Brümmer on Meaning and the Christian Faith Vincent Brümmer,2019-10-01 This volume presents a wide ranging selection from the writings of a leading contemporary philosophical theologian Vincent Brümmer In his many books and articles Brümmer has demonstrated how the tools of philosophical analysis are not only fruitful but also essential for dealing with the central issues of systematic theology The title of this volume *Meaning and the Christian Faith* highlights two characteristic themes that recur throughout the many writings of Vincent Brümmer Much of his work has been devoted to exploring the meaning of the Christian faith and especially of its central claim that God is a personal being whose fellowship believers may enjoy On the other hand Brümmer has also shown that religious belief should not be understood as an explanatory theory but rather as a way in which believers understand the meaning of their lives and their experience of the world and direct their lives accordingly Thus in the Christian tradition believers claim that their lives are meaningful because they seek to attain ultimate happiness in the love of God In the introductory sections throughout this volume Vincent Brümmer describes how he came to pay attention to the various themes dealt with in his writings and explains why he came to deal with them in the ways he did

An Analytical Philosophy of Religion Willem Frederik Zuurdeeg,2013-05-02 This original study published initially in 1959 introduces students of philosophy and of theology to a treatment of religion based upon the methods of modern philosophy particularly logical empiricism and

existentialism Above and beyond the importance of its point of view this book is distinguished by its clarity and by its objective and understanding presentation of diverse points of view Language and the Structure of Berkeley's World Kenneth L. Pearce, 2017 According to George Berkeley 1685 1753 there is fundamentally nothing in the world but minds and their ideas Ideas are understood as pure phenomenal feels which are momentarily had by a single perceiver then vanish Surprisingly Berkeley tries to sell this idealistic philosophical system as a defense of common sense and an aid to science However both common sense and Newtonian science take the perceived world to be highly structured in a way that Berkeley's system does not appear to allow Kenneth L Pearce argues that Berkeley's solution to this problem lies in his innovative philosophy of language The solution works at two levels At the first level it is by means of our conventions for the use of physical object talk that we impose structure on the world At a deeper level the orderliness of the world is explained by the fact that according to Berkeley the world itself is a discourse spoken by God the world is literally an object of linguistic interpretation The structure that our physical object talk in common sense and in Newtonian physics aims to capture is the grammatical structure of this divine discourse This approach yields surprising consequences for some of the most discussed issues in Berkeley's metaphysics Most notably it is argued that in Berkeley's view physical objects are neither ideas nor collections of ideas Rather physical objects like forces are mere quasi entities brought into being by our linguistic practices

Language and Cultural Change Lodi Nauta, 2006 It is common wisdom that language is culturally embedded Cultural change is often accompanied by a change in idiom in language or in ideas about language No period serves as a better example of the formative influence of language on culture than the Renaissance With the advent of humanism new modes of speaking and writing arose But not only did classical Latin become the paradigm of clear and elegant writing it also gave rise to new ideas about language and the teaching of it Some scholars have argued that the cultural paradigm shift from scholasticism to humanism was causally determined by the rediscovery study and emulation of the classical language for learning a new language opens up new possibilities for exploring and describing one's perceptions thoughts and beliefs However the vernacular traditions too rose to prominence and vied with Latin for cultural prestige This volume number XXIV in the series Groningen Studies in Cultural Change offers the papers presented at a workshop on language and cultural change held in Groningen in February 2004 Ten specialists explore the multifarious ways in which language contributed to the shaping of Renaissance culture They discuss themes such as the relationship between medieval and classical Latin between Latin and the vernacular between humanist and scholastic conceptions of language and grammar translation from Latin into the vernacular Jewish ideas about different kinds of Hebrew and shifting ideas on the power and limits of language in the articulation of truth and divine wisdom There are essays on major thinkers such as Nicholas of Cusa and Leonardo Bruni but also on less well known figures and texts The volume as a whole hopes to contribute to a deeper understanding of the highly complex interplay between language and culture in the transition period between the fourteenth and sixteenth

centuries *A Grammar of Christian Faith* Joe R. Jones, 2002-06-03 *A Grammar of Christian Faith* is a two volume set that aims to confront the widespread disarray in the language and practices of Christian faith today As a grammar it explains how Christian faith provides special ways of speaking and acting that make sense of human life by giving it meaning practicality and hope It advances the thesis that learning how to speak Christian language in worship and life is crucial to learning how to be a Christian Rather than supposing that Christian language and theology need continual updating in order to be relevant to the world Jones urges the church to recover anew how Christian concepts and understanding are intended to form Christian life in all its rich depths Construing theology as confessional theology in the context of the church Jones understands the church as that liberative and redemptive community called into being by the Gospel of Jesus Christ to witness in word and deed the triune God for the benefit of the world The full range of doctrinal themes that are deemed essential to the witness of the church are explored including clear explanations of why they are essential and how they are to be understood In pursuit of a truthful and beneficial witness of the church the work centers on a trinitarian understanding of God in which God freely and lovingly interacts with the world as Creator Reconciler and Redeemer The work throughout affirms the belief that the gracious triune God is the Ultimate Companion who will redeem all creation *The Routledge Handbook of Language and Identity* Siân Preece, 2016-02-12 *The Routledge Handbook of Language and Identity* provides a clear and comprehensive survey of the field of language and identity from an applied linguistics perspective Forty one chapters are organised into five sections covering theoretical perspectives informing language and identity studies key issues for researchers doing language and identity studies categories and dimensions of identity identity in language learning contexts and among language learners future directions for language and identity studies in applied linguistics Written by specialists from around the world each chapter will introduce a topic in language and identity studies provide a concise and critical survey in which the importance and relevance to applied linguists is explained and include further reading *The Routledge Handbook of Language and Identity* is an essential purchase for advanced undergraduate and postgraduate students of Linguistics Applied Linguistics and TESOL Advisory board David Block Instituci Catalana de Recerca i Estudis Avanats Universitat de Lleida Spain John Joseph University of Edinburgh Bonny Norton University of British Columbia Canada **Thinking with Kierkegaard and Wittgenstein** Richard Griffith Rollefson, 2014-10-20 Paul L Holmer influenced the development of the so called Yale School and several generations of students by seeing common logical and ethico religious themes in the works of Soren Kierkegaard and Ludwig Wittgenstein Holmer is perhaps the preeminent interpreter of Kierkegaard with his analysis of the logic of Kierkegaard's truth as subjectivity and the morphology of the life of Christian belief In his polemical and constructive work *The Grammar of Faith* Holmer explored the significance of the later philosophy of Ludwig Wittgenstein for theology and proposed a critical alternative to contemporary academic theology In his C S Lewis *The Shape of His Life and Thought Making Christian Sense* and various essays now compiled in *The Paul L Holmer papers*

Holmer's reassessment of the traditional concepts of virtues and vices his recognition of the importance of Christian praxis in providing the context for theological and ethical reflection together with his emphasis on the role of emotions and passions in the life of faith portray how the Christian faith forms character and helps one make sense with one's life **Evangelical Dictionary of Theology (Baker Reference Library)** Walter A. Elwell, 2001-05-01 Fifteen years after its original publication comes a thoroughly revised edition of the Evangelical Dictionary of Theology Every article from the original edition has been revisited With some articles being removed others revised and many new articles added the result is a completely new dictionary covering systematic historical and philosophical theology as well as theological ethics *Modern Religion, Modern Race* Theodore Vial, 2016-06-16 Religion is a racialized category even when race is not explicitly mentioned Modern Religion Modern Race argues that because the concepts of religion and race are rooted in the post Enlightenment project of rethinking what it means to be human we cannot simply will ourselves to stop using these categories Only by acknowledging that religion is already racialized can we begin to understand how the two concepts are intertwined and how they operate in our modern world *The Lloyd Geering Reader* Lloyd Geering, 2007 Covering a period of more than 45 years this is the first collection of the writings of international figure Lloyd Geering a premier public intellectual who was once found guilty of heresy by the Presbyterian Church With never before seen material this compendium demonstrates the remarkable consistency in the thought of this increasingly influential thinker Provocative and heartfelt this compilation provides a fascinating coverage of the engagement of religion and the modern world Cybernetics And Systems '94 - Proceedings Of The 12th European Meeting On Cybernetics And Systems Research (In 2 Volumes) Robert Trappl, 1994-03-15 The papers in this volume reflect the most recent research findings in cybernetics and systems research They were selected from 298 draft final papers which were submitted to the conference by authors from more than 30 different countries from five continents
