Tokes,2016-01-13      **The Socialist Industrial State** David Lane,2023-06-14 *The Socialist Industrial State* 1976 examines the state socialist system taking as the central example the Soviet Union where the goals and values of Marxism Leninism and the particular institutions the form of economy and polity were first adopted and developed It then considers the historical developments differences in culture the level of economic development and the political processes of different state socialist countries around the globe      *Problems of Communism* ,1969      **The State against Society** Grzegorz Ekiert,1996-09-30 Classical images of state socialism developed in contemporary social sciences were founded on simple presuppositions State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday lives of their citizens impervious to reform and change and representative of extreme political and economic dependency Despite their contrasting historical experiences they have been treated as basically identical in their institutional design social and economic structures and policies Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post 1945 East Central Europe Hungary 1956 63 Czechoslovakia 1968 76 and Poland 1980 89 The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status He explores how political crises reshaped party state institutions redefined relations between party and state institutions altered the relationship between the state and various groups and organizations within society and modified the political practices of these regimes He shows how these events transformed cultural categories produced collective memories and imposed long lasting constraints on mass political behavior and the policy choices of ruling elites These crises shaped the political evolution of the region produced important cross national differences among state socialist regimes and contributed to the distinctive patterns of their collapse      **The State in**

**Socialist Society** Neil Harding, 1984-06-30 The focus of all the essays in this collection is the problem of state power in Communist regimes The problematic nature of the relationship between state and society has troubled the marxist tradition since its inception and continues to be an unresolved issue for its contemporary theorists Western attempts to characterise the state formations of Communist regimes are equally notoriously debatable and fraught with methodological problems Both indigenous and Western attempts to theorise these formations are thoroughly reviewed in the early chapters of this book Later chapters each written by an expert in the field go on to explore particular issues the problem of nationalism within a multi national state for instance or the recent experience of selected Communist regimes in attempting to adapt their institutions to meet new problems Special attention is paid to the USSR in view of the enormous significance of the Soviet State and the extent to which it has served as a model Other case studies have been included on the basis that these state formations display unique features Yugoslavia that size and importance commends them China or that failure in the process of institutional adaptation is instructive for their pathology Poland What this book sets out to do is to bring a variety of approaches and a varied expertise to bear upon a very large but relatively neglected issue in contemporary politics the nature of the state formations of Communist regimes
