**Political Issues in New Zealand Education** John A. Codd, Richard Kendall Harker, Roy Nash, 1990      **Reforming New Zealand Secondary Education** R. Openshaw, 2009-08-31 This timely book argues that the New Zealand educational reforms were the product of longstanding unresolved educational issues that came to a head during the profound economic and cultural crisis of the 1970s and early 1980s      *Encyclopedia of Language and Education* Ruth Wodak, David Corson, 1997 Made up of eight volumes the Encyclopedia of Language and Education is the first attempt at providing an overview of the subject      **Education and Society** Len Barton, 2006-11-22 The British Journal of Sociology of Education has established itself as the leading discipline based publication This collection of selected articles published since the first issue provides the reader with an informed insight and understanding of the nature range and value of sociological thinking its development over the last twenty five years as well as the analysis of the relationship between society and education Divided into four sections the book covers social theory and education social inequality and education sociology of institutions curriculum and pedagogy research practices in the sociology of education The intention of this form of organisation is to provide the reader with an awareness and understanding of multiple perspectives within the discipline as well as key conceptual theoretical and empirical material including a wealth of insights ideas and questions The editor's specially written introduction to each section contextualises the selection and introduces readers to the main issues and current thinking in the field      *Equality and Inequality in Education Policy* Liz Dawtrey, 1995 Discusses the history and gendered nature of education policy and the impact of policies on practice in education The articles represent a range of views and approaches to education demonstrating the complexity of educational experience and the influence of class race culture and gender      *Systems of Education* Sohan Modgil, Mal Leicester, 2005-07-28 Volume 1 is concerned with the theoretical and conceptual framework for reflecting about values culture and education and thus provides an introduction to the series as a whole It provides state and policy level analysis across the world      **Educational Policy and the Politics of Change** Miriam Henry, Bob Lingard, Fazal Rizvi, Sandra Taylor, 2013-01-11 Governments around the world are trying to come to terms with new technologies new social movements and a changing global economy As a result educational policy finds itself at the centre of a major political struggle between those who see it only for its instrumental outcomes and those who see its potential for human emancipation This book is a successor to the best selling Understanding Schooling 1988 It provides a readable account of how educational policies are developed by the state in response to broader social cultural economic and political changes which are taking place It examines the way in which schools live and work with these changes and the policies which result from them The book examines policy making at each level from perspectives both inside and outside the state bureaucracy It has a particular focus on social justice Both undergraduate and postgraduate students will find that this book enables them to understand the reasoning behind the changes they are expected to implement It will help to prepare them to confront an

uncertain educational world whilst still retaining their enthusiasm for education      Political Philosophy, Educational Administration and Educative Leadership Reynold Macpherson, 2013-10-01 In this book Reynold Macpherson initiates a politically critical theory of educative leadership as a fresh line of inquiry in the practice research and theory of educational administration and educational leadership Divided into four parts the book introduces the sub discipline of political philosophy to the field of educational administration management and leadership It does this by clarifying the knowledge domain of each and identifying how four political ideologies specifically pragmatism communitarianism communicative rationalism and egalitarian liberalism have primarily informed and surreptitiously provided contestable justifications for power in the development of practice research and theory in the field of study The book goes on to offer three case studies illustrating how political philosophy can be used to interpret how people become leaders and administrators of educational institutions and systems Additional case studies then demonstrate how crises in governance in educational institutions and systems can be analyzed and improvements made using the tools of political philosophy The final part uses the sub discipline to critique the author's decades of research into educative leadership and concludes the book by both establishing the relativity of politically critical critique and the ideology it favours neo pragmatism Political Philosophy Educational Administration and Educative Leadership will provide practitioners researchers and theorists in educational administration management and leadership with a deeper appreciation of power by formally introducing them to the assumptions limits and tools of political philosophy      *Historical Perspectives on Teacher Preparation in Aotearoa New Zealand* Tanya Fitzgerald, Sally Knipe, 2019-07-11 This book documents and critiques the historical origins and historiography of schooling and teacher preparation in New Zealand The country has a unique educational history as the overview of the history and development of schools for the nation's children both Pakeha European and Maori will highlight      **Trading in Futures** Sue Watson, Sletske Waslander, Martin Strathdee, Ibrahim Simiyu, Ann Dupuis, Jennie Hamlin, 1999-05-16 This book shows that the faith in educational markets is misplaced Throughout the English speaking world and now Western Europe and parts of East Asia parental choice and educational markets are being seen by politicians and policy advisors as the panacea to problems of low educational standards and social exclusion This book is the first to systematically test the key assumptions underlying the faith in markets by linking an analysis of parental choice to flows of students between schools and their impact on school effectiveness The results of this study suggest that the ability to realize choices is dependent on social class gender and ethnicity and that this can have a negative impact on some schools performance Rather than raising standards the impact of markets is to polarise them leading to an impoverished education for many students This important book will be vital reading for students of educational policy sociology of education and school effectiveness and improvement educational researchers academics and policymakers      A Companion to Research in Teacher Education Michael A. Peters, Bronwen Cowie, Ian Menter, 2017-05-31 This state of the art Companion assembles and assesses the extant research available on teacher

education and provides clear guidelines on future directions It addresses an important need in a collection that will be of value for teachers teacher educators policymakers and politicians There has been little sustained long term or systematic research to provide empirical support for the broad aspects of teacher education policy largely because such research has been chronically underfunded and based on traditional practitioner knowledge Many of the changes to teacher education are contentious and yet are occurring in rapid succession These policies and movements have important consequences for education teacher quality and the future of the teaching profession At the same time the policies and initiatives that support these changes seem to be based more on ideology business interests and tradition than on research and empirical findings The nature quality and effectiveness of teacher preparation have increasingly become a central focus for education policy worldwide in a fiercely argued debate among governments think tanks world policy agencies education researchers and teacher organisations
