Religious Impact On The Nation State:

Religious Impact on the Nation State Pat Williams, Toyin Falola, 1995 This text examines the link between religion and politics both at the level of theory and with specific reference to Nigeria The first part of the book focuses on major local issues and the second on how religion affects the country's relations The religious problem has become prominent not only for its recurrence but also for its intensity Nigeria itself is plural with innumerable religious groups although this need not be a problem if pluralism is used to promote freedom of association democracy and human rights It does become a problem if as this book notes religious groups make self centered demands on the state when the state succumbs to such demands or to blackmail and when public officers use religious groups and leaders for their own political survival **Religion, State and**

the United Nations Anne Stensvold, 2016-07-22 This volume approaches the UN as a laboratory of religious political value politics Over the last two decades religion has acquired increasing influence in international politics and religious violence and terrorism has attracted much scholarly attention But there is another parallel development which has gone largely unnoticed namely the increasing political impact of peaceful religious actors With several religious actors in one place and interacting under the same conditions the UN is as a multi religious society writ small The contributors to this book analyse the most influential religious actors at the UN including The Roman Catholic Church The Organisation of Islamic Countries the Russian Orthodox Church Mapping the peaceful political engagements of religious actors who they are and how they collaborate with each other whether on an ad hoc basis or by forming more permanent networks throwing light at the modus operandi of religious actors at the UN their strategies and motivations The chapters are closely interrelated through the shared focus on the UN and common theoretical perspectives and pursue two intertwined aspects of religious value politics namely the whys and hows of cross religious cooperation on the one hand and the interaction between religious actors and states on the other Drawing together a broad range of experts on religious actors this work will be of great interest to students and scholars of Religion and Politics International Relations and the UN **Religion, Conflict, and Democracy**

in Modern Africa Samuel K. Elolia, 2012-03-02 Spanning various regions of Sub Saharan Africa the authors of this volume come together to explore the complex relationship between religion and democracy in contemporary Africa As a result of the end of the Cold War and the fall of the Soviet Union many African countries have come to the realization however partial that political and social change is inevitable in spite of government heavy handedness and threats It has also become evident that no political system that refuses to permit freedom of political expression and alternative systems of governance could continue to be sustained It is in precisely this political climate that religious institutions have collaborated with other elements of civil society to call for political reforms with the church often becoming the prominent voice against oppressive governments in countries such as Kenya and South Africa It is the purpose of this book to assess how religion shapes political issues and to what extent religious forces influence the civil society By acknowledging the role of the civil society the essays

Negotiating State and Non-State Law Michael A. Helfand, 2015-07-02 Non state law is playing an increasing role in both public and private ordering Numerous organizations have emerged alongside the nation state each purporting to provide their members with rules and norms to govern their conduct and organize their affairs The nation state increasingly finds itself sandwiched between two broad and contrasting categories of non state law The first law above the state captures legal systems that function across the territorial borders of nation states The second category law below the state includes forms of local customary religious and indigenous law As these forms of non state law persist and proliferate alongside the nation state the relationship between state and non state law becomes more complex multifaceted and tense This volume addresses this relationship considering whether and to what extent state and non state law can coexist and how each form of law seeks to influence as well as transform the other

The Logic of Ethnic and Religious Conflict in Africa John F. McCauley, 2017-04-27 This book explains why conflicts in Africa are sometimes ethnic and sometimes religious and why a conflict might change from ethnic to religious even as the opponents remain fixed Conflicts in the region are often viewed as either tribal or Muslim Christian seemingly rooted in deep seated ethnic or religious hatreds Yet as this book explains those labels emerge as a function of political mobilization It argues that ethnicity and religion inspire distinct passions among individuals and that political leaders exploit those passions to achieve their own strategic goals when the institutions of the state break down To support this argument the book relies on a novel experiment conducted in Cote d'Ivoire and Ghana to demonstrate that individual preferences change in ethnic and religious contexts It then uses case illustrations from Cote d'Ivoire Nigeria and Sudan to highlight the strategic choices of leaders that ultimately shape the frames of conflict

Religious Resurgence Richard T. Antoun, Mary Elaine Hegland, 1987

How Violence Shapes Religion Ziya Meral, 2018-08-23 Is there an inevitable global violent clash unfolding between the world's largest religions Islam and Christianity Do religions cause violent conflicts or are there other factors at play How can we make sense of increasing reports of violence between Christian and Muslim ethnic communities across the world By seeking to answer such questions about the relationship between religion and violence in today's world Ziya Meral challenges popular theories and offers an alternative explanation grounded on insights inferred from real cases of ethno religious violence in Africa and the Middle East The relationship between religion and violence runs deep and both are intrinsic to the human story Violence

leads to and shapes religion while religion acts to enable violence as well as providing responses that contain and prevent it. However, with religious violence being one of the most serious challenges facing the modern world, Meral shows that we need to de-globalise our analysis and focus on individual conflicts instead of attempting to provide single answers to complex questions.

Religion-State Encounters in Hindu Domains Vineeta Sinha, 2011-04-07

The historical and empirical project presented here is grounded in a desire to theorize religion-state relations in the multi-ethnic, multi-religious, secular city-state of Singapore. The core research problematic of this project has emerged out of the confluence of two domains: religion, law, and bureaucracy; and religion and colonial encounters. This work has two core objectives: one to articulate the actual points of engagement between institutions of religion and the state, and two to identify the various processes, mechanisms, and strategies through which relations across these spheres are sustained. The thematic foundations of this book rest on disentangling the complex interactions between religious communities, individuals, and the various manifestations of the Singapore state relationships that are framed within a culture of bureaucracy. This is accomplished through a scrutiny of Hindu domains on the island nation-state from her identity as part of the Straits Settlements to the present day. The empirical and analytical emphases of this book rest on the author's engagement with the realm of Hinduism as it is conceived, structured, framed, and practiced within the context of a strong state in Singapore today. Ethnographically, the book focusses on Hindu temple management and the observance of Hindu festivals and processions enacted within administrative and bureaucratic frames.
