Schneider, National Gallery of Art (U.S.), 1990 Rembrandt's Landscapes Cynthia P. Schneider, 1990 **Rembrandt's Landscapes** Cynthia P. Schneider, 1990 Rembrandt Achim Gnann, 2021-02 One of the most fascinating aspects of Rembrandt's oeuvre are his landscape drawings around 260 of which have survived Wandering through the city of Amsterdam he depicted neighbourhoods canals houses along the city wall and bulwarks with picturesque windmills as well as distinctive individual buildings Again and again he ventured into the surrounding landscape along the Amstel River or on the Kadijk and Diemerdijk capturing characteristic scenes in quick sketches with pen and brush or black chalk He was especially drawn to farmsteads with their neighbouring haystacks and groups of trees depicting them in very different ways under changing conditions of light and weather While some of his landscape studies are more expressive of an inner vision in others the artist seeks to render the richness and beauty of natural forms with great attention to detail In the late drawings individual features dissolve into an atmosphere suffused with light and air *Rembrandt's Landscapes*, 1990 **Rembrandt's Religious Prints** Charles M. Rosenberg, 2017-09-11 A stunning catalogue of the seventy religious prints from the 2017 exhibition featuring detailed background information on each piece Rembrandt's stunning religious prints stand as evidence of the Dutch master's extraordinary skill as a technician and as a testament to his genius as a teller of tales Here several virtually unknown etchings collected by the Feddersen family and now preserved for the ages at the University of Notre Dame are made widely available in a lavishly illustrated volume Building on the contributions of earlier Rembrandt scholars noted art historian Charles M Rosenberg illuminates each of the seventy religious prints through detailed background information on the artist's career as well as the historical religious and artistic impulses informing their creation Readers will enjoy an impression of the earliest work *The Circumcision* 1625 26 the famous *Hundred Guilder Print* the enigmatic eighth state of *Christ Presented to the People* one of a handful of examples of the very rare final posthumous state of *The Three Crosses* and an impression and counterproof of *The Triumph of Mordecai* From the joyous epiphany of the coming of the Messiah to the anguish of the betrayal of a father Jacob by his children from choirs of angels waiting to receive the Virgin into heaven to the dog who defecates in the road by an ancient inn *The Good Samaritan* Rembrandt's etchings offer a window into the nature of faith aspiration and human experience ranging from the ecstatically divine to the worldly and mundane Ultimately these prints modest intimate fragile objects are great works of art which like all masterpieces reward us with fresh insights and discoveries at each new encounter Despite many reliable catalogues of Rembrandt etchings very few have

focused on the religious content of these prints The outstanding range of the Feddersen Collection offers an excellent occasion for closer examination of Rembrandt's development as a printmaker but also as a spiritual devout Christian especially evident from his thoughtful return to the same subjects across his career Charles Rosenberg and his team at the Snite Museum deserve our thanks for fresh analysis of Rembrandt's religious prints combined with the latest scholarship on the artist and his etchings output Rembrandt scholars but also all lovers of the artist will want to consult this important catalogue Larry Silver author with Shelley Perlove of Rembrandt's Faith Church and Temple in the Dutch Golden Age Rembrandt's etchings of religious themes capture the emotional heart of their subjects through a uniquely inventive approach to both technique and content The seventy prints gathered by Jack and Alfrieda Feddersen span the full range of Rembrandt's production and offer an outstanding resource for appreciation and research This catalogue tells the fascinating story of how the collection was formed and brings a fresh analysis to each print Charles Rosenberg's extensive catalogue entries will be useful reading for anyone interested in the history of European art and one of its most talented practitioners Rembrandt van Rijn Stephanie Dickey Queen's University

The 'Small Landscape' Prints in Early Modern Netherlands Alexandra Onuf, 2017-01-02 In 1559 and 1561 the Antwerp print publisher Hieronymus Cock issued an unprecedented series of landscape prints known today simply as the Small Landscapes. The forty-four prints included in the series offer views of the local countryside surrounding Antwerp in simple unembellished compositions. At a time when vast panoramic and allegorical landscapes dominated the art market, the Small Landscapes represent a striking innovation. This book offers the first comprehensive analysis of the significance of the Small Landscapes in early modern print culture. It charts a diachronic history of the series over the century it was in active circulation from 1559 to the middle of the seventeenth century. Adopting the lifespan of the prints as the framework of the study, Alexandra Onuf analyzes the successive states of the plates and the changes to the series as a whole in order to reveal the shifting artistic and contextual valences of the images at their different moments and places of publication. This unique case study allows for a new perspective on the trajectory of print publishing over the course of the late sixteenth and early seventeenth centuries across multiple publishing houses, highlighting the seminal importance of print publishers in the creation and dissemination of visual imagery and cultural ideas. Looking at other visual materials and contemporary sources including texts as diverse as humanist poetry and plays, agricultural manuals, polemical broadsheets, and peasant songs, Onuf situates the Small Landscapes within the larger cultural discourse on rural land and the meaning of the local in the turbulent early modern Netherlands. The study focuses new attention on the active and reciprocal intersections between printed pictures and broader cultural, economic, and political phenomena.

Drawings by Rembrandt and His Pupils Rembrandt Harmenszoon van Rijn, Holm Bevers, 2009 This catalogue explores the workings of Rembrandt's studio in the form of drawings made by the master himself and fifteen of his pupils.

Robinson, 2016-08-02 This superb book presents 100 notable examples from the Harvard Art Museums distinguished collection of Dutch, Flemish, and Netherlandish drawings from the 16th to 18th century. Featuring such masters as Pieter Bruegel the Elder, Peter Paul Rubens, and Rembrandt van Rijn, the volume showcases beautiful color illustrations accompanied by insightful commentary on prevalent styles and techniques. Genres that define this artistic period: landscape, scenes of everyday life, portraiture, and still life are explored in detail. The book also presents the results of new conservation and technical study, including infrared analysis and scientific examinations of drawing materials. This revelatory new research has allowed previously illegible underdrawings and inscriptions in many of the artworks to surface for the first time, shedding light on longstanding mysteries of production and provenance.

Fifteenth- to Eighteenth-century European Drawings

Egbert Haverkamp Begemann (Kunsthistoriker), Metropolitan Museum of Art (New York, N.Y.), 1999 Early European art was a consuming interest of both Robert Lehman and his father Philip Lehman an interest reflected in the remarkable number and quality of drawings they owned from the fifteenth and early sixteenth centuries In addition to an important group of early German drawings the collection includes a Saint Paul from a series associated with Jan van Eyck and the famous Scupstoel from the circle of Rogier van der Weyden the only design for a decorative sculpture to survive from the fifteenth century The great artists of the seventeenth century Peter Paul Rubens Jacob Jordaens Claude Lorrain and Rembrandt among them are also represented Rembrandt by seven drawings including the large study of Leonardo's Last Supper that would stay in his mind all through his career Drawings by Antoine Watteau Jean Honor Fragonard Gabriel de Saint Aubin Thomas Gainsborough Paul Sandby and George Romney are among the many from eighteenth century France and England The volume discusses all 153 drawings at length placing each in its art historical setting and complementing the discussion with comparative illustrations of related works This e book on the MetPublications website is also accompanied by links to related works and under the Additional resourcestab are links to Met works of art and Heilbrunn Timeline of Art History essays and timelines viewed May 1 2014

Landscape and Religion from Van Eyck to Rembrandt Boudewijn Bakker, 2017-07-05 Offering a corrective to the common scholarly characterization of seventeenth century Dutch landscape painting as modern realistic and secularized Boudewijn Bakker here explores the long history and purpose of landscape in Netherlandish painting In Bakker's view early Netherlandish as well as seventeenth century Dutch painting can be understood only in the context of the intellectual climate of the day Concentrating on landscape painting as the careful depiction of the visible world Bakker's analysis takes in the thought of figures seldom consulted by traditional art historians such as the fifteenth century philosopher Dionysius the Carthusian the sixteenth century religious reformer John Calvin the geographer Abraham Ortelius and the seventeenth century poet Constantijn Huygens Probing their conception of nature as the first Book of God and art as its representation Bakker identifies a world view that has its roots in the traditional Christian perceptions of God and creation Landscape and Religion from Van Eyck to Rembrandt imposes a new layer of interpretation on the richly varied landscapes of the great masters In so doing it adds a new dimension to the insights offered by modern art historical research Further Bakker's explorations of early modern art and literature provide essential background for any student of European intellectual history

The Languages of Landscape, 1997 [The Frick Collection: Drawings, prints, and later acquisitions](#) Frick Collection, 1968 [Rembrandt and His Works](#) John Burnet, 1859 **A Corpus of Rembrandt Paintings VI** Ernst van de Wetering, 2014-11-11 A revised survey of Rembrandt's complete painted oeuvre The question of which 17th century paintings in Rembrandt's style were actually painted by Rembrandt himself had already become an issue during his lifetime It is an issue that is still hotly disputed among art historians today The problem arose because Rembrandt had numerous pupils who learned the art of painting by imitating their master or by assisting him with his work as a portrait

painter He also left pieces unfinished to be completed by others The question is how to determine which works were from Rembrandt's own hand Can we for example define the criteria of quality that would allow us to distinguish the master's work from that of his followers Do we yet have methods of investigation that would deliver objective evidence of authenticity To what extent do research techniques used in the physical sciences help Or are we after all still dependent on the subjective expert eye of the connoisseur The book provides answers to these questions Prof Ernst van de Wetering the author of our forthcoming book which deals with these questions has been closely involved in all aspects of this research since 1968 the year the renowned Rembrandt Research Project RRP was founded In particular he played an important role in developing new criteria for authentication Van de Wetering was also witness to the way the often overly zealous tendency to doubt the authenticity of Rembrandt's paintings got out of hand In this book he re attributes to the master a substantial number of unjustly rejected Rembrandts He also was closely involved in the re discovery of a considerable number of lost or completely unknown works by Rembrandt The verdicts of earlier specialists including the majority of members of the original RRP up to 1989 were based on connoisseurship the self confidence in one's ability to recognise a specific artist's style and hand Over the years Van de Wetering has carried out seminal research into 17th century studio practice and ideas about art current in Rembrandt's time In this book he demonstrates the fallibility of traditional connoisseurship especially in the case of Rembrandt who was par excellence a searching artist The methodological implications of this critical view are discussed in an introductory chapter which relates the history of the developments in this turbulent field of research Van de Wetering's account of his own involvement in it makes this book a lively and sometimes unexpectedly personal account The catalogue section presents a chronologically ordered survey of Rembrandt's entire painted oeuvre of 336 paintings richly illustrated and annotated For all the paintings re attributed in this book extensive commentaries have been included that provide a multi faceted new insight into Rembrandt's world and the world of art historical research Rembrandt's Paintings Revisited is the concluding sixth volume of A Corpus of Rembrandt Paintings Volumes I V 1982 1986 1989 2005 2010 It can also be read as a revisionary critique of the first three Volumes published by the old RRP team up till 1989 and of Gerson's influential survey of Rembrandt's painted oeuvre of 1968 69 At the same time the book is designed as an independent overview that can be used on the basis that anyone seeking more detailed information will be referred to the five previous digital versions of the Volumes and the detailed catalogues published in the meantime by the various museums with collections of Rembrandt paintings This work of art history and art research should belong in the library of every serious art historical institute university or museum
