Weisberg, 1986 If at one time we thought that the movement to science would yield unification of the discipline it is now apparent that there are many roads to science Still it is important for us to consider yet again what the appropriate goals are for our scientific enterprise What works in theory building induction and deduction prediction and control the search for useful principles to guide us OCo examining these questions we can build a better science Political science has come so far as a discipline that different schools and scholars have different interpretations of science in the study of politics and that diversity is important to maintain Advances made in the study of political institutions and behavior are described in twelve essays from the 1983 annual meeting of the American Political Science Association Addressing they do not employ any single approach to the study of the science of politics Taken as a whole they illustrate the multiplicity of interpretations that are presently given to the common enterprise
