Psychiatric Experiences Of The Eighth:

Psychiatric Experiences of the Eighth Air Force Donald W. Hastings, David Graham Wright, Bernard C. Glueck, 1944
THE PHYSIOLOGICAL AND PSYCHOLOGICAL EFFECTS OF COMBAT STRESS EXPERIENCED BY THE HEAVY BOMBARDMENT CREWS OF THE EIGHTH AIR FORCE DURING WWII Anthony Cardo, 2025-02-21 The Physiological and Psychological Effects of Combat Stress Experienced by the Heavy Bombardment Crews of the Eighth Air Force during WWII offers a unique window into the effects of combat stress as experienced by a select number of men in a select moment of time and one that is unlikely to be experienced again by mankind This is not to say that future combat aviators will not experience the unique effects of combat stress as this is nearly a given as the record of man's wartime experiences shows but that the unique environment the men of the Eighth Air Force experienced will likely not be repeated to the same degree going forward With that being the most likely case author and military historian Anthony Cardo seeks to also explore what the experiences of the heavy bombardment crews of the Eighth Air Force with the physiological and psychological effects of combat stress have to offer posterity and aims to inspire the reader to ask for themselves what these experiences have to offer posterity What this work is not is a clinical study on the bomber crewmen nor is it meant to be an exhaustive study on the subject Instead it is meant to add to the historical discussion by categorizing some of the various physiological and psychological symptoms of combat induced fear and providing commentary on its significance and relation to the wider literature on the effects of combat stress on human beings If the work succeeds in fueling your interest or curiosity on the topic and propels you into further research then it has at least succeeded in its overall goal to both raise awareness and the discussion on the topic I hope you enjoy it as I enjoyed both researching and drafting this work **Courage and Air Warfare** Mark K. Wells, 2014-03-05 Colonel Wells investigates the nature of aerial warfare and the men who took part The book analyzes aircrew selection reaction to combat adaptability to stress morale leadership and combat effectiveness and compares the efforts of the US Eighth Air Force and RAF Bomber Command [Psychiatric Experiences of the Eighth Air Force](#) Donald Wilson Hastings, David Graham Wright, Bernard Charles Glueck, 1944 [American Airpower Strategy in Korea, 1950-1953](#) Conrad C. Crane, 2000 The Korean War was the first armed engagement for the newly formed U S Air Force but far from the type of conflict it expected or wanted to fight As the first air war of the nuclear age it posed a major challenge to the service to define and successfully carry out its mission by stretching the constraints of limited war while avoiding the excesses of total war Conrad Crane analyzes both the successes and failures of the air force in Korea offering a balanced treatment of how the air war in Korea actually unfolded He examines the Air Force's contention that it could play a decisive role in a non nuclear regional war but shows that the fledgling service was held to unrealistically high expectations based on airpower's performance in World War II despite being constrained by the limited nature of the Korean conflict Crane exposes the tensions and rivalries between services showing that emphasis on strategic bombing came at the expense of air support

for ground troops and he tells how interactions between army and air force generals shaped the air force's mission and strategy. He also addresses misunderstandings about plans to use nuclear, biological and chemical weapons in the war and includes new information from pilot correspondence about the informal policy of hot pursuit over the Yalu that existed at the end of the war. The book considers not only the actual air effort in Korea but also its ramifications. The air force doubled in size during the war and used that growth to secure its position in the defense establishment but it wagered its future on its ability to deliver nuclear weapons in a high intensity conflict, a position that left it unprepared to fight the next limited war in Vietnam. As America observes the fiftieth anniversary of its initial engagement in Korea, Crane's book is an important reminder of the lessons learned there. And as airpower continues to be a cornerstone of American defense, this examination of its uses in Korea provides new insights about the air force's capabilities and limitations.

Airpower and the Normandy Campaign Michael Bechthold, 2025-09-16 This essential work reframes the conversation about airpower in Normandy and offers a deeper understanding of its role in the Allied victory. With fresh viewpoints for both scholars and practitioners of military history, comprehensive research and expert analysis inspire further debate and exploration on the enduring legacy of airpower in modern warfare. During the spring and summer of 1944, air superiority was essential for the success of Operation Overlord. Allied air forces provided pivotal support across multiple domains, from the elimination of the Luftwaffe and the protection of the invasion fleet to the tactical air support that facilitated ground operations. Yet despite its undeniable significance, the role of airpower has often been overshadowed by the more conventional ground battles. The nuanced scholarship in this collection delves into complexities of air operations in Normandy through both traditional military histories and emerging perspectives. Covering the roles of the Royal Air Force, the U.S. Army Air Forces and the Luftwaffe and with an international scope that incorporates British, American, Canadian, Australian, French and German viewpoints, a core theme throughout is the integrated nature of Allied air, ground and naval forces during the campaign. Using a joint or purple perspective, the contributors highlight the interservice collaborations and the tensions that arose between them, pointing out the operational dynamics essential to the overall success of the invasion. Several case studies critically assess the successes and failures of airpower during the landings and the subsequent fighting and offer in-depth analyses of specific air operations such as the bombing raids in the early days of the invasion, the attack on Cherbourg and the effectiveness of U.S. heavy bombers in Operation Cobra. The impact of airpower on French civilians, particularly from bombing campaigns, is another key theme, underscoring the complex consequences of wartime aerial bombardment.

The Italian Psychiatric Experience Alessandro De Risio, 2019-09-17 The 1978 Italian Psychiatric Reform was welcomed as a significant advancement in the care of the mentally ill as it involved for the first time ever the complete shutdown of psychiatric hospitals in a major Western country. Today Italian psychiatry is totally different from that of the rest of the world due to its complete commitment to community care. The transition towards the community model was appraised by many relevant international organisations.

such as the World Health Organisation as a fundamental step towards a better quality of life well being and social functioning of persons with mental diseases This passage wasn't easy however and the closure of Italian psychiatric hospitals was accompanied by notable setbacks in the treatment of the most severely affected persons who often faced the inadequacy of a crisis management system of care rejecting interventions in the long term In past decades pro reform authors also tended to refuse criticism of such obstacles due to their extreme commitment towards the principles that inspired their practice This book provides a much needed appraisal of the 1970s Italian Psychiatric Reform With an independent viewpoint it highlights the often overlooked shortcomings of the reform while also presenting a multi faceted view in contrast with the single vision attitude often adopted in existing studies on this topic

Cream of the Crop Allan Douglas English,1996 A unique offering to military studies critiquing the effectiveness of the Royal Canadian Air Forces aircrew preparations for war a selection system and training program which became a modern model English war studies Royal Military College of Canada traces the development of aviation psychology and the treatment of psychological casualties in air combat paying attention to the controversy of diagnosing aviators as lacking moral fibre and its effect on morale By exploring these issues the author includes the human dimension as an influence on air force effectiveness as much as material and technological innovations Includes some photographs Canadian card order number C96 900371 4 Annotation copyrighted by Book News Inc Portland OR

The Nazi and the Psychiatrist Jack El-Hai,2013-09-10 NOW THE MAJOR MOTION PICTURE NUREMBERG In 1945 an improbable relationship between the fallen Reichsmarschall Hermann Goering and ambitious US Army physician Douglas Kelley becomes a hazardous quest into the nature of evil amid the devastation of Europe at the end of World War II In 1945 after his capture at the end of the Second World War Hermann Goering arrived at an American run detention center in war torn Luxembourg accompanied by sixteen suitcases and a red hatbox Joining him in the detention center were fifty one senior Nazis of whom Goering was the dominant figure To ensure that the captives were fit for trial at Nuremberg the US army sent an ambitious army psychiatrist Captain Douglas M Kelley to supervise and evaluate them To Kelley it was the professional opportunity of a lifetime to discover a distinguishing trait among these arch criminals that would mark them as psychologically different from the rest of humanity But Kelley's quest would prove to be a dangerous one The more he spoke with the Nazi captives the more he began to understand and appreciate their perspective and the more he would fall for their charms

Psychiatric Casualties Mark Russell,Charles Figley,2021-06-15 The psychological toll of war is vast and the social costs of war's psychiatric casualties extend even further Yet military mental health care suffers from extensive waiting lists organizational scandals spikes in veteran suicide narcotic overprescription shortages of mental health professionals and inadequate treatment The prevalence of conditions such as post traumatic stress disorder is often underestimated and there

remains entrenched stigma and fear of being diagnosed Even more alarming is how the military dismisses or conceals the significance and extent of the mental health crisis The trauma experts Mark C Russell and Charles Figley offer an impassioned and meticulous critique of the systemic failures in military mental health care in the United States They examine the persistent disconnect between war culture which valorizes an appearance of strength and seeks to purge weakness and the science and treatment of trauma Instead of reckoning with the mental health crisis the military has neglected the needs of service members It has discharged prosecuted and incarcerated a large number of people struggling with the psychological realities of war and it has inflicted humiliation ridicule and shame on many more Through a far reaching historical account Russell and Figley detail how the military has perpetuated a self inflicted crisis The book concludes with actionable prescriptions for change and a comprehensive approach to significantly improving military mental health **War**

Psychiatry Franklin D. Jones, 1995 This volume of the Textbook of Military Medicine addresses the delivery of mental health services during wartime The foreseeable future of the U S military includes the potential for involvement in a variety of conflicts ranging from peace keeping missions to massive deployments of personnel and materiel and possible nuclear biological and chemical threats as was seen in the Persian Gulf War The medical role in wartime is critical to success of the mission For the mental health disciplines this role encompasses identification and elimination of unfit personnel improvement of marginal personnel to standards of acceptability prevention of psychiatric casualties and their treatment when prevention fails All of these efforts must be guided by past experience and sound principles of human behavior *Symposium on Stress*, 1953 A Study of Strategic Lessons Learned in Vietnam: The soldier, 1981 **Dismantling Glory** Lorrie

Goldensohn, 2003 Dismantling Glory deals with the poetry written about the honors and horrors of battle by the very soldiers who put their lives on the line Focusing on American and English poetry from World Wars I and II and the Vietnam War Lorrie Goldensohn presents the move from a poetry largely bound to trench warfare to a global war poetry dominated by air power invasion and occupation Civilians prisoners and children enter this poetry in new and compelling ways as do issues of race and gender changing and complicating the representation of war and expanding the scope of antiwar thinking

United States Air Force and Its Antecedents James T. Controvich, Martin Gordon, 2004-06-24 This bibliography lists published and printed unit histories for the United States Air Force and Its Antecedents including Air Divisions Wings Groups Squadrons Aviation Engineers and the Women s Army Corps **Mental Health: Psycho-Social Perspectives (Volume 8:**

Mental Health at Workplace) Anubhuti Dubey, Aradhana Shukla, 2026-01-01 It has been observed that most of the adult population around the globe is working in any form of organised labour whether physical or cognitive As every person wants to be fit and healthy in such a way people working in all organisations want to maintain their psycho physical health Although many health organisations like World Health Organisation WHO have provided comprehensive mental health action plans and they were followed by organisations but after COVID 19 the entire scenario was changed and people working there have

felt a lot of constraints pertaining to their psychological and physical health status It has caused dissatisfaction from the organizational climate and degradation in work skills is being watched regularly In order to improve the organisational climate and increase the mental health status of the people working there this volume is planned This is the eighth volume of our series Mental Health Psychosocial Perspective Twenty Five thought provoking research papers are included here and they open the various doors of causes and cures related to mental health we are quite sure that this volume will help the researchers teachers mental health professionals and the people who want to increase their mental in work place
