Human Geography Mark Boyle, 2021-04-12 Revised Extended and Extensively Updated Text Uses Historical Geographical and Thematic Approach to Provide Undergraduates with a Firm Foundation in Human Geography Drawing on nearly three decades of instructional experience and a wealth of testing pedagogical innovations with students Mark Boyle has revised and expanded this authoritative and comprehensive introduction to Human Geography As with the First Edition Boyle follows the premise that history makes geography whilst geography makes history and that the key to studying the principal demographic social political economic cultural and environmental processes in any region in the world today is to look at how that region has been impacted by and in turn has impacted the story of the rise reign and decline of the West Moreover he argues that Human Geography itself is best understood as both an intellectual endeavour and a historical political and institutional project Informed by recent developments in post colonial scholarship the book covers key concepts seminal thinkers and influential texts in the field Although designed for the beginner student Boyle does not shy away from ideas and debates often avoided in introductory texts clearly communicating theory without condescension In addition he places human geography in its larger academic context discussing the influences on the field from related subjects Notable features in the Second Edition include Extensive revision and updating of coverage of key ideas developments debates and case studies New chapter on uneven geographical development at different scales and development theory and practice Dedicated coverage of Covid 19s geographies New learning resources figures tables plates maps Deep Dive boxes etc throughout the text plus learning objectives essay questions checklists summarizing key ideas and guidance for further reading Updated and expanded companion website with MP4 and MP3 chapter by chapter lectures and PowerPoint slides for each chapter new multiple choice exam paper and additional essay style exam questions and a wide range of student tutorial exercises Human Geography An Essential Introduction Second Edition is an excellent foundational text for undergraduate courses in human geography globalization Western civilization historiographies of intellectual thought the grand public problems confronting humanity in the twenty first century and other wider social science courses **GEOGRAPHICAL THOUGHT, SECOND EDITION** DIKSHIT, R. Tse, 2024-12-02 This international and interdisciplinary handbook offers a comprehensive and an in depth overview of contemporary research theory and practice in the geographies of religion in various parts of the world and with different populations The book showcases the major theoretical interventions in the field and the debates about the existential constitution of sacred space and what this means for secularization It outlines the most significant geographical themes related to these new developments with their implications for how to think about landscapes space bodies and worlds The book also discusses the future of the field especially in the realms of encounters and ethics economies and markets institutions and organisations movements and migrations and media and mediums It also offers views from disciplines outside of geography including from sociology anthropology religious studies and media and communications which demonstrates the contributions of geographers of religion to wider intellectual conversations and debates **Textures of Place** Paul C. Adams, Steven D. Hoelscher, Karen E. Till, 2001 A fresh and far ranging interpretation of the concept of place

this volume begins with a fundamental tension of our day as communications technologies help create a truly global economy the very political economic processes that would seem to homogenize place actually increase the importance of individual localities which are exposed to global flows of investment population goods and pollution Place no less today than in the past is fundamental to how the world works The contributors to this volume distinguished scholars from geography art history philosophy anthropology and American and English literature investigate the ways in which place is embedded in everyday experience its crucial role in the formation of group and individual identity and its ability to reflect and reinforce power relations Their essays draw from a wide array of methodologies and perspectives including feminism ethnography poststructuralism ecocriticism and landscape ichnography to examine themes as diverse as morality and imagination attention and absence personal and group identity social structure home nature and cosmos

Power and Space John Allen, 2024-08-05 *Power and Space* sets out the inherently spatial nature of power today and seeks to change the conversation around how power exercises us in the contemporary moment The essays brought together in this book are a response to the fact that conventional descriptions of power and its ordered geographies no longer chime with our lived experience Spatiality matters to the workings of power nowadays and this book sheds light on what it is that we face when power is exercised through more subtle spatially nuanced arrangements It is divided into three parts each representing a different kind of engagement with power's relationship to space from the spatial shifts in the way power is exercised through to its assemblage like entanglements and in turn its progressive topological character Throughout the book a wide range of social political and economic examples are drawn upon to illustrate a more provisional sense of power ranging for instance from the seductive logic of privatized public spaces to the attempt by a data analytics company to manipulate political behaviour through to the offshore spaces invented by rising financial elites to challenge the established banking order Illustrating the new found abilities of the powerful to make their presence felt this book provides an accessible account of the practical workings of power in the present day It will be invaluable to students and academics in human geography and urban studies as well as politics sociology and cultural studies

Social Science Perspectives on Climate Change David Canter, 2017-10-02 Although it is generally accepted that the climate is changing for the worse and that human activities are a major contributing factor in that change there is still only marginal response to the challenge posed by climate change The reasons behind this limited response are becoming clearer through the recognition that climate change is not just a set of physical science facts but it is also part of a series of complex social processes Consequently this book is important in providing social science perspectives on a range of attempts to adjust human activity to reduce its environmental impact These attempts vary from the changing of the dress code in Japanese offices to the creation of zero carbon gated communities in Bangalore India Taken together the contributions to this book provide timely insights into the complexities of saving the planet through human endeavour This book was originally published as a special issue of *Contemporary Social*

Science Poststructuralist Geographies Marcus Doel, 1999-08-30 This work is the first attempt to integrate poststructuralist thought with the insights of critical human geography Doel does not seek to make conventional approximations of poststructuralist concepts but to rethink and rewrite the world through them **Rethinking Resource Management** Richard Howitt, 2002-01-31 This book offers students and practitioners a sophisticated and convincing framework for rethinking the usual approaches to resource management It uses case studies to argue that professional resource managers do not take responsibility for the social and environmental consequences of their decisions on the often vulnerable indigenous communities they affect It also discusses the invisibility of indigenous people values and knowledge within traditional resource management It offers a new approach to social impact assessment methods which are more participatory and empowering The book employs a range of case studies from Australia North America and Norway The Body and the City Steve Pile, 2013-02-01 Over the last century psychoanalysis has transformed the ways in which we think about our relationships with others Psychoanalytic concepts and methods such as the unconscious and dream analysis have greatly impacted on social cultural and political theory Reinterpreting the ways in which Geography has explored people's mental maps and their deepest feelings about places The Body and the City outlines a new cartography of the subject The author maps key coordinates of meaning identity and power across the sites of body and city Exploring a wide range of critical thinking particularly the work of Lefebvre Freud and Lacan he analyses the dialectic between the individual and the external world to present a pathbreaking psychoanalysis of space **Global Feminist Politics** Suki Ali, Kelly Coate, Wangui wa Goro, 2000-03-23 Featuring an international panel of cutting edge feminist thinkers Global Feminist Politics examines the changing context for feminist political action its meaning and forms Military Workfare Deborah Cowen, 2008-04-19 Despite the centrality of war in social and political thought the military remains marginal in academic and public conceptions of citizenship and the soldier seems to be thought of as a peripheral or even exceptional player Military Workfare draws on five decades of restricted archival material and critical theories on war and politics to examine how a military model of work discipline domestic space and the social self has redefined citizenship in the wake of the Second World War It is also a study of the complex often concealed ways in which organized violence continues to shape national belonging What does the military have to do with welfare Could war work be at the centre of social rights in both historic and contemporary contexts Deborah Cowen undertakes such important questions with the citizenship of the soldier front and centre in the debate Connecting global geopolitics to intimate struggles over entitlement and identity at home she challenges our assumptions about the national geographies of citizenship proposing that the soldier has in fact long been the model citizen of the social state Paying particular attention to the rise of neoliberalism and the emergence of civilian workfare Military Workfare looks to the institution of the military to unsettle established ideas about the past and raise new questions about our collective future Representing the City Anthony D. King, 1996-02 Classic representations of the city have focused on simplistic

urban dichotomies such as renewal or decline poverty or prosperity and vice or vigor We are left with the question of what actually constitutes a city and what makes it and its people succeed or fail Recent writing on the city however has begun to question the images metaphors and discourses through which the contemporary city is represented Discussing recent visual architectural and spatial transformations in New York and other major world cities in relation to the themes of ethnicity capital and culture Re Presenting the City moves between interpretive representations of the newly emerging metropolis and the theoretical and methodological questions raised by the task of such representations Contributors with backgrounds in urban planning sociology cultural studies architecture art history geography and philosophy reflect on the construction of both the real and the unreal city the images metaphors and discourses through which the contemporary city is represented and the texts which both mediate our experience of as well as contribute to producing the city of the future Tree Cultures

The City in Roman and Byzantine Egypt Richard Alston, 2002-09-11 For those wishing to study the Roman city in Egypt the archaeological record is poorer than that of many other provinces Yet the large number of surviving texts allows us to reconstruct the social lives of Egyptians to an extent undreamt of elsewhere We are not therefore limited to a history of the public faces of cities their inscriptions and the writings of their elites but can begin to understand what the transformations of the city meant for ordinary people and to uncover the forces that shaped the everyday lives of city dwellers After Egypt became part of the Roman Empire in 30 BC Classical and then Christian influences both made their mark on the urban environment This book examines the impact of these new cultures at every level of Egyptian society The result is a new and fascinating insight into the creation of a specific urban society in the Roman Empire as well as a case study for the model of urban development in antiquity
