Aiding Violence Peter Uvin,1998 Includes statistics

Knowing the Adversary Keren Yarhi-Milo,2014-07-21 States are more likely to engage in risky and destabilizing actions such as military buildups and preemptive strikes if they believe their adversaries pose a tangible threat Yet despite the crucial importance of this issue we don t know enough about how states and their leaders draw inferences about their adversaries long term intentions Knowing the Adversary draws on a wealth of historical archival evidence to shed new light on how world leaders and intelligence organizations actually make these assessments Keren Yarhi Milo examines three cases Britain s assessments of Nazi Germany s intentions in the 1930s America s assessments of the Soviet Union s intentions during the Carter administration and the Reagan administration s assessments of Soviet intentions near the end of the Cold War She advances a new theoretical framework called selective attention that emphasizes organizational dynamics personal diplomatic interactions and cognitive and affective factors Yarhi Milo finds that decision makers don t pay as much attention to those aspects of state behavior that major theories of international politics claim they do Instead they tend to determine the intentions of adversaries on the basis of preexisting beliefs theories and personal impressions Yarhi Milo also shows how intelligence organizations rely on very different indicators than decision makers focusing more on changes in the military capabilities of adversaries Knowing the Adversary provides a clearer picture of the historical validity of existing theories and broadens our understanding of the important role that diplomacy plays in international security

US Counter-Terrorism Strategy and al-Qaeda Joshua A. Geltzer,2009-09-10 This book examines the communicative aspects and implications of US counter terrorist policies towards al Qaeda Recent US counter terrorist strategy has been largely based upon projecting certain perceptions of America as an actor to those drawn to al Qaeda and this book investigates in what ways and to what extent US

officials believed that the signals sent by what America did and said could influence the behaviour of the terrorist and would be terrorist. The study then draws on a growing understanding of that audience to analyse how those drawn to al Qaeda were and indeed still are likely to be influenced by the perceptions of America that Washington's policies generated. The study's central argument is that given al Qaeda's unconventional strategy and the particularities of the world view characterising those drawn to the group, America's counter terrorist signalling proved largely counter productive to America's objective of undermining al Qaeda's strategic narrative instead serving in many ways to validate it. Firstly this book seeks to reveal the significant and largely unexplored role that signalling has played in US counter terrorist policy towards al Qaeda. Second it tries to capture the objectives, strategy, tactics, ideology and other defining features of the world view characterising those drawn to al Qaeda. Third it strives to combine those two lines of inquiry by applying the al Qaeda world view to a critical analysis of the signals sent by US policies. Finally the book aims to offer broad policy implications that demonstrate how an informed understanding of the world view of those drawn to al Qaeda can be employed to revise and refine American counter terrorist signalling. This book will be of much interest to students of US foreign policy and public diplomacy, counter terrorism strategy and international security. Joshua Alexander Geltzer has a PhD in War Studies from Kings College London and is currently a juris doctoral student at Yale Law School.

Apprehending Politics Marco Calavita, 2012-02-01. This groundbreaking book examines the significance of the news media for the political beliefs and behavior of contemporary Americans. Relying on original in depth interviews with members of the group known as Generation X, Marco Calavita analyzes the memories and understandings of these individuals' political development dating back to childhood. Specifically he focuses on the developmental significance of news media engagement in the context of institutions and phenomena like family, peers, schooling and popular culture. Calavita succeeds where others have failed at exploring the inevitably contextualized and ecological nature of individual political development and the specific roles of news media in that development. *Apprehending Politics* illuminates the subtle but fundamental power of news media in who we are politically and how we got that way.

Collateral Damage Nicholas Khoo, 2011-02-21 Although the Chinese and the Vietnamese were Cold War allies in wars against the French and the Americans their alliance collapsed and they ultimately fought a war against each other in 1979 More than

thirty years later the fundamental cause of the alliance's termination remains contested among historians international relations theorists and Asian studies specialists Nicholas Khoo brings fresh perspective to this debate Using Chinese language materials released since the end of the Cold War Khoo revises existing explanations for the termination of China's alliance with Vietnam arguing that Vietnamese cooperation with China's Cold War adversary the Soviet Union was the necessary and sufficient cause for the alliance's termination He finds alternative explanations to be less persuasive These emphasize nonmaterial causes such as ideology and culture or reference issues within the Sino Vietnamese relationship such as land and border disputes Vietnam's treatment of its ethnic Chinese minority and Vietnam's attempt to establish a sphere of influence over Cambodia and Laos Khoo also adds to the debate over the relevance of realist theory in interpreting China's international behavior during both the Cold War and post Cold War eras While others see China as a social state driven by nonmaterial processes Khoo makes the case for viewing China as a quintessential neorealist state From this perspective the focus of neorealist theory on security threats from materially stronger powers explains China's foreign policy not only toward the Soviet Union but also in relation to its Vietnamese allies
