financial crisis of 1997-99 was the most important international economic event since the oil shocks of the 1970s and the associated debt crisis of the 1980s. What were its political causes and consequences? In particular, how did interest group coalitions and political institutions affect pre-crisis economic policies and post-crisis responses? This book focuses on how policymaking coalitions are formed and how political institutions mediate the pressure of rival coalitions. This approach is applied to 13 countries drawn from the main crisis-affected regions of the world economy: East Asia, Southeast Asia, Latin America, and Eastern Europe. *Behind East Asian Growth* Henry S. Rowen, 2002-11-01. East Asian countries have adopted remarkably good policies to ensure sustained economic growth, but how did they come to adopt such policies in the first place? This book produces a more thorough explanation than has previously been advanced, drawing on several disciplines, including contributions from anthropologists, economists, political scientists, technologists, demographers, historians, and psychologists. Several contributors have held high positions in Asian governments. Four broad themes are identified: effective governance, achieving and learning, societies, growth with equity, and external influences. This is the most comprehensive account of the foundations of East Asia's rise. Its distinctiveness lies in the range of comparisons across the countries of East and South East Asia and in the wide array of contributing disciplines. **Transnational European Union** Wolfram Kaiser, Peter Starie, 2005-11-16. At the beginning of the twenty-first century, the European Union is an increasingly dense transnational social and political space. More and more non-governmental organisations develop transnational links which are usually more intensive within the EU, even if they often extend beyond its borders to the wider world. This multi-disciplinary volume explores the importance of these structures, actors, and relations for EU and European governance in the context of the theoretical debate about European integration in the social sciences. This book delivers theoretical chapters examining and discussing the main conceptual perspectives to studying the transnational EU, to provide a current overview, empirical case studies of transnationalism in practice on transnational party, trade union, and police cooperation, to transnational education, policy making, and transnational consensus building in EMU governance. This volume will be of great interest to students in social sciences, contemporary history, and law. **Selected Themes in African Political Studies** Lucky Asuelime, Suzanne Francis, 2014-08-04. Against the background of a long and continuing record of political instability in Africa, this edited collection presents a multi-disciplinary approach to selected issues in African political studies. The contributions explore a range of political and conflict situations, discuss efforts to develop indigenous conflict resolution mechanisms, and consider some of the key political and economic issues facing the continent. The specific country studies illuminate the diversity of the African continent and indicate the ways in which the political and socio-economic contexts of African states bear directly upon the ability of states to solve political and economic challenges. The volume seeks to present and promote novel analytical frameworks, conceptual approaches, and empirical accounts of relevance to scholars working on Africa and to practitioners and policy makers in politics, governance, and peace initiatives in Africa.
