Political Terrorism And Energy:

Energy Security and Global Politics Daniel Moran, James A. Russell, 2008-07-17 This book analyses the strategic dimensions of energy security particularly where energy resources have become the object of military competition The volume explores the risks that may arise from conditions of increasing economic competition and resource scarcity and the problems that may follow if major producers or consumers of energy lose confidence in the equity and efficiency of the market and resort instead to the use of force to secure access to energy It surveys the strategic outlook of both producer and consumer states with emphasis on nations or regions Central Asia Russia China Venezuela the Persian Gulf where unstable or rapidly evolving political conditions may undermine the currently prevailing market consensus It also examines the role of the United States as the chief guarantor of the global economy and the challenge this poses for its exercise of military power The book contests that while the global energy market may be largely self regulating it is not self defending A failure to consider how it can be most effectively defended from emerging and potential challenges merely heightens the risk that those challenges may someday become real

The Politics of Energy Steve Vanderheiden, 2013-09-13 This book brings together leading scholars on the politics of energy examining the natural resources and developing technologies that are essential to its production and the various public and private factors affecting its use along with the ecological consequences of both Section One examines the looming challenges posed by continuing dependence upon oil as a primary energy source including peak oil scenarios and the social and political consequences of resource extraction upon the developing world Section Two considers proposals to dramatically increase nuclear power production as a means to reduce carbon emissions with both the risks and potential of this nuclear option carefully weighed Although many tout renewable energy sources for their environmental benefits Section Three calls attention to several potential problems with large scale renewable energy development and the dilemmas that they have caused for would be supporters of such efforts Finally Section Four weighs the prospects for developing sustainable energy systems on the ground including conservation measures that reduce energy demand and system wide energy policy efforts Together these essays demonstrate the importance of sound energy policy along with the numerous obstacles to developing and implementing it This book was originally published as a special issue of *Environmental Politics*

Political Terrorism and Energy Yonah Alexander, Charles K. Ebinger, 1982 **Political Terrorism** A.J. Jongman, 2017-07-28 While there is no easy way to define terrorism it may generally be viewed as a method of violence in which civilians are targeted with the objective of forcing a perceived enemy into submission by creating fear demoralization and political friction in the population under attack At one time a marginal field of study in the social sciences terrorism is now very much in center stage The 1970s terrorist attacks by the PLO the Provisional Irish Republican Army the Popular Front for the Liberation of Palestine the Japanese Red Army the Unabomber Aum Shinrikyo Timothy McVeigh the World Trade Center attacks the assault on a school in Russia and suicide bombers have all made the term terrorism an all too

common part of our vocabulary This edition of Political Terrorism was originally published in the 1980s well before some of the horrific events noted above This monumental collection of definitions conceptual frameworks paradigmatic formulations and bibliographic sources is being reissued in paperback now as a resource for the expanding community of researchers on the subject of terrorism This is a carefully constructed guide to one of the most urgent issues of the world today When the first edition was originally published Choice noted This extremely useful reference tool should be part of any serious social science collection Chronicles of Culture called it a tremendously comprehensive book about a subject that any who have anything to lose from property to liberty life to limbs should be forewarned against

Energy Policy Analysis: A Conceptual Framework Michael S. Hamilton, 2015-05-18 Presented in nontechnical terms this book offers a unique and powerful conceptual framework for analysis of energy technologies standard and alternative in terms of their respective dollar costs environmental costs and national security costs Energy technologies examined include coal nuclear oil natural gas solar wind geothermal hydropower biomass and biogas energy conservation and efficiency ocean power hydrogen electric power and transmission and transportation This three point framework allows examination of issues and problems associated with implementation of U S energy policies in the context of major social goals such as growth and equity with treatment of conflicts and trade offs between energy development and other social values such as health and safety cultural historical and aesthetic values These are the key political issues for policy makers formulating national energy policy and decisions makers implementing it

Geopolitics of Energy in Central Asia Ramakrushna Pradhan, 2020-12-23 This book focuses on the geopolitics of Central Asia which has emerged as the new fertile ground for oil and energy resources It analyses the scramble for energy and control over the region by many nations and their diplomatic manoeuvrings to ensure energy sufficiency and economic growth The book provides a quantitative analysis of the Central Asian energy potential and offers an understanding of the unique position that each country occupies in the geopolitics of oil and energy in the region It looks at aggressive foreign policies by countries like the US China the European Union Japan Israel Iran and Pakistan focusing primarily on India s position and strategies in the region within the new great game The book further examines the dynamics between Central Asia and India and India s policies for geopolitical engagement and diversification of energy sources This volume will be of interest to researchers and students of political studies international relations economics sociology and Asian studies It will also be useful for policymakers and professionals working in the field of energy security and geo economics

Reisman,2024-09-02 *Sustainable Energy Transformations, Power and Politics* Sharlissa Moore,2018-09-03 This book analyses energy transitions and the opportunities and challenges for building sustainable energy systems to improve human capabilities while protecting the environment Sufficient and secure energy supply is critical to human thriving and socioeconomic development Yet energy systems are also implicated in the most pressing socio environmental challenges of our time climate change air pollution and water and land use This book examines what is arguably the most ambitious vision for a renewable energy based system worldwide This vision often called Desertec is for a regional electricity system supplying North Africa Europe and the Middle East with sustainable and affordable power The behemoth plan would entail building dozens of large scale solar and wind power plants mostly in North Africa interconnecting the fragmented transmission infrastructure of 38 Mediterranean countries and linking North Africa to the European Union EU through undersea transmission cables Within the Mediterranean the book focuses on Morocco which is

one of the most advanced developing countries in renewable energy scale up to understand its motivations for building renewable energy and the effects on sustainable development The book therefore takes a unique multi scalar approach to understanding the social and political aspects of energy transitions weaving together the views of villagers living near Morocco s first solar energy zone with the perspectives of national decision makers in Morocco with the views of European policymakers and major transnational energy companies in the Mediterranean region This book will be of great interest to students scholars and policymakers interested in energy transitions sustainable and renewable energy Mediterranean politics sustainable development and environment and sustainability more generally **Technological Dimensions of Defence**

Against Terrorism U.F. Aydoğdu,2013-10-25 The technological developments of recent years have influenced both the threat of terrorist attacks and the defence against them and continue to be the focus of attention Terrorist groups are not slow to exploit new technological developments and adapt them to their own ends and the forces of counterterrorism cannot afford to fall behind in their understanding of potential threats This book presents the proceedings of the NATO Centre of Excellence Defence against Terrorism COE DAT Advanced Research Workshop Technological Dimensions of Defence against Terrorism held in Ankara Turkey in November 2011 Seventeen expert speakers from four countries military and civilian practitioners business leaders researchers and academics delivered a series of papers in sessions on understanding the challenges the role of technology in terrorist attacks and the role of technology against terrorist attacks The topics covered include a brief history of terrorism and technology technological advances and the impact on terrorism and counterterrorism efforts the role of the commercial world in the defence against terrorism transportation technology and its effects on the nature of terrorist attacks terrorist threats to critical energy infrastructure technology and protection systems The book is a significant contribution to the field of counterterrorism and will be of interest to all those whose work involves the relationship between technology and terrorism *Future Survey Annual 1984* World Future Society,1984-06-01

Management of Natural Resources, Sustainable Development and Ecological Hazards C. A. Brebbia,Enzo Tiezzi,M. E. Conti,2006-11-09 The state of our planet continues to deteriorate at an alarming rate We have arrived at a situation where we need to determine urgent solutions before we reach a point of irreversible deterioration Much has been written in different contexts about reaching sustainability but the concept itself needs to be defined in the framework of all different disciplines in order to arrive at optimal solutions Hence this book is essentially trans disciplinary in order to find appropriate sustainable solutions involving collaboration across a wide range of disciplines Publishing papers from the First International Conference on Management of Natural Resources Sustainable Development and Ecological Hazards the book features articles encompassing topic areas such as Water Resources Air Soil Ecology Health Risk Energy Planning and Development Political and Social Issues The Re Encounter New Technologies Learning from Nature Safety Wind Power Politics and Policy Scott Victor Valentine,2014-10-30 The wind power development policy community faces a conundrum On

the one hand as the most commercially viable form of utility scale renewable energy the wind power industry has experienced in excess of ten fold growth in total installed capacity over the past decade On the other hand installed wind power capacity still accounts for less than 2% of global electricity generation capacity despite the prevalence of studies indicating that in certain situations wind power can be a cheaper form of electricity than most fossil fuel alternatives Accordingly the most puzzling aspect of wind power development policy can be summed up in the following manner given the global imperative to facilitate an expedient transition away from CO₂ intensive energy technologies and the commercial viability of wind power what is stopping the wind power industry from capturing higher market shares around the world In *Wind Power Politics and Policy* Scott Valentine examines this question from two angles First it presents an analysis of social technical economic and political STEP barriers which research shows tends to stymie wind power development Case studies which examine phlegmatic wind power development in Japan Taiwan Australia and Canada are presented in order to demonstrate to the reader how these barriers manifest themselves in practice Second the book presents an analysis of STEP catalysts which have been linked to successful growth of wind power capacity in select nations Four more case studies that examine the successful development of wind power in Denmark Germany the USA and China are put forth as practical examples of how supportive factors conflate to produce conditions that are conducive to growth of wind power markets By examining its impediments and catalysts the book will provide policymakers with insight into the types of factors that must be effectively managed in order to maximize wind power development
