*The Political Mobilization of the European Left, 1860-1980* Stefano Bartolini, 2000-08-28 In an in depth comparative analysis Stefano Bartolini studies the history of socialism and working class politics in Western Europe While examining the social contexts organizational structures and political developments of thirteen socialist experiences from the 1860s to the 1980s he reconstructs the steps through which social conflict was translated and structured into an opposition as well as how it developed its different organizational and ideological forms and how it managed more or less successfully to mobilize its reference groups politically

*Democracy and the Left* Evelyne Huber, John D. Stephens, 2012-09 Although inequality in Latin America ranks among the worst in the world it has notably declined over the last decade offset by improvements in health care and education enhanced programs for social assistance and increases in the minimum wage In *Democracy and the Left* Evelyne Huber and John D Stephens argue that the resurgence of democracy in Latin America is key to this change In addition to directly affecting public policy democratic institutions enable left leaning political parties to emerge significantly influencing the allocation of social spending on poverty and inequality But while democracy is an important determinant of redistributive change it is by no means the only factor Drawing on a wealth of data Huber and Stephens present quantitative analyses of eighteen countries and comparative historical analyses of the five most advanced social policy regimes in Latin America showing how international power structures have influenced the direction of their social policy They augment these analyses by comparing them to the development of social policy in democratic Portugal and Spain The most ambitious examination of the development of social policy in Latin America to date *Democracy and the Left* shows that inequality is far from intractable a finding with crucial policy implications worldwide

**Roads to the Radical Right** Koen Damhuis, 2020-10-01 Trump Wilders Salvini Le Pen during the last decades radical right wing leaders and their parties have become important political forces in most western democracies Their growing appeal raises an increasingly relevant question who are the voters that support them and why do they do so Numerous and variegated answers have been given to this question inside as well as outside academia Yet curiously despite their quantity and diversity these existing explanations are often based on a similar assumption that of homogeneous electorates Consequently the idea that different subgroups with different profiles and preferences might coexist within the constituencies of radical right wing parties has thus far remained underdeveloped both theoretically and empirically This ground breaking book is the first one that systematically investigates the heterogeneity of radical right wing voters Theoretically it introduces the concept of electoral equifinality to come to grips with this diversity Empirically it relies on innovative statistical analyses and no less than 125 life history interviews with voters in France and the Netherlands Based on this unique material the study identifies different roads to the radical right and compares them within a cross national perspective In addition through an analysis of almost 1400 tweets posted by Geert Wilders and Marine Le Pen the book shows how the latter are able to appeal to different groups of voters Taken together the book thus provides a host of important new insights into the heterogeneous phenomenon of radical right support

politics is essential in framing the struggles about the direction of NEG along a commodification decommodification axis rather than a national EU axis To shed light on corresponding processes at EU level it upscales insights on the historical role that labour movements have played in the development of democracy and welfare states This title is also available as Open Access on Cambridge Core      Property Without Rights Michael Albertus,2021-01-07 A new understanding of the causes and consequences of incomplete property rights in countries across the world      *Who Wants What?* David Rueda,Daniel StegmueLLer,2019-10-17 Counters existing approaches to the reasons why some people support redistribution and others do not      *Why Bother?* S. Erdem Aytaç,Susan C. Stokes,2019-01-10 Why do vote suppression efforts sometimes fail Why does police repression of demonstrators sometimes turn localized protests into massive national movements How do politicians and activists manipulate people s emotions to get them involved The authors of *Why Bother* offer a new theory of why people take part in collective action in politics and test it in the contexts of voting and protesting They develop the idea that just as there are costs of participation in politics there are also costs of abstention intrinsic and psychological but no less real That abstention can be psychically costly helps explain real world patterns that are anomalies for existing theories such as that sometimes increases in costs of participation are followed by more participation not less The book draws on a wealth of survey data interviews and experimental results from a range of countries including the United States Britain Brazil Sweden and Turkey
