## **Religion Science And Naturalism:**

Religion, Science and Naturalism Willem B. Drees,1998-11-12 This book considers the consequences of the natural sciences physics biology neurosciences for our view of the world Willem Drees argues that religion and morality are to be understood as rooted in our evolutionary past and neurophysiological constitution His book takes a more radical naturalist position than most on religion and science But religion is not dismissed religious traditions remain important as bodies of wisdom and vision      **Where the Conflict Really Lies** Alvin Plantinga,2011-11-30 In this long awaited book pre eminent analytical philosopher Alvin Plantinga argues that the conflict between science and theistic religion is actually superficial and that at a deeper level they are in concord      **Science and Religion in American Thought** Edward Arthur White,1952

**Science Without God?** Peter Harrison,Jon H. Roberts,2019-01-03 Can scientific explanation ever make reference to God or the supernatural The present consensus is no indeed a naturalistic stance is usually taken to be a distinguishing feature of modern science Some would go further still maintaining that the success of scientific explanation actually provides compelling evidence that there are no supernatural entities and that true science from the very beginning was opposed to religious thinking Science without God Rethinking the History of Scientific Naturalism shows that the history of Western science presents us with a more nuanced picture Beginning with the naturalists of ancient Greece and proceeding through the middle ages the scientific revolution and into the nineteenth century the contributors examine past ideas about nature and the supernatural Ranging over different scientific disciplines and historical periods they show how past thinkers often relied upon theological ideas and presuppositions in their systematic investigations of the world In addition to providing material that contributes to a history of nature and naturalism this collection challenges a number of widely held misconceptions about the history of scientific naturalism      **Religion and Scientific Naturalism** David Ray

Griffin,2000-05-11 Winner of the 2000 Scientific and Medical Network Book Prize In this book David Ray Griffin argues that the perceived conflict between science and religion is based upon a double mistake the assumption that religion requires supernaturalism and that scientific naturalism requires atheism and materialism      **Naturalism** Hyung S. Choi,David F. Siemens,Shirley E. Williams,2001-01-01      **The Question of Methodological Naturalism** Jason N. Blum,2018-09-11 The traditions and institutions that we call religions abound with references to the supernatural ancestral spirits karma the afterlife miracles revelation deities etc How are students of religion to approach the behaviors doctrines and beliefs that refer to such phenomena which by their very nature are supposed to defy the methods of empirical research and the theories of historical scholarship That is the question of methodological naturalism The Question of Methodological Naturalism offers ten thoughtful engagements with that perennial question for the academic study of religion Contributors include established senior scholars and newer voices propounding a range of perspectives resulting in both surprising points of convergence and irreconcilable differences in how our shared discipline should be conceptualized and practiced      *Naturalism, Theism and*

*the Cognitive Study of Religion* Aku Visala, 2016-04-22 This book provides a critical philosophical analysis of the claim that contemporary cognitive approaches to religion undermine theistic beliefs. Recent scientific work into the evolution and cognition of religion has been driven by and interpreted in terms of a certain kind of philosophical and methodological naturalism. The book argues that such naturalism is not necessary for the cognitive study of religion and develops an alternative philosophical and methodological framework. This alternative framework opens the cognitive study of religion to theological and philosophical considerations and clarifies its relationship to other approaches to religious phenomena. This unique contribution to discussions regarding the philosophical and theological implications of the cognitive study of religion summarizes the so far fragmentary discussion, exposes its underlying assumptions, and develops a novel framework for further discussion.

**Is Nature Enough?** John F. Haught, 2006-05-04 Is nature all there is? John Haught examines this question and in doing so addresses a fundamental issue in the dialogue of science with religion. The belief that nature is all there is and that no overall purpose exists in the universe is known broadly as naturalism. Naturalism in this context denies the existence of any realities distinct from the natural world and human culture. Since the rise of science in the modern world has had so much influence on naturalism's intellectual acceptance, the author focuses on scientific naturalism and the way in which its defenders are now attempting to put a distance between contemporary thought and humanity's religious traditions. Haught seeks to provide a reasonable, scientifically informed alternative to naturalism. His approach will provide the basis for lively discussion among students, scholars, scientists, theologians, and intellectually curious people in general.

*Scientism: Science, Ethics and Religion* Mikael Stenmark, 2020-10-28 This title was first published in 2011. The intellectual and practical successes of science have led some scientists to think that there are no real limits to the competence of science and no limits to what can be achieved in the name of science. This view and similar views have been called Scientism. In this book, scientists' views about science and its relationship to knowledge, ethics, and religion are subjected to critical scrutiny. A number of natural scientists have

advocated Scientism in one form or another Francis Crick Richard Dawkins Carl Sagan and Edward O Wilson and their impact inside and outside the sciences is considered Clarifying what Scientism is this book proceeds to evaluate its key claims expounded in questions such as is it the case that science can tell us everything there is to know about reality Can science tell us how we morally ought to live and what the meaning of life is Can science in fact be our new religion Ought we become science believers The author addresses these and similar issues concluding that Scientism is not really science but disguised materialism or naturalism its advocates fail to see this not being sufficiently aware that their arguments presuppose the previous acceptance of certain extra scientific or philosophical beliefs      *Science's Blind Spot* Cornelius Hunter, 2007-06-01 Had evolutionists been in charge they wouldn't have made the mosquito planetary orbits would align perfectly and the human eye would be better designed But they tend to gloss over their own failed predictions and faulty premises Naturalists see Darwin's theories as logical and that's enough To think otherwise brands you a heretic to all things wise and rational Science's Blind Spot takes the reader on an enlightening journey through the ever evolving theory of evolution Cornelius G Hunter goes head to head with those who twist textbooks confuse our children and reject all challengers before they can even speak This fascinating fact filled resource opens minds to nature in a way that both seeks and sees the intelligent design behind creation's masterpieces      *Faith and Evolution* Haight SJ, Roger, 2019-10-24      **The Wedge of Truth** Phillip E. Johnson, 2002-08-02 Phillip E Johnson highlights the deficiencies in science and the philosophy naturalism that undergirds and outlines a cognitive revolution      **Reason in the Balance** Phillip E. Johnson, 1998-06-29 Phillip E Johnson exposes the flawed underpinnings of naturalism in this discussion of evolution sex education abortion God the search for a grand unified theory in physics what our public schools should teach the basis of law and more

**Naturalism and Protectionism in the Study of Religions** Juraj Franek, 2020-02-06 How should we study religion Must we be religious ourselves to truly understand it Do we study religion to advance our knowledge or should the study of religions help to reintroduce the sacred into our increasingly secularized world Juraj Franek argues that the study of religion has long been split into two competing paradigms reductive naturalist and non reductive protectionist While the naturalistic approach seems to run the risk of explaining religious phenomena away the protectionist approach appears to risk falling short of the methodological standards of modern science Franek uses primary source material from Greek and Latin sources to show that both competing paradigms are traceable to Presocratic philosophy and early Christian literature He presents the idea that naturalists are distant heirs not only of the French Enlightenment but also of the Ionian one Likewise he argues that protectionists owe much of their arguments and strategies not only to Luther and the Reformation but to the earliest Christian literature This book analyses the conflict between reductive and non reductive approach in the modern study of religions and positions the Cognitive Science of Religion against a background of previous theories ancient and modern to demonstrate its importance for the revindication of the naturalist paradigm      **Two Great Truths** David Ray

Griffin,2004-01-01 Furthering his contribution to the science and religion debate David Ray Griffin draws upon the cosmology of Alfred North Whitehead and proposes a radical synthesis between two worldviews sometimes thought wholly incompatible He argues that the traditions designated by the names scientific naturalism and Christian faith both embody a great truth a truth of universal validity and importance but that both of these truths have been distorted fueling the conflict between the visions of the scientific and Christian communities Griffin contends however that there is no inherent conflict between science or even the kind of naturalism that it properly presupposes and the Christian faith understood in terms of the primary doctrines of the Christian good news      **The Routledge Companion to Religion and Science** James W.

Haag,Gregory R. Peterson,Michael L. Spezio,2012-03-12 The field of religion and science is one of the most exciting and dynamic areas of research today This Companion brings together an outstanding team of scholars to explore the ways in which science intersects with the major religions of the world and religious naturalism The collection provides an overview of the field and also indicates ways in which it is developing Its multicultural breadth and scientific rigor on topics that are and will be compelling issues in the first part of the twenty first century and beyond will be welcomed by students and scholars alike
