## **Political Power In Poor Neighborhoods:**

**Political Power in Poor Neighborhoods** Curt Lamb, 1975      Political Power in Poor Neighborhoods Curt Lamb, 1975-01-01      **Social Capital and Poor Communities** Susan Saegert, J. Phillip Thompson, Mark R. Warren, 2002-01-10

Neighborhood support groups have always played a key role in helping the poor survive but combating poverty requires more than simply meeting the needs of day to day subsistence. *Social Capital and Poor Communities* shows the significant achievements that can be made through collective strategies which empower the poor to become active partners in revitalizing their neighborhoods. Trust and cooperation among residents and local organizations such as churches, small businesses, and unions form the basis of social capital which provides access to resources that would otherwise be out of reach to poor families. *Social Capital and Poor Communities* examines civic initiatives that have built affordable housing, fostered small businesses, promoted neighborhood safety, and increased political participation. At the core of each initiative lie local institutions: church congregations, parent teacher groups, tenant associations, and community improvement alliances. The contributors explore how such groups build networks of leaders and followers and how the social power they cultivate can be successfully transferred from smaller goals to broader political advocacy. For example, community based groups often become platforms for leaders hoping to run for local office. Church based groups and interfaith organizations can lobby for affordable housing, job training programs, and school improvement. *Social Capital and Poor Communities* convincingly demonstrates why building social capital is so important in enabling the poor to seek greater access to financial resources and public services. As the contributors make clear, this task is neither automatic nor easy. The book's frank discussions of both successes and failures illustrate the pitfalls, conflicts of interest, resistance from power elites, and racial exclusion that can threaten even the most promising initiatives. The impressive evidence in this volume offers valuable insights into how goal formation, leadership, and cooperation can be effectively cultivated, resulting in a remarkable force for change and a rich public life even for those communities mired in seemingly hopeless poverty. A Volume in the Ford Foundation Series on Asset Building      Political Power in Poor Neighborhoods William Curtis Lamb, 1972      **Norman Street: Poverty and Politics in an Urban Neighborhood, Updated Edition** Ida Susser, 2012-06-19

Based on a three year study of Brooklyn's Greenpoint Williamsburg area, *Norman Street* is an in depth, detailed description of life in a multi ethnic working class neighborhood during New York City's fiscal crisis of 1975-78. Now updated with a new introduction to address the changes and events of the thirty years since the book's original publication, its lessons continue to demonstrate the impact of political and economic changes on everyday lives. Over the decades, Greenpoint Williamsburg has become home to artists, actors, writers, and young people with alternative cultural aspirations. Susser documents how these groups in many ways have joined with the remaining working class population to build a thriving community that is now threatened with displacement by municipal rezoning which has facilitated massive plans for new corporate investment. Increasingly prescient at a moment of economic

crisis when people are again occupying public spaces in major American cities spurred to collective action by mounting economic inequalities and the government's role in perpetuating them Susser's study of change action and conflict in a neighborhood that has become emblematic of urban transformation for better and worse has much to say to us today **The Myth of Marginality** Janice E. The Politics of Capital Investment Carolyn T. Adams,1988-11-02 This book examines both the politics and products of the public investment process in one of America s largest cities It broadens the scope of contemporary debates on the political economy of urban development to include not only large scale redevelopment projects but also neighborhood facilities such as schools parks and libraries Showing the share of investments that went into Philadelphia s downtown versus its residential neighborhoods from 1950 to 1980 the author challenges the widely held view that public investment patterns simply reflect political pressures from pro development groups Instead she shows that a city s decision to build often hinges on the availability and the sources of investment capital
