The Political Theory of Global Citizenship April Carter, 2001 This book provides a comprehensive overview of the meaning of cosmopolitanism and world citizenship in the history of western political thought and in the evolution of international politics since 1500

The Political Theory of Global Citizenship April Carter, 2013-07-04 This book provides a comprehensive overview of the meaning of cosmopolitanism and world citizenship in the history of Western political thought and in the evolution of international politics since 1500 Providing an invaluable overview of earlier political thought recent theoretical literature and current debates this book also discusses recent developments in international politics and transnational protest It will be of great interest to those specialising in political theory International Relations and peace conflict studies It will also interest those already acting as global citizens

Democracy at the Crossroads Cameron White, Roger Openshaw, 2005-01-01 In *Democracy at the Crossroads* the editors argue that there have been too few scholarly attempts to provide a comprehensive critique of the assumptions behind citizenship education In particular they ask the distinguished contributors to this volume to address difficult but essential questions that are often avoided or intentionally overlooked What do all embracing terms like global citizenship really mean What does democracy mean internationally A timely work *Democracy at the Crossroads* provides a necessary examination and re interpretation of international perspectives on democracy and global citizenship as they apply to social education

The Practice of Global Citizenship Luis Cabrera, 2010-10-14 In this novel account of global citizenship Luis Cabrera argues that all individuals have a global duty to contribute directly to human rights protections and to promote rights enhancing political integration between states *The Practice of Global Citizenship* blends careful moral argument with compelling narratives from field research among unauthorized immigrants activists seeking to protect their rights and the Minuteman activists striving to keep them out Immigrant rights activists especially those conducting humanitarian patrols for border crossers stranded in the brutal Arizona desert are shown as embodying aspects of global citizenship Unauthorized immigrants themselves are shown to be enacting a form of global civil disobedience claiming the economic rights central to the emerging global normative charter while challenging the restrictive membership regimes that are the norm in the current global system Cabrera also examines the European Union seeing it as a crucial laboratory for studying the challenges inherent in expanding citizen membership

Global Citizenship Education, 2008-01-01 The essays in this edited collection argue that global citizenship education realistically must be set against the imperfections of our contemporary political realities As a form of education it must actively engage in a critically informed way with a set of complex inherited historical issues that emerge out of a colonial past and the savage globalization which often perpetuates unequal power relations or cause new inequalities The essays in the book explore these issues and the emergent world ideologies of globalism as well as present territorial conflicts ethnic tribal and nationalist rivalries problems of increasing international migration and asylum growing regional imbalances and

increasing world inequalities Contributors to this collection each on their own way argues that global citizenship education needs to project new values to reality test and debate the language concepts and theories of global citizenship and the proto world institutions that seek to give expression to nascent aspirations for international forms of social justice and citizen participation in world government Many of the contributors argue that global citizenship education offers the prospect of extending the liberal ideologies of human rights and multiculturalism and of developing a better understanding of forms of post colonialism One thing is sure as the essays presented in this book demonstrate so clearly there can be no one dominant notion of global citizenship education as notions of global citizenship and education are all contested and open to further argument and revision Global citizenship education does not name the moment of global citizenship or even its emergence so much as the hope of a form of order where the rights of the individual and of cultural groups irrespective of race gender ethnicity or creed are observed preserved and protected by all governments in order to become the basis of citizen participation in new global spaces that we might be tempted to call global civil society

World Governance Jovan Babić, Petar Bojanić, 2010 Do we need and could we attain a world government capable of insuring the peace and facilitating worldwide well being in a just and efficient way This book explores how theorists have focused on the necessary components of an effective global order

The Political Economy of Global Citizenship Education Vanessa De Oliveira Andreotti, 2016-03-16 This edited collection offers analyses of global citizenship education within and across different national contexts This book illustrates the contingency of definitions the complexities of juxtaposing demands and priorities in different educational contexts and the difficulties and tensions of asking a question that is arguably one of the most pressing of our time how should we live together in interdependent ecologies in a finite planet In the discipline of education where market imperatives and the dictatorship of effective replicable results have laid siege to independent debates this book aims to emphasize the importance of raising our intellectual game as educators to interrupt new and old problematic patterns of engagements representations uncomplicated solutions and conceptual straightjackets Contributors to this volume address the tensions between homogenizing universalisms and parochial specificisms ethnocentrisms and relativisms deficit theorizations and romanticizations of difference fantasies of supremacy and paralyse in guilt the global and the local The chapters take different approaches to map the origins meanings workings ethics politics and implications of initiatives approaches and conceptual frameworks related to the ideas of globalization citizenship and education in different sites of knowledge production This book was originally published as a special issue of Globalisation Societies and Education

Education for Sustainable Development Chris Shiel, 2007 **International Law** Doris E Buss, Ambreena Manji, 2005-06-21 This book brings together feminist scholars to explore the directions and tensions in feminist engagement with various areas of international law

The Dimensions of Global Citizenship Darren J. O'Byrne, 2004-11-23 The Dimensions of Global Citizenship takes issue with the assumption that ideas about global citizenship are merely Utopian

ideals The author argues that far from being a modern phenomenon world citizenship has existed throughout history as a radical alternative to the inadequacies of the nation state system Only in the post war era has this ideal become politically meaningful This social transformation is illustrated by references to the activities of global social movements as well as those of individual citizens *Citizenship* Elizabeth F. Cohen, Cyril Ghosh, 2019-07-09 Although we live in a period of unprecedented globalization and mass migration many contemporary western liberal democracies are asserting their sovereignty over who gets to become members of their polities with renewed ferocity Citizenship matters more than ever In this book Elizabeth F Cohen and Cyril Ghosh provide a concise and comprehensive introduction to the concept of citizenship and evaluate the idea s continuing relevance in the 21st century They examine multiple facets of the concept including the classic and contemporary theories that inform the practice of citizenship the historical development of citizenship as a practice and citizenship as an instrument of administrative rationality as well as lived experience They show how access to a range of rights and privileges that accrue from citizenship in countries of the global north is creating a global citizenship based caste system This skillful critical appraisal of citizenship in the context of phenomena such as the global refugee crisis South North migration and growing demands for minority rights will be essential reading for students and scholars of citizenship migration studies and democratic theory Choice, 2009 **A Passion for Politics** Graham Maddox, 2005 In this volume marking Graham Maddox s 65th birthday and his recent retirement Australian and International scholars celebrate the force and breadth of his work by writing on topics that connect with his many interests John Gray and the Problem of Utopia John Hoffman, 2008 This book explores the work of John Gray controversial and widely read contemporary philosopher This comprehensive volume links a critique of Gray s views on Marxism humanism and the Enlightenment as well as his deep pessimism with his position that attempts to tackle the core of issues like globalization and multiculturalism are hopelessly utopian Challenging these and other assumptions in Gray s work in a clear and accessible way John Hoffman focuses his criticism on the philosopher s traditionalist and problematic conception of utopia in the modern world

Transnational Democracy in Critical and Comparative Perspective Bruce Morrison, 2003 This book brings together two themes of enormous current intellectual and emotional impact democracy and its institutional forms and the globalization of economic social and cultural affairs The volume pursues the meaning of transnational democracy through an examination of the sources of novel democratic potential at multiple levels from the local to the global To a very great extent this task depends upon a critical analysis of state and nation formation state level democratization and transnational social movement emergence In engaging these complex issues the authors find themselves drawn into intellectual and geographic territories as diverse as European institutional and intellectual history North American and European trade agreements Canadian constitutionalism African state society relations and debates regarding the democratic peace While the coverage is global in its attention to transnational institutions and international non governmental organizations for instance it is also

genuinely regional as it seeks out and critically assesses the potential building blocks for a more appropriately democratic future in the varied forms that the institutionalization of globalization assumes around the world **Christian Scholar's Review**, 2004 **British Humanities Index**, 2006 **Globalisation and Citizenship** Wayne Hudson, Steven Slaught, 2007-04-11 This wide ranging volume explores the impact of globalization upon citizenship with a special focus on the transnational challenges that globalization poses While there is much debate over the concept globalization implies at least two distinct phenomena First it suggests that political economic and social activities are becoming increasingly inter regional or intercontinental in scope Secondly it suggests that there has been an intensification of levels of interaction and interconnectedness between states and societies Citizenship as one of the foundational concepts of the modern liberal democratic states provides the normative framework within which globalization debates may be understood and evaluated It also examines how different concepts theories and practices of citizenship are evolving in response to globalization Central questions explored in this text are How does globalization challenge traditional conceptions of citizenship in specific respects How is globalization creating new citizenships or new civil society spaces How is transnational citizenship developing and what problems are associated with it in specific areas Discussing the theoretical and practical prospects for new forms of liberal republican and cosmopolitan citizenship *Globalisation and Citizenship* will appeal to students and scholars in the fields of international relations globalization sociology and political science *Global Citizenship* Nigel Dower, John Williams, 2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company *Global Citizenship and the Legacy of Empire* April Biccum, 2012-08-06 This book investigates the parallels between mainstream development discourse and colonial discourse as theorized in the work of Homi Bhabha Gayatri Spivak and Edward Said Aiming to repoliticize post colonial theory by applying its understandings to contemporary political discourses author April Biccum critically examines the ways in which development in its current form has recently begun to be promoted among the metropolitan public Biccum contends that what has begun is a sustained marketing campaign for development that is a repetition augmentation and ultimately much greater success of the work of the Empire Marketing Board of 1926 Demonstrating how this marketing campaign for development attempts to facilitate support for neo liberal globalization Biccum contends that this theatre of legitimation is emerging in response to growing critical voices and counter hegemonic activity on the international stage Featuring in depth analyses of the UK cultural values DfID the commemoration of the slave trade and campaigns including Live8 and Make Poverty History this book will be of interest to students and scholars of postcolonial studies development studies and international political economy It will also offer insights valuable to a wider range of subjects including critical theory and globalization studies
