Reasons For Believing:

50 Reasons People Give for Believing in a God Guy P. Harrison, 2009-09-18 Many books that challenge religious belief from a skeptical point of view take a combative tone that is almost guaranteed to alienate believers or they present complex philosophical or scientific arguments that fail to reach the average reader This is undoubtably an ineffective way of encouraging people to develop critical thinking about religion This unique approach to skepticism presents fifty commonly heard reasons people often give for believing in a God and then raises legitimate questions regarding these reasons showing in each case that there is much room for doubt Whether you re a believer a complete skeptic or somewhere in between you ll find this review of traditional and more recent arguments for the existence of God refreshing approachable and enlightening From religion as the foundation of morality to the authority of sacred books the compelling religious testimony of influential people near death experiences arguments from Intelligent Design and much more Harrison respectfully describes each rationale for belief and then politely shows the deficiencies that any good skeptic would point out As a journalist who has traveled widely and interviewed many highly accomplished people quite a number of whom are believers the author appreciates the variety of belief and the ways in which people seek to make religion compatible with scientific thought Nonetheless he shows that despite the prevalence of belief in God or religious belief in intelligent people in the end there are no unassailable reasons for believing in a God For skeptics looking for appealing ways to approach their believing friends or believers who are not afraid to consider a skeptical challenge this book makes for very stimulating reading
