The Struggle for Control of the Modern Corporation Robert F. Freeland, 2001 Winner of the 2005 Business History Review Newcomen Award for best book in business history The Struggle for Control of the Modern Corporation provides a fascinating historical overview of decision making and political struggle within one of America s largest and most important corporations Drawing on primary historical material Robert Freeland examines the changes in General Motors organization between the years 1924 and 1970 He takes issue with the well known argument of business historian Alfred Chandler and economist Oliver Williamson who contend that GM s multidivisional corporate structure emerged and survived because it was more efficient than alternative forms of organization This book illustrates that for most of its history GM intentionally violated the fundamental axioms of efficient organization put forth by these analysts It did so in order to create cooperation and managerial consent to corporate policies Freeland uses the GM case to re examine existing theories of corporate governance arguing that the decentralized organizational structure advocated by efficiency theorists may actually undermine cooperation and thus foster organizational decline

Joining Political Organisations Laura Morales, 2009-04-01 From political parties to environmental organisations citizens join a host of associations in order to influence policymaking and political agendas Yet why in some western democracies do citizens join political organisations much more than in others Drawing on a large number of crossnational surveys and data sets Morales shows that huge crossnational variations in political membership are not so much related to social or attitudinal differences between these countries citizens but are

explained to a great extent by the structure of the political system of each nation *Policy Analysis in Taiwan* Yu-Ying Kuo, 2015-04-21 The study of policy analysis in Taiwan began in the 1970s however while other countries have recognised the need for detailed examination of the theory and practice of policy analysis at different levels of government Taiwanese studies have remained limited This book brings together for the first time a team of experienced and highly respected researchers from across Taiwan with expertise in policy analysis theory and practice in specific areas of government as well as in non governmental organisations This is a well structured volume which will be highly relevant for students and academics interested in understanding and analysing politics and policy making in Taiwan Features of the ILPA series include a country specific systematic study of policy analysis systems by government and non governmental actors a history of the country s policy analysis empirical case studies and a comparative overview of alternative approaches a key reference collection for research and teaching in comparative policy analysis and policy studies Commodifying Communism David L. Wank, 1999 *Commodifying Communism* is an ethnographically grounded account of the institutional organization and political consequences of China s historically unprecedented market growth Drawing upon almost two years of ethnographic fieldwork this book challenges conventional views of post communist emerging markets being tied to the retreat of the state David Wank shows how entrepreneurs running private trading companies in Xiamen City Fujian Province one of China s five special economic zones maximize profit and security through patron client networks with local state agents The book examines how processes of opportunity exchange expectations and advantage are constrained by both statist and popular institutions in market clientelism It also considers the implications of market clientelism for the dynamism of China s emerging market economy relative to Eastern European post communist economies and its political consequences for state society and center local relations The Handbook of Political Sociology Thomas Janoski, Robert R. Alford, Alexander M. Hicks, Mildred A. Schwartz, 2005-05-23 This Handbook provides a complete survey of the vibrant field of political sociology Part I explores the theories of political sociology Part II focuses on the formation transitions and regime structure of the state Part III takes up various aspects of the state that respond to pressures from civil society Institutional Theory in Political Science B. Guy Peters, 2005-10-20 At the turn of the millennium there has been a major growth of interest in institutional theory and institutional analysis in political science This book identifies these approaches to institutions and provides a frame of reference for the different theories In the past decade there has been a major growth of interest in institutional theory and institutional analysis in political science There are however a variety of different approaches to the new institutionalism and these approaches rarely address the same issues This book identifies the various approaches to institutions and then provides a common frame of reference for the different theories Peters argues that there are at least seven versions of institutionalism beginning with the March and Olsen normative institutionalism and including rational choice historical and empirical approaches to institutions and their impact on public policy For each of the versions of institutionalism there is a set of

identical questions including the definition of institutions the way in which they are formed how they change how individuals and institutions interact and the nature of a good institution Peters discusses whether there are really so many different approaches to institutionalism or if there is sufficient agreement among them to argue that there is really one institutional theory

Networks of Domination Paul MacDonald, 2014-05-15 In the nineteenth century European states conquered vast stretches of territory across the periphery of the international system Much of Asia and Africa fell to the armies of the European great powers and by World War I those armies controlled 40 percent of the world's territory and 30 percent of its population Conventional wisdom states that these conquests were the product of European military dominance or technological superiority but the reality was far more complex In Networks of Domination Paul MacDonald argues that an ability to exploit the internal political situation within a targeted territory not mere military might was a crucial element of conquest European states enjoyed greatest success when they were able to recruit local collaborators from within the society and exploit divisions among elites Different configurations of social ties connecting potential conquerors with elites were central to both the patterns of imperial conquest and the strategies conquerors employed MacDonald compares episodes of British colonial expansion in India South Africa and Nigeria during the nineteenth century and also examines the contemporary applicability of the theory through an examination of the United States occupation of Iraq The scramble for empire fundamentally shaped and continues to shape the international system we inhabit today Featuring a powerful theory of the role of social networks in shaping the international system Networks of Domination bridges past and present to highlight the lessons of conquest
