Political Economy Of Third World Intervention:

The Political Economy of Third World Intervention David N. Gibbs, 1991-11 Interventionism the manipulation of the internal politics of one country by another has long been a feature of international relations The practice shows no signs of abating despite the recent collapse of Communism and the decline of the Cold War In *The Political Economy of Third World Intervention* David Gibbs explores the factors that motivate intervention especially the influence of business interests He challenges conventional views of international relations eschewing both the popular realist view that the state is influenced by diverse national interests and the dependency approach that stresses conflicts between industrialized countries and the Third World Instead Gibbs proposes a new theoretical model of business conflict which stresses divisions between different business interests and shows how such divisions can influence foreign policy and interventionism Moreover he focuses on the conflicts among the core countries highlighting friction among private interests within these countries Drawing on U S government documents including a wealth of newly declassified materials he applies his new model to a detailed case study of the Congo Crisis of the 1960s Gibbs demonstrates that the Crisis is more accurately characterized by competition among Western interests for access to the Congo's mineral wealth than by Cold War competition as has been previously argued Offering a fresh perspective for understanding the roots of any international conflict this remarkably accessible volume will be of special interest to students of international political economy comparative politics and business government relations This book is an extremely important contribution to the study of international relations theory Gibbs treatment of the Congo case is superb He effectively takes the statist to task and presents a compelling new way of analyzing external interventions in the Third World Michael G Schatzberg University of Wisconsin David Gibbs makes an original and important contribution to our understanding of the influence of business interests in the making of U S foreign policy His business conflict model provides a synthetic theoretical framework for the analysis of business government relations one which yields fresh insights overcomes inconsistencies in other approaches and opens new ground for important research Gibbs provides a sophisticated analysis of the conflicts within the U S business community and identifies the complex ways in which they interacted with agencies within the government to form U S foreign policy toward the Congo This is a well crafted analysis of a critical case of U S postwar intervention which should be of general interest to scholars and others concerned with the domestic bases of foreign policy Thomas J Biersteker Director School of International Relations University of Southern California

Canada, the Congo Crisis, and UN Peacekeeping, 1960-64 Kevin A. Spooner, 2010-01-01 In 1960 the Republic of Congo teetered near collapse as its first government struggled to cope with civil unrest and mutinous armed forces When the UN established what would become the largest peacekeeping operation of the Cold War the Canadian government faced a difficult decision Should it

support the intervention As Kevin Spooner demonstrates Canada's involvement in the mission was not preordained The Diefenbaker government became enmeshed in a complex web of foreign and defence policy determinants that caused it to have immediate and ongoing reservations that challenge cherished notions of Canada's commitment to the UN and its status as a peacekeeper This book offers one of the first detailed accounts of Canada's involvement in UN peacekeeping It will appeal to those interested in Canadian foreign policy and relations with Africa in particular and the Congo crisis and United Nations peacekeeping more generally

Economic Democracy: The Political Struggle of the 21st Century J. W. Smith, 2017-10-03 This title was first published in 1999 The author contends that economic democracy is the economic system the U S purports to have but has thus far failed to achieve because it like all the economic powers that have gone before seeks to control the economies of weaker nations It is the shocking lack of economic democracy and the efforts of so many to achieve it that fuels today's conflicts and will fuel those of the 21st century To show how and why this comprehensive work provides a detailed analysis of the history of numerous aspects of the development of the Neo Mercantilist world economy the geopolitical systems put in place by the developed world to manage and perpetuate that economy and the numerous proposals and modeling plans that have been offered over the years for the achievement of economic democracy

Power And Profits Ronald Cox, 2021-05-11 The cold war between the United States and the Soviet Union provided the context for U S policies toward Central America from the 1950s to the 1980s Nonetheless attitudes developed during the Cold War cannot explain the specific content of U S foreign policies toward the region Ronald W Cox argues that U S business interests have worked with policymakers to develop trade aid and investment policies toward Central America He reveals how the relationship between business groups and the state has been shaped by business competition national security considerations institutional structures and instability in the Central American countries Many see the state as autonomous and not influenced by business but Cox argues that business groups have been able to take advantage of specific international circumstances to promote economic policies thus increasing foreign investment At the same time division among business groups has affected foreign economic policies This book is a

objectives in the region Finally Yohannes considers the extent to which the American role in the African Horn aided or impeded the emergence of political democracy and the promotion of economic development within the region By juxtaposing this new method of examination with traditional approaches the book reveals a greater coherence in the structural relationship between U S policy and the politics of the African Horn Skillfully incorporating informative background material regarding the history politics and diplomacy of the countries covered by the study Yohannes addresses the interests of both the specialist and the general reader

Decolonisation and Regional Geopolitics Lazlo Passemiers,2019-03-11 Decolonisation and Regional Geopolitics argues that as much as the Congo crisis 1960 1965 was a Cold War battleground so too was it a battleground for Southern Africa s decolonisation This book provides a transnational history of African decolonisation apartheid diplomacy and Southern African nationalist movements It answers three central questions First what was the nature of South African involvement in the Congo crisis Second what was the rationale for this involvement Third how did South Africans perceive the crisis Innovatively the book shifts the focus on the Congo crisis away from Cold War intervention and centres it around African decolonisation and regional geopolitics

Business And The State In International Relations Ronald W Cox,2019-04-11 Challenging the traditional notion that state officials act autonomously in formulating and implementing international policy the contributors to this volume argue that the influence of organized business groups has been consistently underestimated in recent decades Each uses a business conflict model of state society relations as a new paradigm

Promoting U.S. Investment in Sub-Saharan Africa R. Hendrickson,2014-08-19 Addressing an under studied aspect of U S foreign policy towards sub Saharan Africa Hendrickson provides a critical historical analysis of institutions designed to

promote private investment in the region She draws attention to the interaction between strategic factors domestic interests and the ideas used to achieve consensus on policy *The diplomacy of decolonisation* Alanna O'Malley,2018-01-31 The book reinterprets the role of the UN during the Congo crisis from 1960 to 1964 presenting a multidimensional view of the organisation Through an examination of the Anglo American relationship the book reveals how the UN helped position this event as a lightning rod in debates about how decolonisation interacted with the Cold War By examining the ways in which the various dimensions of the UN came into play in Anglo American considerations of how to handle the Congo crisis the book reveals how the Congo debate reverberated in wider ideological struggles about how decolonisation evolved and what the role of the UN would be in managing this process The UN became a central battle ground for ideas and visions of world order as the newly independent African and Asian states sought to redress the inequalities created by colonialism the US and UK sought to maintain the status quo while the Secretary General Dag Hammarskjöld tried to reconcile these two contrasting views **Military Interventions in Civil Wars** Kamil C. Klosek,2021-09-28 This book examines the motivations of military interventions in civil wars with a focus on the role of foreign direct investment FDI and the arms trade The book assumes a state centric view of international relations whereby states remain the dominant actors on the world stage It breaks away from the conventional wisdom that military interventions for economic interests are a product of domestic corporate lobbying and instead argues that states intervene to protect but not advance existing corporate investments for national strategic interests The work introduces new concepts of military interventions proxy interventions and indirect interventions which are determined by arms trade relationships between the permanent members of the United Nations Security Council UNSC and recipient countries and utilizes insights from principal agent theory whereby the permanent members of the UNSC delegate military interventions in civil wars to other countries The book concludes by examining the transformative effect of FDI on the willingness of a state to intervene militarily in a civil war focusing on the case of China in Sub Saharan Africa Provided that the current positive trends in FDI and arms trade persist we are likely to see more and not fewer military interventions in the future This book will be of much interest to students of civil wars military interventions security studies and International Relations
