Political Opposition In Post Confucian Society:

Political Opposition in Post-Confucian Society Peter R. Moody, 1988-10-06 Moody presents the thesis that post Confucian societies are influenced by the legacy of a strong state ruling over a weak social structure. Ruling and opposition elites thus tend toward factionalism based on personal ties and also to moralistic rather than interest based criticism which often leads to extreme and irresponsible political behavior. Moody applies this thesis to all the post Confucian states of East Asia in uneven chapters on Taiwan, South Korea, South Vietnam, China, North Korea, Vietnam as a whole, and Japan. Moody's witty and cynical style and an elegant thesis make this work suitable for advanced undergraduates and graduate students as well. No country in the Confucian cultural area has shown great tolerance for competitive politics. China, Taiwan, the two Koreas, and Vietnam are either authoritarian or totalitarian in political structure. Thus Peter R. Moody Jr. begins his comparative study of the historical backgrounds and contemporary political situations in post Confucian states. *Political Opposition in Post Confucian Society* studies the obstacles to democratization in East Asia. Japan writes Moody of the only exception to the political structure of this region has not yet proven itself a competitive democracy and the present democratic system was imposed by foreign occupation. This book demonstrates how a similar logic of politics pervades these societies despite differences in culture and political institutions. Moody provides an up to date analysis of politics in these countries and examines contemporary developments in a historical and cultural context.

Cotton, 2002 The impact across borders of transnational identities business links and ideas has been on the international political agenda for a long time These cross border phenomena have a steady and profound influence on domestic politics and international relations However they also represent a challenge because these factors can subvert accustomed views of sovereignty The essays in this book stress the diversity and influence as well as the limitations of cross border phenomena in the Asia Pacific a region home to the principles of non interference and respect for autonomy Emerging from this collection is a picture of an area dynamically affected by the penetration of ideas organised interests and financial flows Though national borders have become more porous state power and local identities still resist shape and modify cross border influences

East Asian Democratization Robert W. Compton, 2000-09-30 It may be tempting to view political development and democratization in East Asia from a global view and conclude that the contours of democracy will converge throughout the world However a close examination of the cultural and economic development of Asian societies suggests a contrary picture The story of Asia is one of political and economic survival in which political elites sought to legitimate their authority through the use of both traditional and modern symbols Traditional communitarian values and the modern symbols of economic growth and materialism coexist in Asian political systems The stability and legitimacy of Asian governments depend on the ability of political elites to balance these symbols As globalization proceeds the standard traditional and modern symbols have waned in their effectiveness Therefore democracy as a symbol and practice can provide new sources of legitimacy to these political systems Compton's Asian political development model is tested with quantitative indicators and through a series of case studies The three case studies Japan South Korea and Thailand build on each other through a rigorous historical comparison While the case studies themselves are interesting he makes connections to the model and tests the congruence of these cases to the model and concludes that the model's validity is predicated on the internal environment including culture and economy Of particular interest to scholars students and researchers involved with comparative and Asian politics political development and political culture *Chinese Pol Culture, 1989-2000* , An analysis of Chinese political culture It is divided into three major areas Chinese identities and popular culture including regional identities public opinion surveys the Beijing area Chinese workers the Shanghai area and ideological debates such as the new Confucianism
