Remote Working David Nickson,Suzy Siddons,2012-06-25 As more people choose to work from home the challenges for both the home worker and traditional management increase Many questions arise regarding how to appraise the remote worker the logistics of home working and productivity The authors focus on developing the right skills to cope with this new environment and stress the importance of knowing what the homemaker needs Other issues addressed are finding the right balance between the office home and client sites dealing with the creation of workable home office environment and technological and legal issues

Satellite Remote Sensing and the Management of Natural Resources Nathalie Pettorelli,2019-05-16 The ability to anticipate the impacts of global environmental changes on natural resources is fundamental to designing appropriate and optimised adaptation and mitigation strategies However this requires the scientific community to have access to reliable large scale information on spatio temporal changes in the distribution of abiotic conditions and on the distribution structure composition and functioning of ecosystems Satellite remote sensing can provide access to some of this fundamental data by offering repeatable standardised and verifiable information that is

directly relevant to the monitoring and management of our natural capital This book demonstrates how ecological knowledge and satellite based information can be effectively combined to address a wide array of current natural resource management needs By focusing on concrete applied examples in both the marine and terrestrial realms it will help pave the way for developing enhanced levels of collaboration between the ecological and remote sensing communities as well as shaping their future research directions Satellite Remote Sensing and the Management of Natural Resources is primarily aimed at ecologists and remote sensing specialists as well as policy makers and practitioners in the fields of conservation biology biodiversity monitoring and natural resource management *Principles of Electricity* Earl Charles Stanhope Stanhope,1779

Networks and Systems Management Iosif G. Ghetie, 2012-12-06. The deployment of communications networks and distributed computing systems requires the use of open standards based integrated management systems. During the last five years, the overall industry effort to develop, enhance, and integrate management systems has crystallized in the concept of management platforms. Management platforms are software systems which provide open, multi-vendor, multiprotocol distributed management services. They allow multiple management applications to run over core platform services which constitute the essential part of the management platform framework. This book provides a comprehensive analysis of the features and technical characteristics of distributed management platforms by examining both qualitative and quantitative management capabilities required by each management platform service. The analysis covers the management platform run-time environment, the operational aspects of using management platforms, the development environment which consists of software toolkits that are used to build management applications, the implementation environment which deals with testing interoperability aspects of using management platforms, and of course the distributed applications services which platforms make available to management applications. Finally, the analysis covers the capabilities of several management applications, either generic or specific to devices or resources which run on top of management platforms.
