Rebel Wind:

The Secret World of Weather Tristan Gooley, 2023-02-28 Learn to see the forecast in the hidden weather signs all around you from the New York Times bestselling author of *How to Read a Tree* and *The Lost Art of Reading Nature's Signs* In *The Secret World of Weather* bestselling author Tristan Gooley turns his gaze up to the sky bringing his signature brand of close observation and eye opening deduction to the fascinating world of weather Every cloud every change in temperature every raindrop every sunbeam every breeze reveals something about our weather if you know what to look for Before you know it you'll be able to forecast impending storms sunny days and everything in between all without needing to consult your smartphone But *The Secret World of Weather* goes far beyond mere weather prediction changing the very way we think about weather itself Weather is not something that blankets an area rather it changes constantly as you walk through woods or turn down a street The weather is never identical on two sides of a tree or even beneath it Take for example Gooley's remarkable discovery that breezes accelerate beneath a tree To Gooley this is weather a tiny microclimate that explains why people sit beneath a tree to cool down not only for the shade but subconsciously for cooler breeze And so Gooley shows us not only what the weather will be like five days from now but also what to expect about the weather around every corner By carefully observing the subtle interplay of wind cloud fog temperature rain and many other phenomena we not only form a deeper understanding of weather patterns but also unlock secrets about our environment Weather forms our landscape and landscape forms our weather Everything we see in the sky reflects where we are When we learn to read weather's signs Gooley shows us the weather becomes our map revealing to us how it has made our towns cities woods and hills what they are You'll never see your surroundings the same way again
