**

Critical communication research in the United States may well be on the brink of a radical rethinking and rearticulation of its central problematic. Conducted primarily within the bounds of political economy, U.S. researchers have assembled an impressive array of political economic analyses of media industries and telecommunications policies (e.g., Danielian, 1939; Gandy, 1983; Guback, 1969; Mosco, 1982; Schiller, 1973; Smythe, 1957; Wasko, 1982, etc.). Augmenting this research has been a series of critical reflections on the state of communication research in the U.S. (e.g., Smythe, 1954; Gitlin, 1978) that has probed into the mainstream's theoretical and methodological assumptions revealing a deep-seated, often unspoken commitment to functionalism and psychologistic individualism. These theoretical commitments have been tied by critical researchers back into the mainstream's methodological commitment to variable analysis, which itself rests on an assumption that human and social experience can be separated into discrete particles for measurement and manipulation. For the past thirty years, then, this dialectic of research and critique has driven U.S. critical scholars. Similarly, in Britain, critical scholars, principally at the Leicester Centre, have combined political economy with a particularly sharp critique of the U.S. mainstream (e.g., Murdock and Golding, 1974, 1978; Halloran, 1981; Curran, Gurevitch, Woollacott, 1982, and Elliott, 1974). This meshed with the American work to form an especially strong and unified approach. Thus, for U.S. researchers, the focus for critical work was tightly centered on industrial structure with a tendency towards a reflection theory of ideology and reception. For Americans, until recently cross-fertilization with British critical research was limited primarily to the Leicester political economists.

However, unlike the U.S. where cultural studies has been largely in the hands of neo-Boasian idealists (Berger, 1973; Carey, 1978; Carey and Kreiling, 1974; Cawelti, 1971; Kreiling, 1978; Newcomb, 1974), in the U.K. an independent cultural studies rooted in materialist notions of collectivity and lived experience also flourished (e.g., Hall, 1980 a & b; Hall et al., 1978; Hebdige, 1979;

**The Political Economy of Information** Vincent Mosco, Janet Wasko, 1988 The information society is real Information as a marketable commodity is quickly taking up the powerful role once held by heavy industry and manufactured products How this revolution is affecting society and how society and government are responding to it is the subject of this book Its lessons and conclusions are of critical importance as we enter the last decade of this century Every dimension of social life whether in the home or the workplace is affected by information and the technologies that give it market value Along with the positive aspects of these broad changes there are inevitable problems the growing gap between the information rich and information poor the need for widespread access to communication and information technology the threat to individual privacy and the potential of the technology to create global instabilities The editors have enlisted specialists and scholars in business

**The Anarchist in the Library** Siva Vaidhyanathan, 2005-05-11 From Napster to Total Information Awareness to flash mobs the debate over information technology in our lives has revolved around a single question How closely do we want cyberspace to resemble the real world Siva Vaidhyanathan enters this debate with a seminal insight While we've been busy debating how to make cyberspace imitate the world the world has been busy imitating cyberspace More and more of our social political and religious activities are modeling themselves after the World Wide Web

Vaidhyanathan tells us the key information structure of our time and the key import from cyberspace into the world is the peer to peer network. Peer to peer networks have always existed but with the rise of electronic communication they are suddenly coming into their own. And they are drawing the outlines of a battle for information that will determine much of the culture and politics of our century affecting everything from society to terrorism from religion to the latest social fads. The Anarchist in the Library is a radically original look at how this battle defines one of the major fault lines of twenty first century civilization.
