God, Humanity and the Cosmos - 3rd Edition Christopher Southgate, 2011-12-15

An Amos Yong Reader Amos Yong, 2020-05-12 Amos Yong is the most prolific pentecostal theologian to date and his published works are so many that it is difficult to find an amiable entry point into his thought An Amos Yong Reader is the first introduction to Yong's theology in his own words It brings into one volume representative samples of the broad range of Yong's scholarship including theology of religions religion and science theology and disability political theology Luke Acts and theological method Christopher A Stephenson perhaps Yong's most insightful interpreter provides an introductory essay that both orients readers to Yong's extensive theological program and identifies the most important key to understanding Yong's theology as his most neglected work Spirit Word Community a book with implications far beyond the boundaries of Pentecostalism An Amos Yong Reader provides an overview of Yong's thought and a starting point for more thorough study in any of the major themes in his expansive corpus

The Trinity, Creation and Pastoral Ministry Graham Buxton, 2007-01-01 In this book the author proposes a three way conversation between theology science and pastoral ministry His approach draws on a Trinitarian understanding of God as a relational being of love whose life spills over into all created reality human and nonhuman By locating human meaning and purpose within God's creation community this book offers the possibility of a transforming engagement between those in pastoral ministry and the scientific community

Variations in Organization Science Joel A. C. Baum, Bill McKelvey, 1999-05-14 In my judgment this book in honor of Donald T Campbell will be very influential and highly cited It will become a must read for Ph D students and scholars in strategy and organization theory Arie Lewin Duke University The topics in this volume are cutting edge and the contributors are first rate The book is well anchored Donald T Campbell has had a profound influence on the field Moreover the book is well conceptualized socio cultural evolution co evolution methods modeling and epistemology are key issues in organization science right now Michael Tushman Harvard University If he were an assistant professor today what would social science giant Donald T Campbell be pursuing in the field of organization science Joel A C Baum and Bill McKelvey explore this question in Variations in Organization Science This volume reveals and celebrates Campbell's many contributions to organization science by

presenting new variations that stem directly from his work Rather than analyze Campbell s theories the authors present ideas that Campbell might have pursued if he were currently a doctoral student This volume is unique in its focus on coevolution and multilevel coevolutionary analysis as well as in its range of subject matter from empirical studies to leading edge epistemological discourses Each of the book s four main sections focuses on a major aspect of Campbell s legacy blind variation selection and retention multilevel coevolution process level analysis and modeling and epistemology and methodology In addition the volume includes a Foreward by Barbara Frankel Campbell and an unusual Appendix Donald Campbell s complete curriculum vitae Variations in Organization Science should be on the top of the reading list for any organization scientist interested in organizational evolution change and competitiveness This volume will also appeal to any scholar interested in the human and social capital base of firms and how organizational knowledge and learning work to provide the basis of competitive advantage

Scholarship and Christian Faith Douglas Jacobsen, Rhonda Hustedt Jacobsen, 2004-04-08 This book enters a lively discussion about religious faith and higher education in America that has been going on for a decade or more During this time many scholars have joined the debate about how best to understand the role of faith in the academy at large and in the special arena of church related Christian higher education The notion of faith informed scholarship has of course figured prominently in this conversation But argue Douglas and Rhonda Jacobsen the idea of Christian scholarship itself has been remarkably under discussed Most of the literature has assumed a definition of Christian scholarship that is Reformed and evangelical in orientation a model associated with the phrase the integration of faith and learning The authors offer a new definition and analysis of Christian scholarship that respects the insights of different Christian traditions e g Catholic Lutheran Anabaptist Wesleyan Pentecostal and that applies to the arts and to professional studies as much as it does to the humanities and the natural and social sciences The book itself is organized as a conversation Five chapters by the Jacobsens alternate with four contributed essays that sharpen illustrate or complicate the material in the preceding chapters The goal is both to map the complex terrain of Christian scholarship as it actually exists and to help foster better connections between Christian scholars of differing persuasions and between Christians and the academy as a whole

The Rhetoric of RHETORIC Wayne C. Booth, 2009-02-09 In this manifesto distinguished critic Wayne Booth claims that communication in every corner of life can be improved if we study rhetoric closely Written by Wayne Booth author of the seminal book *The Rhetoric of Fiction* 1961 Explores the consequences of bad rhetoric in education in politics and in the media Investigates the possibility of reducing harmful conflict by practising a rhetoric that depends on deep listening by both sides

The Cosmic Breath Amos Yong, 2012-05-10 The interjection of pneumatology in both theologies of interreligious dialogue and in the theology and science conversation comes together in this volume The resulting Christianity Buddhism science dialogue opens up to new pneumatological perspectives on philosophical cosmology and anthropology in interdisciplinary and global context

Rethinking the Curriculum Orlando Nang Kwok Ho, 2018-12-13

This book is an inter disciplinary endeavour Encompassing education and basic research it discusses the modular curriculum embodied in The Epistle from educational historical sociolinguistic anthropological phenomenological and non sectarian perspectives It shows the cross boundary philosophical reasoning and pedagogic dimensions of St Paul as a great teacher and thinker from the Jewish and Christian faith In doing so this book refocuses academia s attention on the inevitable antimononic nature inherent in humans efforts to create systemic knowledge Knowledge about the inner aesthetic and volitional interpretative self the immanent psychic I and other philosophical aspects of the realm of the transcendental should be rescued from the deepening trends of secularity Being strong powerful productive and performative should not be taken as the indisputable and exclusive aim of education Science Technology Engineering and Mathematics STEM do not constitute a sufficient basis for building a better humanity Education via public curriculums ought to serve both the belly and the mind Deliberative curricular recalibrations with rationales for grace are thus needed for a better future for humanity This book is relevant for anyone with a core fascination about truths values epistemologies life spirituality and holistic human development It can also be used as a textbook or a reference in a number of fields including counselling psychology translation cultural studies and theology Maximus the Confessor and Evolutionary Biology Andrew P. Jackson,2024-11-04

This book brings Maximus the Confessor s logoi doctrine into dialogue with modern day evolutionary biology It explores the extent to which the logoi as described by Maximus exhibit features that are concordant with evolution before going on to consider more discordant aspects that cannot be ignored The author addresses the curious resonance between the logoi and evolution in a systematic way through a close reading of primary textual material allied with a deep understanding of both the classical Darwinian and extended evolutionary syntheses The study joins with other Maximian interpreters in attesting to the incarnational and theophanic nature of the logoi but seeks to extend this distinctively Eastern Christo cosmology into the problematic territory of biological evolution a territory historically dominated by Western scholarship The book will be of interest to scholars of religion and science as well as Patristics and the Eastern Orthodox theological traditions

Evolution and Emergence William R. Stoeger,2007-04-05 A collection of essays by experts in the field exploring how nature works at every level to produce more complex and highly organized objects systems and organisms from much simpler components and how our increasing understanding of this universal phenomenon of emergence can lead us to a deeper and richer appreciation of who we are as human beings and of our relationship to God Several chapters introduce the key philosophical ideas about reductionism and emergence while others explore the fascinating world of emergent phenomena in physics biology and the neurosciences Finally there are contributions probing the meaning and significance of these findings for our general description of the world and ourselves in relation to God from philosophy and theology The collection as a whole will extend the mutual creative interaction among the sciences philosophy and theology **From Passions to Emotions** Thomas Dixon,2003-06-05 Today there is a thriving emotions industry to which philosophers

psychologists and neuroscientists are contributing Yet until two centuries ago the emotions did not exist In this path breaking study Thomas Dixon shows how during the nineteenth century the emotions came into being as a distinct psychological category replacing existing categories such as appetites passions sentiments and affections By examining medieval and eighteenth century theological psychologies and placing Charles Darwin and William James within a broader and more complex nineteenth century setting Thomas Dixon argues that this domination by one single descriptive category is not healthy Overinclusivity of the emotions hampers attempts to argue with any subtlety about the enormous range of mental states and stances of which humans are capable This book is an important contribution to the debate about emotion and rationality which has preoccupied western thinkers throughout the eighteenth and nineteenth centuries and has implications for contemporary debates

The Entangled Trinity Ernest L. Simmons,2014 The Doctrine of the Trinity is an exercise in wonder It is drawn from the wonder of our own existence and the diverse experiences of the divine encountered by the early Christian community From the earliest days of Christianity theologians of the church have drawn upon the most sophisticated language and understandings of their time in an attempt to clarify and express that faith In this volume Ernest Simmons asks what the current scientific understanding of the natural world might contribute to our reflection upon the relationship of God and the world in a Triune fashion

The Power of Paradox: Impossible Conversations Markus Locker,2019-05-07 This book argues that all truths systems include paradoxes Paradoxes such as found in the sciences philosophy and religion offer themselves as mutually shared partners in a dialogue of arguably incommensurable truths on the basis of their underlying truth Paradoxes leap beyond the epistemic border of individual truth claims A dialogue of truths grounded in paradox reaches before and at the same time past singular truths A paradox based dialogue of truths elevates the communication of disciplines such as the sciences and religion to a meta discourse level from which differences are not perceived as obstacles for dialogue but as complementary aspects of a deeper and fuller truth in which all truths are grounded

Being Religious Mladen Turk,2013-07-12 What makes us religious What is religion This book presents relevant research and theoretical proposals for evolutionary theories of religion and socially and ecologically adaptive theories of religion Most attempts to study religious behaviors through evolutionary biology and related disciplines are still very fragmentary Mladen Turk brings those theoretical approaches in dialogue with religious studies and theology through interpretation and critique that centers on revealing hidden theological assumptions and interpreting theoretical leaps of those approaches to religion In *Being Religious* Turk expounds understanding of religion as a complex interplay of various capacities arising from and influencing our biological and cultural makeup Our religious behaviors can influence our relationship towards each other and towards our environment in significant ways He shows how some aspects of complex religious behaviors can be understood better in light of human cognition and evolutionary biology At the same time he interprets this knowledge as being preliminary and at times inadequate in its claims of completeness and exhaustiveness because religious behaviors are niched within other

religious behaviors and dependent on factors that various mono causal theoretical approaches cannot fully conceptualize

The Blackwell Companion to Modern Theology Gareth Jones,2008-04-15 In this major reference work a team of the world's leading theologians provides a powerful overview of modern theology Covers theology's relation to other disciplines the history of theology major themes key figures and contemporary issues Can be used as the basis for an introductory course or as an essential reference source

Scientific Theology: Nature Alister E. McGrath,2007-01-23 A Scientific Theology is a groundbreaking work of systematic theology in three volumes Nature Reality and Theory Now available as a three volume set

God's Action in Nature's World Nathan Hallanger,2016-04-22 In 1981 Robert John Russell founded what would become the leading center of research at the interface of science and religion the Center for Theology and the Natural Sciences Throughout its twenty five year history CTNS under Russell's leadership has continued to guide and further the dialogue between science and theology Russell has been an articulate spokesperson in calling for creative mutual interaction between the two fields God's Action in Nature's World brings together sixteen internationally recognized scholars to assess Robert Russell's impact on the discipline of science and religion Focusing on three areas of Russell's work methodology cosmology and divine action in quantum physics this book celebrates Robert John Russell's contribution to the interdisciplinary engagement between the natural sciences and theology
