Good, 2019-05-01 A full account of the Metaphysical Club featuring the members' philosophical writings and four critical essays. The Metaphysical Club, a gathering of intellectuals in the 1870s, is widely recognized as the crucible where pragmatism, America's distinctively original philosophy, was refined and proclaimed. Louis Menand's bestseller about the group was a dramatic publishing success. However, only three actual members—Oliver Wendell Holmes Jr., Charles S. Peirce, and William James—appear in the book alongside other thinkers who were never in the Club. The Real Metaphysical Club tells the full story of how this influential group shifted the course of philosophy in America. In addition to pioneering pragmatism, the group explored radical empiricism and idealism and formulated personalism and process philosophy, equally important developments. This volume contains the important writings dating from 1870 to 1885 by the real members of the Metaphysical Club. The first section centers on pragmatism and science; the second part collects writings of the lawyers; and the third part covers idealist and personalist philosophers. Many of these writings have never been reprinted before, and nothing like this impressive collection has ever been attempted. A general introduction provides a narrative history, and the editors' three introductions to the volume's sections vividly bring to life the intense meetings, sustained debates, and pioneering thought of the Metaphysical Club. The Real Metaphysical Club includes some very important thinkers that don't always make it into anthologies of American philosophy. The period is also important: 1870 to 1885 is critical to the development of classical American philosophy. It precedes it and sets its direction. The book accomplishes its goal of giving the reader a sense of the period by arranging the works in a very interesting way. The readings and introduction are very readable and would be helpful to both graduate and undergraduate students as well as general readers interested in American Thought. James M. McLachlan, Western Carolina University **Real Materialism** Galen Strawson, 2008-05-29 Real Materialism is a collection of highly original essays on a set of related topics in philosophy of mind and metaphysics: consciousness and the mind-body problem, our knowledge of the world, the nature of the self or subject, free will, and moral responsibility; the nature of thought and intentionality; causation; and David Hume. *The Buddha's Doctrine and the Nine Vehicles* Jose Ignacio Cabezon, 2013-01-31 This book is a study of the life and most important extant work of Rog Bande Sherab, also known as Rogben. Rogben devoted his life to collecting important textual cycles and meditation techniques. Rogben's most important work, *The Lamp of the Teachings*, cuts across the genres of history, doctrinal studies, and doxography. It is one of the earliest philosophically robust explanations of the nine-vehicle system of the Ancient or Nyingma school of Tibetan Buddhism. **Dao Companion to Chinese Buddhist Philosophy** Youru Wang, Sandra A.

Wawrytko, 2019-01-31 Too often Buddhism has been subjected to the Procrustean box of western thought whereby it is stretched to fit fixed categories or had essential aspects lopped off to accommodate vastly different cultural norms and aims.

After several generations of scholarly discussion in English speaking communities it is time to move to the next hermeneutical stage Buddhist philosophy must be liberated from the confines of a quasi religious stereotype and judged on its own merits Hence this work will approach Chinese Buddhism as a philosophical tradition in its own right not as an historical after thought nor as an occasion for comparative discussions that assume the west alone sets the standards for or is the origin of philosophy and its methodologies Viewed within their own context Chinese Buddhist philosophers have much to contribute to a wide range of philosophical concerns including metaphysics epistemology ethics philosophy of language philosophy of mind and philosophy of religion even though Western divisions of philosophy may not exhaust the rich contents of Chinese Buddhist philosophy

The Ideal made Real (Unabridged edition) Christian D. Larson, 2022-03-26

The purpose of this work is to present practical methods through which anyone the beginner in particular may realize his ideals cause his cherished dreams to come true and cause the visions of the soul to become tangible realities in everyday life The best minds now believe that the ideal can be made real that every lofty idea can be applied in practical living and that all that is beautiful on the heights of existence can be made permanent expressions in personal existence And so popular is this belief becoming that it is rapidly permeating the entire thought of the world Accordingly the demand for instructive knowledge on this subject that is simple as well as scientific is becoming almost universal This book has been written to supply that demand However it does not claim to be complete nor could any work on The Ideal Made Real possibly be complete because the ideal world is limitless and the process of making real the ideal is endless To know how to begin is the principal secret and he who has learned this secret may go on further and further forever and forever until he reaches the most sublime heights that endless existence has in store No attempt has been made to formulate the ideas methods and principles presented into a definite system In fact the tendency to form a new system of thinking or a new philosophy of life has been purposely avoided Closely defined systems invariably become obstacles to advancement and we are not concerned with new philosophies of life Our purpose is the living of a greater and a greater life and in such a life all philosophies must constantly change In preparing the following pages the object has been to take the beginner out of the limitations of the old into the boundlessness of the new to emphasize the fact that the possibilities that are latent in the human mind are nothing less than marvelous and that the way to turn those possibilities to practical use is sufficiently simple for anyone to understand But no method has been presented that will not tend to suggest new and better methods as required for further advancement The best ideas are those that inspire new ideas better ideas greater ideas The most perfect science of life is that science that gives each individual the power to create and recreate his own science as he ascends in the scale of life Great souls are developed only where minds are left free to employ the best known methods according to their own understanding and insight And it is only as the soul grows greater and greater that the ideal can be made real It is individuality and originality that give each person the power to make his own life as he may wish it to be but those two important factors do not flourish in definite systems

There is no progress where the soul is placed in the hands of methods true and continuous progress can be promoted only where all ideas all methods and all principles are placed in the hands of the soul We have selected the best ideas and the best methods known for making the ideal real and through this work will place them in your hands We do not ask you to follow these methods we simply ask you to use them You will then find them all to be practical you will find that every one will work and produce the results you desire You will then not only make real the ideal in your present sphere of life but you will also develop within yourself that Greater Life the power of which has no limit the joy of which has no end *Sensing the Nation's Law* Stefan Huygebaert, Angela Condello, Sarah Marusek, Mark Antaki, 2018-03-22 This book examines how the nation and its fundamental law are sensed by way of various aesthetic forms from the age of revolution up until our age of contested democratic legitimacy Contemporary democratic legitimacy is tied among other things to consent to representation to the identity of ruler and ruled and of course to legality and the legal forms through which democracy is structured This book expands the ways in which we can understand and appreciate democratic legitimacy If democratic communities are imagined this book suggests that their rightfulness must be sensed analogously to the need for justice not only to be done but to be seen to be done This book brings together legal historical and philosophical perspectives on the representation and iconography of the nation in the European North American and Australian contexts from contributors in law political science history art history and philosophy *The Butterfly as Companion* Kuang-ming Wu, 1990-02-22 Chuang Tzu's first three chapters are arranged into free verse in Chinese in the original word order and translated nearly word for word with extensive critical glosses vis a vis over fifty Chinese Japanese and Western commentators The exegetical philosophical and contemporary implications of these chapters are then meditated upon Here in Chuang Tzu's world all strivings are a play parodying stories and arguments each plays off of and refers to the others Chuang Tzu lived during the third and fourth centuries B C Historically he is the foremost spokesman for Taoism and its legendary founder Lao Tzu It was mainly due to the influence of Chuang Tzu that Indian Buddhism was transformed in China into Chan into the unique vehicle we usually call by its Japanese name Zen This is the most thorough presentation to date of the Chuang Tzu's poetic beauty philosophical insights and unity **Swarm Intelligence** James Kennedy, Russell C. Eberhart, Yuhui Shi, 2001-03-26 A scholarly text on swarm intelligence that argues that intelligent human cognition derives from the interactions of individuals in a social world

The Battle of the Gods and Giants Redux Patricia Easton, 2015-09-07 The Battle of Gods and Giants Redux is a collection of 14 original essays by leading scholars in the field Part One includes figures and topics associated with Descartes the chief idealist in the story including Leibniz Spinoza and Malebranche Part Two includes figures and topics that fall on the Gassendist materialist side of the battle including Hobbes Bayle and Locke In organizing these varied discussions along these themes and lines something more than the sum of the parts emerges The reader will gain a breadth and depth of insight into the battle of ideas in early modern thought historical philosophical and interpretive Contributors are Margaret Atherton

Martha Brandt Bolten Patricia Easton Lorne Falkenstein Nicolas Jolley Jos Maia Neto Steven Nadler Alan Nelson Lawrence Nolan Donald Rutherford Tad Schmultz Kurt Smith Julie Walsh and Richard Watson Berkeley Daniel E. Flage, 2014-04-28 Irish philosopher George Bishop Berkeley was one of the greatest philosophers of the early modern period Along with David Hume and John Locke he is considered one of the fathers of British Empiricism Berkeley is a clear concise and sympathetic introduction to George Berkeley s philosophy and a thorough review of his most important texts Daniel E Flage explores his works on vision metaphysics morality and economics in an attempt to develop a philosophically plausible interpretation of Berkeley s oeuvre as whole Many scholars blur the rejection of material substance immaterialism with the claim that only minds and things dependent upon minds exist idealism However Flage shows how by distinguishing idealism from immaterialism and arguing that Berkeley s account of what there is metaphysics is dependent upon what is known epistemology a careful and plausible philosophy emerges The author sets out the implications of this valuable insight for Berkeley s moral and economic works showing how they are a natural outgrowth of his metaphysics casting new light on the appreciation of these and other lesser known areas of Berkeley s thought Daniel E Flage s Berkeley presents the student and general reader with a clear and eminently readable introduction to Berkeley s works which also challenges standard interpretations of Berkeley s philosophy Philosophical Investigations on Time, Space and the Continuum (Routledge Revivals) Franz Brentano, 2009-10-15 Franz Brentano is recognised as one of the most important philosophers of the late nineteenth and early twentieth centuries This work first published in English in 1988 besides being an important contribution to metaphysics in its own right has considerable historical importance through its influence on Husserl s views on internal time consciousness The work is preceded by a long introduction by Stephan Körner in collaboration with Brentano s literary executor **The Buddha's Teachings As Philosophy** Mark Siderits, 2022-11-03 A shorter and less technical treatment of its subject than the author s acclaimed Buddhism As Philosophy second edition Hackett 2021 Mark Siderits s The Buddha s Teachings As Philosophy explores three different systems of thought that arose from core claims of the Buddha By detailing and critically examining key arguments made by the Buddha and developed by later Buddhist philosophers Siderits investigates the Buddha s teachings as philosophy a set of claims in this case claims about the nature of the world and our place in it supported by rational argumentation and here developed with a variety of systematic results The Buddha s Teachings As Philosophy will be especially useful to students of philosophy religious studies and comparative religion to anyone in fact encountering Buddhist philosophy for the first time
