addressing other relevant issues like for instance the placebo response informed consent integrative medicine etc The second and main part consists of 150 short chapters topically grouped and each dedicated to one single alternative therapeutic or diagnostic method In each of them seven critical points are raised These points relate to issues that are important for consumers decisions whether it is worth trying the method in question Restricting the discussion to just seven points means that issues must be prioritized to those themes which are most relevant in the context of each given modality
